Item 1: Map Skills

Study the text below and the **1:50000** East Africa Uganda **LAKE NAKIVALE** map extract series **Y732**, sheet **86/4,** edition **4-U.S.D** and respond to the tasks that follow.

Lake Nakivale is a fresh water lake located in western Uganda the present day Isingiro district. The area where its found is endowed with diverse drainage features, relief features and vegetation types. The area receives moderate to heavy rainfall due to the influence of the above features on the climate. However, the local community has began complaining about the dangers of the above f eatures which put them in a state of discomfort.

Support material (lake Nakivale map extract).

a) The residents along Musirira road junction (610083) would like to migrate from their area using the dry weather road to settle along the road junction at Kibengo (641044) due to the dangers of the drainage features in their area.

Help the residents determine how long there journey will be.

b) Draw a sketch map of the area shown on the map extract above nothing 06, on it mark and name;

i) 4 drainage features

ii) Aphysiographic feature.

iii) A transport route.

c) Using evidence from the map extract and information about climate from the scenario, suggest the most suitable agricultural activities that can be carried out in the area shown on the map extract.

Item 2. Photograph analysis.

Many African countries have established manufacturing industries due to the ready market for the goods provided by the ever growing population. These industries have done good to the respective African countries however, they have brought up negative impacts to the environment making people in the surrounding areas complain. The complaints have attracted public attention. You have been assigned responsibility by the CBS officials to investigate about the rising concerns of the people in the local community.

Turn Over

Task

a) Draw a sketch of the photograph on it mark and name features shown.

b) Gather information to be presented to the CBS radio officials about the rising concerns of the local community surrounding manufacturing industries giving evidence from the photograph.

SECTION B
Part 1
Answer only one item from this part.

UNEB FOCUSED ITEM CENTRE

Item 3

Kigezi is a mountaineous area in south western Uganda. The local natives have stayed in this area for quite so long but keep on wondering how these highlands came into existence. Some even say that there small gods created them. Besides that, the area has got fertile soils, experiences reliable rainfall which supports crop farming as well as livestock rearing. These natives have used the highlands for the above activities, however, these people complain that Kigezi area is now becoming a hazard to there livelihood.

Support material.

a) Explain to the local natives how the above highlands came into existence.

b) Describe the hazards faced by the people living in kigezi highlands and the possible ways to combat them.

Item 4.
East Africa is situated astride the equator where it experiences modified equatorial climate characterized by heavy rainfall and hot temperature. The heavy rainfall experienced leads to formation of numerous streams that originate from highland areas towards low lying areas, the streams erode the landscape forming numerous features. However, these streams have also favored a sustainable living to the nearby local communities. Officials of the Uganda Wild life authority expect tourists from Canada to come and visit Rwenzori mountains and see its associated features in form of vegetation, drainage features and relief landforms. However, the officials are un aware about how these features on Rwenzori mountains came into existence to give it a magnificent scenery.

UNEB FOCUSED ITEM CENTRE

Support material.

Tasks.
a) Describe the features resulting from erosion of the streams from the in highland areas .
b) Explain how the streams have promoted a sustainable living to the nearby local community.

PART II
Attempt only one item from this section.

Item 5.
Uganda exports agricultural produce to foreign countries. It exported coffee to Switzerland and Canada so as to improve on the agricultural sector and as well as satisfying the world market demand. For example in 1998, it earned 215m USD from coffee exports, in 1999, it earned 722m USD and finally in 2000, it earned 1061m USD. However, this trade began declining after 2000 by registering 568m USD in 2001 which worried farmers.

Support material.

UNEB FOCUSED ITEM CENTRE

Tasks.

a) Present the above information in a tabular format.

b) Draw a suitable graph to potray the above information.

c) Explain to the coffee farmers as to why there was a decline in trend of coffee exports in 2001.

Item 6

Many people in the different African countries have migrated to towns in search for better employment opportunities, improved social amenities etc, their invasion has led to a drastic increment in urban population. This has resulted into negative impacts to the environment.

Support material.

Fig 1 showing estimated urban population for selected African cities.

City	Urban population
Kampala	46,373,400
Johannesburg	24,025,800
Pretoria	116,965,400
Cairo	12,360,100
Lagos	40,928,400
Dar-es-salaam	47,689,100
Total Urban Population	1,905,999,001

Tasks.

a) Use a suitable statistical diagram to show the above information.

b) Explain the impacts of the drastic increment in urban population to the environment.
