Item 1

A child with a painful tooth was taken to a dentist. The dentist claimed that a concave mirror of radius of curvature ranging between ***16cm*** and ***24cm*** to view the tooth in great detail. Unfortunately mirrors of the required specifications were out of stock! The dentist approached the hospital superintendent who went to a shop and was given a box of the mirrors though they did not have any specifications. The superintendent wondered whether the mirrors in the box would be the ones required and thus approached you for help.

Hint

1. *The radius of curvature is twice the focal length of the mirror*
2. *In your report, you are expected to include: The aim, hypothesis, variables (dependent, independent and controlled/fixed variables), set up, procedures, data values in a table (at-least 5sets), plotted graph, sources of errors, mitigation for the identified sources of errors, conclusion/ advice/ recommendation.*

Task:

You are provided with a mirror, with similar properties as those in the box given to the superintendent, help the superintendent tell whether the mirrors in the box will serve the intended purpose.

Item 2.

A hungry student wanted to fry an egg, therefore rushed for the kitchen cabin. In the cabin drawer, there were many bottles containing liquids! The student wondered what the bottle with cooking oil since the contents of the bottles would be not specified. This confused the student, therefore picked one bottle and came to you for help.

Hint

1. *Density of cooking oil ranges from* ***910 – 930 kg m^{-3}.***
2. *In your report, you are expected to include: The aim, hypothesis, variables (dependent, independent and controlled/fixed variables), set up, procedures, data values in a table (at-least 5sets), plotted graph, sources of errors, mitigation for the identified sources of errors, conclusion/ advice/ recommendation.*

Turn over

Task.

You are provided with a liquid with similar properties to that in the bottle that the student picked, advise the student whether to use the liquid to fry the egg or not.

END.
