Item 1

A participant collapsed during an athletics competition. The school team was advised to give the participant a drink enriched with some nutrient(s) to quickly regain energy and provide muscle development. Unfortunately, the available drinks at the first aid tent were not clearly labelled and the team had a challenge in identifying which of the drinks to give.

The participant was rushed to a nearby clinic for medical attention.

You have been provided with three samples of the drinks **X**, **Y** and **Z** from the first aid tent.

Task:
Carry out a scientific investigation to find out which of the three drinks at the first aid tent should have been given to the participant.

(*Your investigation should include aim, hypothesis, variables, apparatus/materials, procedure, results and recommendation.*)

(a) Aim, hypothesis, variables, apparatus/materials.

Item 2

Jane owns a home with a large compound. In one part of her compound are two common plants, **J** and **K**. She is wondering why **K** appears throughout the year while **J** appears seasonally.

Specimens **J** and **K** are the two plants picked from Jane's compound.

Task:

(a) (i) With reasons, identify the different plant categories to which specimens **J** and **K** belong.

For Scorer's Use Only

Basis Code	**I_2**
Score	

(ii) Explain to Jane how structures of specimen **K** enable it to appear in her compound throughout the year.

For Scorer's Use Only

Basis Code	S_2

(b) Draw and label the organ of specimen **J** responsible for making food. (*State the magnification of the drawing.*)
