UMTA JOINT MOCK EXAMINATIONS – 2026

Uganda Certificate of Education

GEOGRAPHY

Paper 1

2 Hours 45 Minutes

INSTRUCTIONS TO CANDIDATES:

- *This paper consists of* **two** *sections* **A** *and* **B.** *It has* **six** *examination items.*
- *Section* **A** *has* **two** *compulsory items.*
- *Section* **B** *has* **two** *parts;* **I** *and* **II**. *Answer* **one** *item from each part.*
- *Answer* **four** *examination items in* **all**.
- *You may use diagrams where applicable to illustrate your responses.*
- *Any additional item responded to will* **not** *be scored.*

SECTION A

COMPULSORY MAP AND PHOTOGRAPHIC SKILLS.

Respond to **all** *items in this section.*

Item 1: Map skills

Use **EAST AFRICA 1:50,000 (UGANDA) KOC**, map extract sheet **22/3** series **Y732 Edition 1- USD** to respond to the tasks.

Koc is located **32°05'** East of the Greenwich and **2°35'** North of the Equator. The human activities in the area have had a significant impact on vegetation cover. Construction of transport networks, settlement along these transport networks have led to clearance of vegetation in places like Onyona, Koc, Lalar and others. This destruction has made it hard for the local communities to get herbal medicine, wood fuel and the rainfall pattern has also been affected thus reducing agricultural output.

Your school Geography club has organized a tour to the area shown on the map extract with an aim of assessing the impact of vegetation destruction on man's ways of living. The members of the club noted that there was need to urgently address the negative impact of vegetation destruction. However, on return, your teacher has requested you to write a report. In this report, you are expected to advise the local leaders and communities on how to conserve the vegetation in this part of East Africa.

Task:

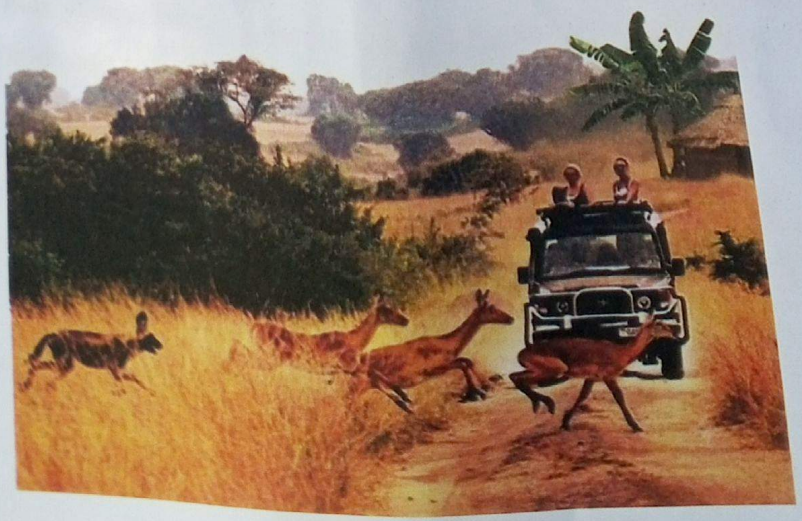

(a) Draw a sketch map of Koc East of **Easting 00**, on it mark and name the features identified in the scenario.

(b) With evidence from the map extract write a report that you will submit to the community leaders.

Item 2: Photograph skills.

Wildlife conservation has been given priority in East Africa because it forms a backbone for the tourism industry. However, the main challenge today is controlling fauna. Stray wildlife often cross into villages in search of pasture or water and as they do, they attack goats and sheep and destroy crops. Such invasions have become increasingly common in recent years leaving many families counting loses and living in constant fear. The residents on the other hand have resorted to poaching and poisoning which has escalated the human-wildlife conflict.

In one of the research carried out in the tourism sector, a game warder in Kidepo valley agreed that Kidepo's declining lion population was largely due to intense poaching, introduction of certain infrastructure in the park and others. This warder also warned that if nothing is done, more game will be lost. He confirmed that some had migrated to South Sudan in search of safer habitats thus affecting the tourism industry. The tourism board has organized a workshop for stake holders to get lasting solutions to this conflict and boost tourism in the region. You have been invited to address those in attendance.

CamScanner

Task:

(a) Draw a sketch of the photograph showing the effects of man's activities on wildlife conservation.

(b) Explain what can be done to reduce the conflict.

SECTION B

This section has **two** *parts* **I** *and* **II**

Part I

Respond to **one** *item from this part.*

Item 3.

East Africa has a variety of land form features ranging from mountains, basins to rift valleys. If these features are well utilized, they can enable the local people to live a better life through generation of wealth. A newly recruited community development officer working in the rift valley region in Uganda has noted that this region which has low population in some area has potentials that can be tapped to improve the community's lives.

The development officer has organized an essay competition under the theme *"Sustainable use of the Rift valley for development"*. He has contacted the students in your school to write an essay exposing the wealth in that land form of East Africa and how they can be sustainably generated.

Task:

(a) Draw a sketch map of East Africa showing the major landforms.

(b) Write an essay that you will present to that officer suggesting ways how the residents can sustainably generate wealth in that area.

Item 4:

Uganda's unusually heavy rainfall is received in certain periods of the year. During such rains, the Central, Western and Eastern parts of the country experience floods in the districts of Wakiso, Katakwi, Ntoroko, Butaleja and others. Rivers in these areas overflow destroying property, farmlands, contaminate fishing grounds and sometimes lead to loss of lives. The overflow is attributed to siltation, dumping of wastes all of which reduce the depth of the rivers.

The people living near these water bodies have always been warned about dumping which poses a severe environmental crisis. Over 90% of house holds rely on improper waste management especially in the urban areas that lowers the depth of the rivers leading to flooding. The Ministry of Water in your country has started on a campaign aimed at controlling floods in the different districts. Your school in the urban setting has been selected to head this campaign.

Task:

(a) Draw a sketch map of East Africa showing rivers.

(b) Make a write up that you will use in these campaigns.

Part II

Respond to **one** *item from this part.*

Item 5.

Communication in East Africa has been of great importance in the different communities. Traditionally people were using drums but the drumming depended on the information to be passed on. Later it transformed to wave and print communication. Of late internet is being widely used and has become the life blood of the modern economy through use of social media platforms, mail,

banking and others. Local businesses have shifted to social media marketing thus making lives better.

The volume of transactions increased through fees payment, utilities and many others. Use of the internet has simplified all that but has also come with a lot of consequences that are affecting communities since it is being misused especially among the youth. The local leaders in your community are worried and have decided to meet the youth. Your school that lies in this same community has also been invited.

Table 1: Distribution of internet users in 2022.

Age group	Percentage
18-24	19
25-34	14
35-44	10
45-54	18
55-64	32
65-74	07

Task:

(a) Use an appropriate statistical method to present the information given in the table.

(b) Write the information that you will present to the youth.

Item 6.

Rural-urban migration in Uganda contributes a lot to urban growth. Urban areas have been expanding by **6%** annually since **2000**. It's estimated that by **2030** the number of people living in urban areas will have reached **722** million people. This number is mostly made up of the youth with a recent estimate of **27-35%.** This rapid growth in urban population comes with advantages and disadvantages.

A good number of the youth are attracted to go to the urban areas with a hope of escaping rural poverty and earn for their families as well. However, on reaching the urban areas many end up disappointed. Many parents and elders in the community have tried to stop this movement citing opportunities in the rural areas but the youth regard them as backward. You have been requested to add a voice to that of the elders.

Table 2: Rural Urban migration by gender in percentage (2023).

Reason	Male (%)	Female (%)
Financial betterment	51	12
Education	15.0	2.8
Personal	22.1	53.8
Political security	2.3	0.1
Others	9.6	31.3

Task:

(a) Draw a suitable statistical diagram to represent the information in the table.

(b) Advise the youth in the above community.
