S.4 GEOGRAPHY SEMINAR AT VICTORIA HIGH SCHOOL-IGANGA FOR COMPETENCE BASED CURRICULUM HELD ON SUNDAY 28TH June, 2026

Item 1 (a): MAP SKILLS

Koc lies 2°35' North of the equator. It is found in Nwoya District. The area has vast land which is believed to be fertile. It is dominated by scattered trees, woodlands, thicket and shrubs. It is also drained by several rivers such as Kulutogo, Ayago, Kalang, etc.

The people living in Koc are still experiencing high levels of poverty and unemployment which have led to poor living standards.

Part of your class visited the area, where you were among the selected few. Your task was to study the area's geography and identify the possible economic activities that can be done by the people so as to improve their livelihood.

Task

(a) Use an appropriate sketch to show the physical features in the area.

(b) Using the map extract of Koc, make a write-up on the possible economic activities that can be undertaken by the people living in Koc.

Item: 1 (b) : Map skills

For this item, use the East Africa 1:50000 (UGANDA) Koc map extract sheet 22/3, Series Y732, Edition 1-USD and use it to respond to the task that follow: Koc is an area found in in Northern Uganda. The area is endowed with a variety of natural resources ranging from vegetation drainage and Varying relief types. Thx area is poorly developed with few social Services in the area and the government is planning to establish a new road in the west from Easting 97 to 05 and along Northing 97.

As an area supervisor of Koc region, the district Engineer has requested to visit the exact area where thx road is to be constructed in order to provide the relevant information.

Task

(a)(i) Giving evidence from the map, determine the global location of Koc.

ii) Using and Illustration, show the physical barriers the road Engineers are likely to fail during construction

b)i) Using evidence from the map, Explain the likely problems facing people living in the area.

Item 2 Sample1: Photograph Skills

Tourism and wildlife conservation is one of Uganda's main foreign exchange earners. Uganda has got unique flora and fauna distinct from other parts of the world, hence providing great potential for tourism development.

According to a report from the newspapers, wildlife is disappearing from most of the national parks. Ten years ago, farmers saw elephants, antelopes and wild pigs even near schools. Today, most children have never seen them except on TV.

The District Environment Officer in your district has called an emergency meeting to address these challenges and come up with ways through which wildlife can be conserved to reap the benefits associated with it. Your class has been invited and your task is to advise the district on what should be done without blaming members of the community or the animals.

Support Material

Task

(a) Using a suitable illustration show the area in the photograph. Write an essay.
(b) Write and essay advising the district environment Committee on the measures to boost wildlife Conservation

Item2 Sample2

A mining project has been launched in KIGOROBYA, a remote area rich in minerals like gold and rare earth elements. The local government collaborates with an international mining company to develop the site promising economic growth and employment. However, the project faces opposition from local communities concerned about environmental impacts and land rights. Activists voice their meeting has been organized where you are required to present about the concerns of the locals.

Support material.

Tasks:

a) Draw a sketch of the area shown on the photograph showing features.
b) As an environmentalist, explain measures for effective mining and sustainable land use planning.

Section B

Part 1 - Choose one item from this part.

Item 3

Western Uganda is one the area which led Uganda to be referred to as the "Switzerland of Africa" because of steep hills deep valleys and cool weather.

Tourists every year from different parts of the world visit Western Uganda and come across spectacular highlands. These stand above the surrounding areas with Steep slope. During such visits they always ask the local communities living around these features to explain to them how they came to exist but to their

disappointment people around those features lack knowledge on the origin of such highlands

Task

(a) Identify the names of those highlands and explain how they were formed

(b) Explain the effects of highlands on the people living around them.

Item 4

East Africa has several drainage features. Rivers are part of the drainage system; Rivers have three stages of development such as the youthful nature and old stage, in each stage there unique characteristics.

Your class conducted field work study during the study you were briefed by the local communities living near Rivers about the behaviour of rivers at different stages. You were task of sharing the information you got from field to the other members of the class who did not have the opportunity to go.

Task

(a) Identify and describe the characteristics of rivers in each stage

(b) Advice the people living in river basins about the economic activities they can engage in to improve their livelihood ·

Section B (PART II)

Item 5: Answer one Item from this part.

“The two Kampala’s", Kampala is the Capital City City of Uganda with an estimated population of 1,797,722 In 2024, according to the national census that was conducted.

Musa a boda boda rider from Mbarara moved to Kampala in 2022 chasing opportunities in the city like 290,000 plus others since 2014. During the day he operates in Makindye Division, the most over populated division with 486, 762 people. By night he sleeps in a single room in Kampala Central with 81,658 residents.

Musa like any other residents face a number of problems such as overcrowding, Housing stress, traffic congestion, poor sanitation, High cost of living, poor service delivery among others. All these have made life difficult for the residents. City authorities have contacted your school to Join a team of experts to do research on the city and help them draft strategies to Improve the city.

Table 1 showing Resident population of Divisions of Kampala in 2024.

DIVISION	RESIDENT POPULATION
Makindye	486,762
Central	81,658
Rubaga	4101400
Nakawa	428,732
Kawempe	390,170

Source: Uganda Bureau of statistics (UBOS) National population and Housing Census Data 2024,

Task

a) Use a suitable statistical diagram to present the Information in the Scenario:

b) Prepare an essay to present to city authority on the measures to be implemented in order to Improve the lives of dwellers.

Item 6

The population of Uganda rapidly growing annually at an alarming rate of about 2.9% leading to an additional number of people to over 1.5 million annually. It has been projected that Uganda's population by this year 2026 will exceed 50 million people and by 2050 it's projected to reach almost over 90 million people. The underlying factors for this rapid population increase has been attributed to high fertility rates among women of about 6 children a dominantly youthful population, Early marriages, reduced child mortality rate, limited access to family planning facilities among others.

Table 2 Uganda's population from Selected years between 2020 to 2026.

Year	Population
2026	52,700,000
2024	50,000,000
2022	47,000,000
2020	44, 000 000
2015	37,000,000
2010	32,000,000

Source: World meter: world population

Task

Using the Information given in table 2 and text;

(a) Draw an appropriate diagram to illustrate Uganda's population and calculate its percentage change.

b) In your opinion, write an essay explaining the challenges Uganda is facing from an Increased population and Recommend measures to overcome those challenges.

Sample 2 Item 6

Uganda exports and imports various commodities between her neighbours. Coffee exports are worth $800m and Matooke to Kenya and South Sudan through the Malaba / Busia border posts.

In 2023 Kenya was Uganda's biggest buyer taking 38% of exports. But goods delay to reach their destination where trucks spend 3-5 days at Malaba border, this is due to poor roads and delays in Customs.

In addition, Uganda imports fuel, Cement, and other manufactured goods such as Mattresses, clothes, cosmetics etc from Tanzania and Kenya. Poor road network, non-tariff barriers delays goods and makes them expensive when they reach markets in Kampala.

Table 3: Trade between Uganda and her partners in 2023

Partner Country	**Estimated Exports (US $ million)**	**Estimated Imports (US $ million)**
Kenya	$890	1085
Tanzania	240	1450
Rwanda	510	110
South Sudan	280	90

The district Committee, where your school is located has organized a workshop in which your school was invited to attend to discuss ways Uganda can adopt to promote trade between her neighbors in East Africa.

Task:

(a) Draw a suitable diagram to illustrate the information provided in the table.

(b) Make a write-up explaining the measures Uganda can adopt to promote trade with other East African countries. Intra

(c) Make a Write up explaining the measures upgrade can take to promote Intra - East African Community trade.

END
