GEOGRAPHY

PAPER 1

2HOURS 45 MINUTES

INSTRUCT IONS

1. *This examination paper consists of two sections A and B.*
2. *Section A has two compulsory items.*
3. *Section B has two parts; I and II. Respond to one item from each part.*
4. *Respond to four items in all.*
5. *You may use diagrams, where applicable to illustrate your responses.*
6. *Any additional item(s) responded to will not be scored.*
7. *All responses must be written in the answer booklet(s) provided.*

SECTION A

COMPULSARY MAP AND PHOTOGRAPH SKILLS

Respond to **all** items in this section

Item 1: Map skills

Use EAST AFRICA 1:50,000 (UGANDA) KOC, map extract sheet 22/3 series Y732 Edition 1- USD to respond to the tasks.

Koc lies 32° 05' East of the Greenwich and 2° 35' North of the Equator with several places and features that can be used to promote different economic activities like land, vegetation, drainage and others. The area receives moderate rainfall that has supported the growth of forests and woodland vegetation in places like Tim Opok, Lalar, East of Koc and others.

The authorities in this area are looking for a development agency that will work for a period of ten years with the community members to make their lives better. The agency will concentrate on utilization of the available resources especially vegetation in their first two years. In order to fulfil the demands of the local authorities, the agency officials are organizing to meet the residents and they have contacted you to brief them about how vegetation will improve people's lives.

a) Draw a sketch map of map of Koc showing vegetation types and transport networks that will be used by the officials.
b) Using the map of Koc, make a write up that you will present to the officials.

Item 2: Photograph skills

The mountain slopes in East Africa have forests that form part of the broader mountain eco system.. The indigenous tree species in these forests have supported diverse birdlife, small mammals and medicinal plants used by the surrounding communities.

However, over time, population growth and land pressure pushed communities to encroach on the forests found on mountain slopes. Trees were cut down to create farm lands. Charcoal burning, timber harvesting followed and in a short time large sections of the reserved forests had been converted into crop gardens exposing residents to disaster. Efforts to control the destruction have not yielded a lot. The local leaders have therefore decided to call for a meeting. Your school in the same community will be represented.

a) Draw the sketch of the area seen showing the indicators of forest destruction.
b) Advise the communities in the above area on how they can reduce that destruction.

SECTION B

Part I

Respond to only* one *item in this part

Item 3

Many people in Eastern Uganda continue to live in landslide prone areas with limited access to essential services. People in Bududa and the surrounding areas, the residents always gather to commemorate the 320 people who died and those displaced by the 2010 landslide.

Following that disaster, the government closed schools and declared the area unsafe for settlement. Families were relocated to Kiryandongo but later returned claiming harsh living conditions. They have since settled again in their ancestral homes despite the risks, limited access to health and education services and inaccessibility.

You have been selected to talk to the residents of Bubuda about how they can live safely in this area amidst the risks.

a) Draw a sketch map of East Africa showing the landslide prone areas.
b) Explain to the residents how they can survive in this fragile environment.

Item 4

Rivers form part of Africa's drainage. Many of these rivers originate from the mountains and go through three stages of development that is youthful, mature and old stage. At each stage the characteristics differ and the features formed at these stages benefit the communities.

Recently your class had a field work trip to Western Uganda where you had an opportunity to interact with the communities living near rivers like Semliki whose banks always burst leading to death of people in areas like Bweramule, Butungama and others and they briefed you about the characteristics of that river in its senile stage. On return, your teacher has requested you to share with the rest of the learners.

a) Describe the characteristics of the river in the stage identified in the scenario.
b) Explain how the features formed by the river in this stage benefit the communities around.

PART II

Respond to only **one** *item from this part*

Item 5

Uganda's population is rapidly growing. According to the Uganda Bureau of statistics preliminary results of the 2024 National Population and Housing census, Uganda has a population figure of 45,949,585, with a growth rate of 3.04 %. Policy makers are worried about the effects of such trend. The policy makers have warned that if nothing is done, the country's resources shall not sustain the large population.

The Ministry of Housing and Population is looking for possible ways of putting in place measures to overcome the effects of a large population to the economy. Your district has just been given a district status and you have been asked by your district authorities to prepare a document that will address rapid population growth rate to assist the policy makers address their worries and deliver better services.

Table 1: **Uganda's Population by Region (2024)**

Region	Area (Square Km)	Population (million)
Central	61,403	17.36
Western	65,227	11.57
Eastern	39,479	8.51
Northern	85,392	8.51

a) Draw a statistical diagram to indicate Uganda's population.
b) Advise the district officials how they can reverse the above trend.

Item 6

Communication in East Africa has gone through stages. 30 years ago Uganda barely had a telecommunication sector in the modern sense. Fixed telephone lines were scarce and expensive, confined largely to government offices and a handful of large companies.

Today telecom networks carry the life blood of the modern economy. The volume of transactions increased through fees payment, utilities and many others. Use of the internet has simplified all that but has also come with a lot of consequences that are affecting communities since it is being misused especially by the youth. The local leaders in your community have decided to meet the youth and you have also been invited.

Table 2**: Quarter Trends in Fixed and mobile Subscriptions (2022-2023)**

Months	Mobile Subscription(million)	Fixed Subscription(million)
June	31.3	8.6
September	32.2	11.6
December	33.1	11.8
March	34.3	11.9

a) Draw a suitable statistical diagram to represent the information in the table.
b) Make a write up that you will use in that meeting.
