SECTION A

Compulsory

Item 1.

The government of Uganda in 1998 passed a bill on Traffic and Road Safety that later got amended in 2020. The law gave the Uganda Police Force through the Express Penalty Scheme the mandate to promote road transport and safety. The traffic Police Department enacted localised traffic stops and strict vehicle inspection and positioned speed limit sign stops and road humps all in the hope of promoting safe road usage by different travellers. Despite the efforts of the Police Traffic Department, road accidents have continued to claim the lives of Ugandans. At your local trading centre Lapok,it is reported that 4-6 people are killed every month by either speeding vehicles or Boda boda riders. The masses of the area composed of the business community and centre dwellers are blaming the present traffic Police at the entry and exit points of the trading centre for failing to manage the road usage well. The area youth have now resorted to placing logs and big stones along the roads with the hope of forcing the drivers and riders to reduce their speed. This act is wrong because community members are not allowed to take the law into their own hands. The community leaders want something to be done to address the situation. They have therefore scheduled a community sensitization outreach where the head of traffic of your area will be present.

Task:

As a concerned citizen of Lapok community, prepare what you would present at the outreach to address the issues raised in the scenario. **(400 – 500 words)**

SECTION B

Answer **one** *item from this section.*

Item 2.

In 2024, following an end-of-year security report showing frequent theft of students' and a few teachers' property, the Chairperson of the Board of Governors at Kimar College directed the Deputy Head teacher in charge of Student and Staff Welfare to strengthen school security. The school recruited ten security officers and established five additional checkpoints: two near the lower classes, one along the main walkway, and two near the dormitories.

Despite these measures, thefts continue. Many Senior One and Senior Two students have lost confidence in the school's security system, while some Senior Four to Senior Six students suspect that security officers or teachers are involved in the thefts. Teachers also feel increasingly insecure, and this is affecting their work. You believe the situation can be improved.

Task:

As a student of Kimar College, prepare a research proposal to address the concerns raised.

Item 3.

In the 2021 financial year, Pembe Town Council passed an 8.7 billion budget, allocating 1.9 billion to the Health Department for the procurement and distribution of HIV/AIDS drugs. Ministry of Health guidelines emphasize that patients who take their medication consistently build stronger immunity to fight opportunistic diseases. However, this is not the reality in Lema Village. The local Lema Health Centre II frequently experiences stock-outs, sometimes lasting up to three months, depriving patients of reliable access to medication. Because of these disruptions, many HIV/AIDS patients suffer severe immune system breakdowns. Tragically, this lack of continuous treatment contributed to four recent malaria-related deaths in the area over the past five months. Consequently, local residents are deeply frustrated and blame the area council leadership for failing to advocate for a consistent supply of drugs to the health facility.

Task:

As a concerned member of the Lema community, prepare a research proposal that could be used to address the concerns raised. **(Use 500–700 words.)**
