CHEMISTRY

545/1,2,3

© *Kayunga Secondary Schools Examinations Committee (KASSEC)*

CHEMISTRY 545/1

SECTION A

Item One

(a)

Category of the products

- Soapy detergents ✓**C**
- Soap less detergents ✓**C**

Mode of action

- Both types of detergents work by lowering the surface tension between water and oil or dirt. ✓**F**
- The detergents contain hydrophilic (polar) head/part, which dissolves in water and hydrophobic (non-polar) tail or part which dissolves in dirt (gets attached to the dirt) ✓**F**, with constant agitation the dirt is pulled off the clothe or fabric and gets dispersed in water as tiny droplets, ✓**F** which are then poured away, the cloth or fabric is rinsed several times and dried. ✓**F**

2C + 3F = T2 = 03 scores.

2C + <3F = T1 = 02 scores.

0-1C + <3F = T0 = 00 scores.

(b)

- They irritate or burn the skin and eyes; ✓**Di** because they are alkaline and corrosive; ✓**De** Mitigation: This is mitigated by wearing gloves, protective goggles when handling concentrated products. ✓**Dm**
- The products can pollute water bodies when discharged in large amounts; ✓**Di** Soapless detergents contain phosphates which when released into water bodies; ✓**De** the water bodies are enriched with nutrients such as phosphates which lead to rapid growth of algae (algal blooms) which block sunlight, and when they die, decompose and use up oxygen; reducing oxygen amounts in water bodies leading to the death of aquatic organisms. Mitigation: is by treating waste water before being discharged into the environment. ✓**Dm**
- Soapless detergents are non-biodegradable ✓**De** i.e. they persist in the environment; and harm aquatic organisms; ✓Di Mitigation: this is done by treating waste water before its release into the environment. ✓**Dm (any other two)**

2Di + 2De + 2Dm = D2 = 05 scores.

2Di + 2De + 1Dm = D1 = 04 scores.

1Di + 1De + 1Dm = D0 = 00 scores.

1Di/De = D0 = 00 scores.

1Di/De + 1Dm = D0 = 00 scores.

(c)

Similarities

- Both are used for cleaning and removing grease or dirt. **✓Es**
- Both are effective cleaning agents in soft water**. ✓Es**
- Both have hydrophobic and hydrophilic parts**. ✓Es**
- Both are sodium salts of long chain organic acids. **✓Es**

(Any 3)

Differences between soapy and soapless detergents:

Soapy detergents	**Soapless detergents**
Forms scum with hard water	Does not form scum with hard water **✓Ed**
Biodegradable	Non-biodegradable **✓Ed**
Less effective in hard water	More effective in hard water **✓Ed**
Are made from natural oils and fats.	Are made from synthetic chemicals **✓Ed**
Washes less brighter	Washes more brighter **✓Ed**

(Any 3)

3Es + 3Ed = E2 = 05 scores.

3Es/3Ed = E0 = 00 scores.

<3Es + <3Ed = E1 = 04 scores.

T2 + D2 + E2 = 03 + 05 + 05 = 13

Item Two

(a)

The product is an acid/acidic. **✓C**

Because: It has pH of 2-3 or below 7.**0 ✓R**

OR It reacts with rust; a basic substance to remove it.

OR Any other correct definition of an acid.

Ci + R = C2 = 04 scores.

Ci only = C1 = 03 scores.

R only = C0 = 00 scores.

(b)

- It changes/turns blue litmus paper to red ✓**P**
- It has a sour taste ✓**P**
- Reacts with a metal such as zinc to produce salt and hydrogen. ✓**P**
- It reacts with carbonate to produce salt, carbon dioxide gas and water. ✓**P**

(c)

- The product can be used for removing scale or limestone from metal surfaces and household equipment, because it reacts with the carbonate. ✓**U**
- Acids such as sulphuric acid are used in car batteries as electrolytes ✓**U**

(b and c) 3P + 1U = X2 = 05 scores.

<3P + 1U = X1 = 04 scores.

1U = X1 = 02 scores.

3P = X0 = 00 score

(d)

- Excess acid can lower the **pH** of the soil, ✓**mi,** making it unsuitable ✓**mi,** for plant growth. The mitigation is to neutralise the acidic waste with suitable base or alkaline material before disposal. ✓**mm**
- Excess acids can lower the pH of water bodies, ✓**mi,** harming aquatic organisms ✓**me,** Mitigation: treating acidic waste before disposing. ✓**mm**

2mi + 2me + 2mm = I = 04 scores

1mi + 1me + 1mm = I0 = 00 scores.

C2 + X2 + I = 04 + 05 + 04 = 13

SECTION B — PART I

Item 03

Process of extraction:

- The ore (copper pyrites) is crushed and ground ✓**Rm** to fine powder, mixed with oil and water ✓PP in a concentration tank to remove impurities. ✓**Pr**
- The mixture is agitated by blowing air ✓**PP** into it, particles of the ore adhere to the surface while the impurities are wetted by water and sink to the bottom of the tank. ✓**PP**
- The ore and the frothing agent are skimmed off, treated with sulphuric acid to separate the ore from the frothing agent. ✓**PP**
- The ore free from impurities is filtered off and dried. ✓**Pr**
- The concentrate is then roasted in air/oxygen ✓PC to form copper(I) sulphide, iron**(II)** oxide and sulphur dioxide.

$$2CuFeS_2(s) + 4O_2(g) \rightarrow Cu_2S(s) + 2FeO(s)$$ ✓*PC*

- The solid mixture is heated in a furnace with sand/silicon dioxide in absence of air to remove iron(II) oxide impurities, forming a molten slag of iron(II) silicate that is tapped off. ✓**Pr** / ✓**PC**
- The copper(II) sulphide is heated strongly in a furnace with limited supply of oxygen to form impure copper (blister) and sulphur dioxide gas. ✓**Cd**

$$Cu_2S(s) + O_2(g) \rightarrow 2Cu(s) + SO_2(g)$$ ✓*PC*

- The impure copper is purified by electrolysis in an electrolytic cell using copper**(II)** sulphate ✓**Pr** as the electrolyte, impure copper made the anode and pure copper as the cathode.
- The copper is collected and shaped into wires ✓**Cd** ready for use.

All Rm + V + PP + PC + Pr + Ch + Cd = P3 = 06 scores.

All Rm + any 3 = P2 = 05 scores.

All Rm + 1V = P1 = 04 scores.

No Rm = P0 = 00 scores.

Side effects during the production process:

- Sulphur dioxide released during the process reacts with rain water ✓**Di** to form acidic rain upon accumulation in the atmosphere, destroys buildings made of cement, iron. ✓**De** Mitigation: this is mitigated by installing scrubbers in chimneys to neutralise the sulphur dioxide before releasing. ✓**mm**
- Waste water from the copper production facility contains harmful chemicals like acids, ✓**Di** which when discharged can pollute the environment. ✓**De** Mitigation: Treat the waste water by neutralising the chemicals before discharge. ✓**Dm**

2Di + 2De + 2Dm = S2 = 04 scores.

2De + 2De = S1 = 03 scores.

2Di/2De/2Dm = S0 = 00 scores.

Social benefits:

- Increased government revenue from taxes **✓Sb,** levied on the workers and factory, **✓Se,** which is used in the improvement of infrastructure such as roads, schools, health facilities, leading to better standards. **✓Si**
- Employment opportunities to industrial chemists, chemical engineers, geologists, and analytical chemists **✓Sb,** thereby leading to increased income **✓Se,** and therefore better standards of living. **✓Si**
- Provides a market for raw materials **✓Sb,** and commodities for people supplying the factory with raw materials, improving their income ✓Se and thus leading to better standards of living. **✓Si**
- Workers gain technical, managerial and professional skills **✓Sb,** through industrial employment and training, opening chances of employment opportunities, increased income and hence high standards of living. **✓Se**
- Technological advancements in industrial activities **✓Sb** encourage innovations and adoption of new technologies that can improve productivity and everyday life. **✓Se**

2Sb + 2Se + 2Si = B2 = 04 scores.

2Sb + 2Se = B2 = 04 scores.

2Sb + 2Si = B2 = 04 scores.

1Sb + 1Si + 1Se = B1 = 03

2Sb/2Si/2Se = B0 = 00

P3 = 06

Item 04

A long-chain hydrocarbon/alkene or alkylbenzene **✓Rm,** from petroleum is reacted **✓PC,** with concentrated sulphuric acid; **✓Rm,** in the plastic container **✓V** to produce benzene sulphonic acid; **✓PC**

Alkylbenzene + Conc. Sulphuric acid → Alkylbenzene sulphonic acid. ✓PC

The benzene sulphonic acid is reacted with concentrated sodium hydroxide; to form sodium salt; which is a detergent. **✓Cd/PC**

All Rm + V + PP + PC + Pr + Ch + Cd = P3 = 06 scores.

All Rm + any 3 = P2 = 05 scores.

All Rm + 1V = P1 = 04 scores.

No Rm = P0 = 00 scores.

Side effects of the process of production of detergents:

- Waste gases and chemical vapours, released during production can cause air pollution, **✓Di,** and hence breathing problems. **✓De,** This is mitigated by wearing protective gears like masks, eye goggles, face masks etc. **✓Dm**
- Fumes from waste gases **✓Di** when inhaled can cause respiratory disorders like irritation of lungs. **✓De,** This is mitigated by wearing masks. **✓Dm**
- Skin burns and irritation **✓Di,** when conc. acid and alkalis come into contact with the skin. **✓De** This can be mitigated by wearing laboratory coats, and gloves and laboratory boots. **✓Dm**

  (Any two)

2Di + 2De + 2Dm = S2 = 04 scores.

2De + 2Di + 2Dm = S2 = 04 scores.

2De + 2De = S1 = 03 scores.

2Di/2De/2Dm = S0 = 00 scores.

Item 05

Theme: Air is health.

Air is a renewable ✓**Ci**, natural resource since it can be replenished ✓**R**, by natural processes in a short period of time (in man's lifetime). Air is composed of nitrogen, ✓**Co** carbon dioxide, ✓**Co,** rare gases, ✓**Co** oxygen ✓**Co,** and water vapour, and other components like SO_2, etc. ✓**Co**

N2 = 06

Ci + R + Co = N2 = 06

Ci + R + 1Co = N1 = 04

Ci + R = N0 = 00

Ci + 1Co = N1 = 04

Human activities: impact, how it occurs and mitigation

- Oil extraction, and urbanisation; where extracted oil is burnt or used as a fuel in cars emitting fumes and waste gases like sulphur dioxide.
- Sulphur dioxide from exhaust fumes ✓**Mi,** forms acidic rain which destroys structures made of iron, cement. ✓**Me**
- Vehicle emissions: released dust due to unclean air ✓**Mi,** can lead to respiratory illness like asthma. ✓**Me** Mitigated by using alternative energy sources which promote clean environment like solar energy, hydro electricity etc**.** ✓**Mm**
- In limited air, oil burns to produce CO, ✓**Di** which is poisonous, can cause suffocation and death. ✓**Me** Mitigated by carrying out activities in well ventilated places to allow complete combustion. ✓**Mm**

Mi + Me + Mm = M2 = 04

Mi + Mm = M1 = 03

Mi/Me/Mm = M0 = 00

M2 = 06 (SO_2)

Benefit of the natural resource:

- Air contains oxygen which facilitates respiration ✓**Bi**. During respiration, carbohydrates combine with oxygen in order to release energy used for proper functioning of the body. ✓**Eb**
- Air contains carbon dioxide ✓**Bi,** which facilitates photosynthesis to form food that animals eat; carbon dioxide from air diffuses into leaves/plants, in presence of sunlight plants make food. ✓**Eb**

Bi + Eb = Be = 05

Bi/Eb = B0 = 00

N2 + M2 + Be = 06 + 04 + 05 = 15 scores

Item 06

Water is a renewable natural resource, ✓**Ci,** because it can be replenished ✓**R,** in man's lifetime by natural process through the water cycle in a short period of time.

Water is chemically composed of hydrogen ✓**Co,** and oxygen. ✓**Co**

N2 = 06

Ci + R + Co = N2 = 06

Ci + R + 1Co = N1 = 04

Ci + R = N0 = 00

Ci + 1Co = N1 = 04

Human activities such as dumping solid waste, sewage, agricultural activities, settlement and soil erosion has led to water pollution i.e.:

- Careless disposal of plastics in water bodies leads to blockage of light in water bodies ✓**Mi,** leading to the death of aquatic organisms. ✓**Dm,** This is mitigated by recycling solid wastes like plastics. ✓**Mm**
- Dumping of sewage and agricultural products like fertilizers in water bodies causes water pollution ✓**Mi,** by enriching water bodies with nutrients promoting algal blooms which reduce oxygen levels, hence aquatic organisms suffocate and die. ✓**Me**

This can be mitigated by treating sewage or waste water before being discharged into water bodies. ✓**mm**

Mi + Me + Mm = M2 = 04

Mi + Mm = M1 = 03

Mi/Mm/Me = M0 = 00

M2 = 04

Benefits of water as a natural resource:

- Water bodies are crucial in rain formation ✓**Bi**, water from bodies, evaporates into the air as water vapor, forms clouds through condensation, and falls as rain when clouds precipitate. ✓**Eb**
- Water bodies can be used to generate electricity; ✓**Bi,** flowing water has kinetic energy turning turbines, which drive generators to produce electricity energy. ✓**Eb**

Bi + Eb = Be = 05

Bi/Eb = B0 = 00

N2 + M2+ Be =06+ 05 + 04 + 05 = 15 scores

CHEMISTRY 2

Aim: To determine which of the antacid herbs Q and R is needed in smaller volume✓ **A** to neutralize the fixed volume of acid in order to know the most effective✓ **A**.

2**A** = 05 **scores**, 1**A** = 03 **scores**

Hypothesis: Antacid herb Q is needed in smaller volume✓ **H** compared to antacid R to neutralize the acid.

OR Antacid R is used in smaller volume✓ **H** compared to Q.

2**H** = 05 **scores**, 1**H** = 03 **scores**

Variables

- **Dependent Variable:** Volume of antacid Q and R✓ **DV** (BA_2 and BA_3)
- **Independent Variable:** Type of antacid herb used✓ **IV**
- **Controlled Variable:** Fixed volume of acid✓ **CV** (BA_1)

3**V** = 06 **scores**

Procedure:

(a) The burette was filled with BA_2 up to the 0.00 cm^3 mark.

(b) 25.0 cm^3 of BA_1 was measured using a pipette and transferred into a conical flask, then 2 drops of methyl orange indicator added ✓ **Pm**.

(c) BA_2 was added to the mixture in the conical flask using a burette in small amounts drop by drop, until the solution turns from pink to yellow✓ **Pm**. ie BA_1 in the conical flask was titrated with BA_2 until the end point was obtained. ✓ **Pr**

(d) The volume of BA_2 added was read and recorded from the burette (final burette reading was recorded). ✓ **Pc**

(e) The titration was repeated two more times to obtain consistent results. ✓ **Pc**

(f) The results were recorded in Table 1 below.

(g) The above procedures were repeated using BA_3✓ **Pc** from the burette.

(h) The results were recorded in Table 2.

Pm + **Pr** + **Pc** = 06scores

Risks and mitigations:

- Burns caused by acid spilling or skin contact✓ **R**.
- Mitigated by wearing gloves, closed shoes, and lab coats✓ **M**.
- Cuts due to broken glass apparatus✓ **R**
- mitigated by checking apparatus before use and wearing gloves and closed shoes✓**M**.

2**Rm** = 03 scores

Data presentation and recording:

Table 1

Volume of pipette used = 25.0 cm^3 ✓✓

Experiment number	**1**	**2**	**3**
Final burette reading (cm^3)	23.90	24.00	24.10
Initial burette reading (cm^3)	0.00	0.00	0.00
Volume of BA_2 used (cm^3)	23.90	24.00	24.10

Table 2

Experiment number	**1**	**2**	**3**
Final burette reading (cm^3)	13.70	13.80	13.90
Initial burette reading (cm^3)	0.00	0.00	0.00
Volume of BA_3 used (cm^3)	13.70	13.80	13.90

D = 05 scores

Dr = 05 scores

Data analysis

Volumes used calculate average volume for table 1 are; 23.90, 24.00, 24.10(cm^3)

Average volume =

$$\frac{23.90 + 24.00 + 24.10}{3} = \underline{24.00\ cm^3}$$ ✓ **Da**

The volume of BA_2 needed to neutralize the acid is <u>24.00 cm^3</u> ✓ **Da**.

Volumes used calculate average volume for table 2 are; 13.70, 13.80, 13.90 (cm^3)

Average Volume = $\frac{13.70 + 13.80 + 13.90}{3} = \underline{13.80\ cm^3}$ ✓ **Da**

The volume of BA_3 required to neutralize the acid is <u>13.80 cm^3</u> ✓ **Da**.

Data interpretation

Antacid herb BA_2 used a <u>higher volume of 24.00 cm^3</u> to neutralize a fixed volume of acid (25.0 cm^3) compared to antacid herb BA_3 which <u>required a smaller volume of 13.80 cm^3</u> to neutralize the same volume of acid. ✓ **I**

I = 03 scores

Da +I=I, 05+03= 08 scores

Conclusion and recommendation: ✓**Cr** 03

Since the volume of BA_3 required to neutralize the acid is less than volume of antacid BA_2, therefore antacid BA3 is the <u>most effective</u>✓ **Cr**, hence Juma should <u>use antacid herb R</u> (BA_3). ✓ **r**

Summary of Scores:

A = 05
H = 05
V = 06
P = 06
R = 03
I = 08
D = 05

Cr = 03

Total Score = **46**

CHEMISTRY 545/3

Aim: An experiment to determine which of the two solutions of sodium hydroxide Q and R neutralizes the acids with evolution of less amount of heat✓ **A** , when regular intervals of acid volumes are added ✓ **A** , **2**to a fixed volume of sodium hydroxide solution.

2**A** = 05 **scores**,

1**A** = 03 **scores**

Hypothesis: Sodium hydroxide solution Q produces less heat compared to R✓ **H** during the neutralization of acid when regular volume intervals of acid are added ✓ **H** , to fixed volume of sodium hydroxide.

2**H** = 05 **scores**, 1**H** = 03 **scores**

Variables:

- **Dependent Variables:** Temperature of the mixture✓ **DV**
- **Independent Variables:** Volume of acid added (GA_1)✓ **IV**
- **Controlled Variables:** Volume of sodium hydroxide solutions (GA_3 and GA_2)✓ **CV**

3**V** = 06 **scores**

Procedure:

(a) Initial temperature of GA_2 and GA_1 were measured using a thermometer, noted, and recorded as t_2 and t_1 respectively. ✓ **Pm**

(b) Burette was filled with acid(GA1) up to 0.00 mark.

(c) 25.0 cm^3 of GA_2 was measured using measuring cylinder and transferred into a plastic beaker. ✓ **Pm**

(d) Using a burette, acid was added to GA_2 in the beaker in intervals of 5 cm^3 ,10 , 15, 20, 25, 30 and 35cm^3. At each addition of acid, the mixture was stirred with thermometer and maximum temperature rise recorded✓ **Pm**.

(e) Procedures (a)–(d) were repeated using solution GA_3✓ **Pc**.

(f) The results were recorded in the table. ✓ **Pr**

Pm + **Pr** + **Pc** = 06 **scores**

Risks and mitigations:

- Burns caused by acid spilling or coming in contact with the skin since it's corrosive✓ **R**. Mitigated by wearing gloves, lab coats, closed shoes, preventing acid from coming in contact with the skin✓ **M**.
- Cuts due to broken glass apparatus. ✓ **R**
- Mitigated by wearing gloves and closed shoes✓ **M**.

2**Rm** = 03 scores

Results: Data presentation and recording

Volume of GA_2 and GA_3 used = 25.0 cm^3 Average

initial temperature $\frac{t_1+t_2}{2} = 24^{\circ}C$
Average initial temperature $\frac{t_1+t_3}{2} = 23^{\circ}C$

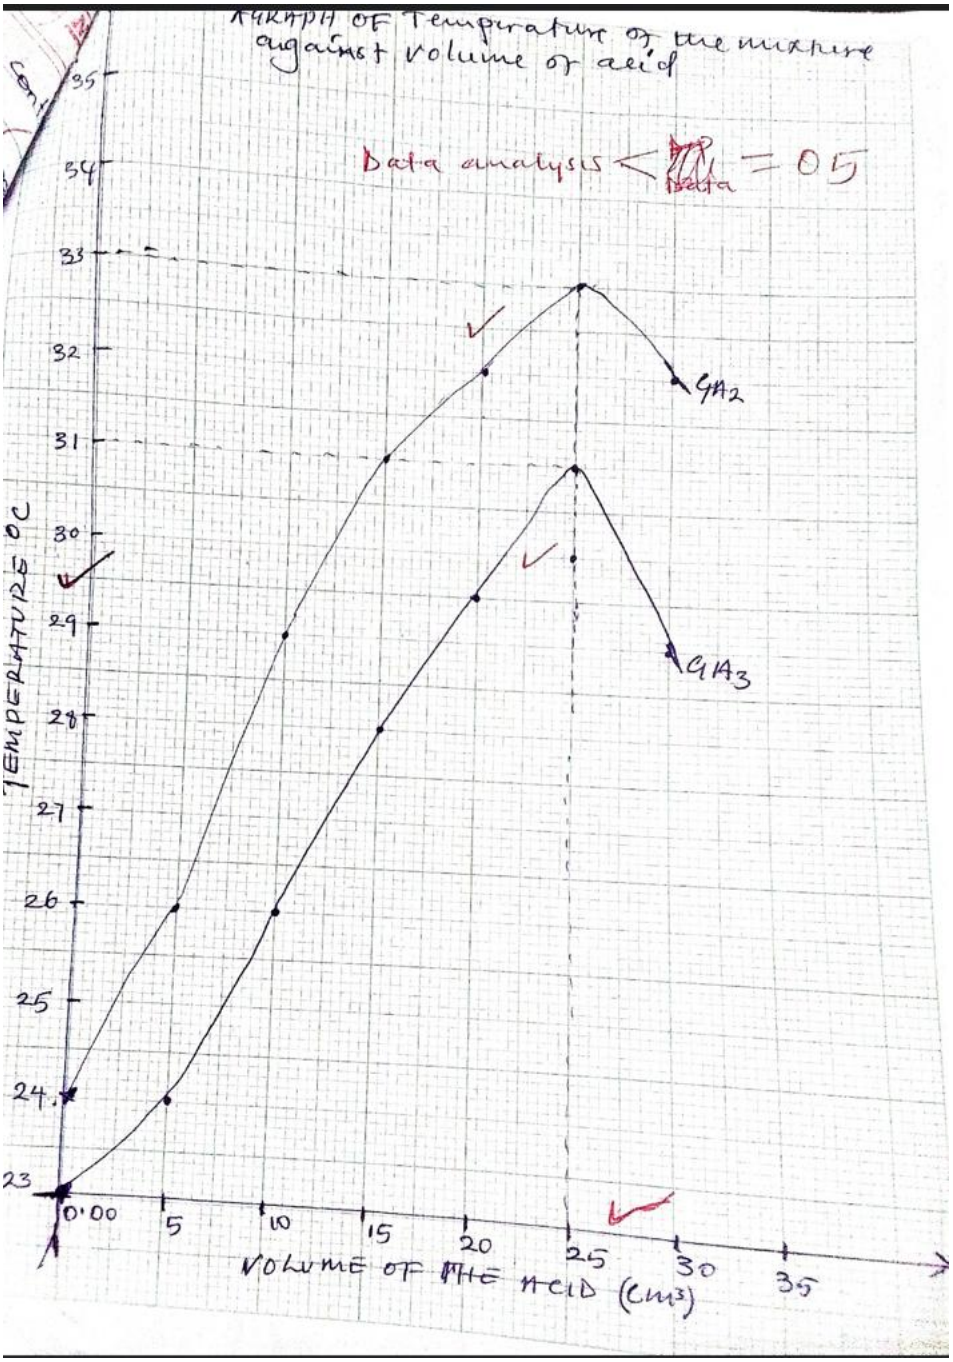

Volume of acid added (cm^3)	0.00	5.00	10.00	15.00	20.00	25.00	30.00
Temperature of mixture due to GA_2 (°C)	24.0	26.0	29.0	31.0	32.0	33.0	32.0
Temperature of mixture due to GA_3 (°C)	23.0	24.0	26.0	28.0	29.5	31.0	29.0

Data presentation: D, Units of (IV,CV,DV), Closed table. ✓✓ **D** = 05

Data recording: Dr → Number of datasets, Decimal places, Trend. ✓✓✓ **Dr** = 05

DATA ANALYSIS

Graph of Temperature of the mixture against volume of acid Data analysis (Plotting / Graph):

Calculations:

For GA_2 and GA_1:

Heat produced = $mc\theta$

$= (24 + 25) \times 4.2 \times \theta$

But $\theta = 33 - 24 = 9$

$= (24 + 25) \times 4.2 \times 9$ J

$= 49 \times 4.2 \times 9 = 1852.2$J

= -1.8522KJ ✓ Da

For GA_3 and GA_1:

Heat produced $= mc\theta$

$= (24 + 25) \times 4.2 \times \theta$

But $\theta = 31 - 23 = 8$

$= 49 \times 4.2 \times 8$ J

$= -1.65$ kJ✓ **Da**

Data Interpretation: **I** = 03scores

GA_2 neutralises GA_1 and heat produced is −1.8522kJ and GA_3 neutralises GA_1 to produce less heat of −1.65 kJ✓ **I**.

Da+I=I, 05+03=08 Scores

Conclusion: GA_3 neutralises GA_1 to produce less amount of heat✓ **Cr**.

Recommendation: I recommend GA_3 to be used since it is a suitable sodium hydroxide solution that neutralizes the acid to produce less amount of heat.✓ **r**.

KAYUNGA SECONDARY SCHOOLS EXAMINATIONS COMMITTEE (KASSEC)

Uganda certificate of education scoring guides for joint mock examination 2026

BIOLOGY

553/1,2,3

© *Kayunga Secondary Schools Examinations Committee (KASSEC)*

BIOLOGY 553/1

Section A

*(Respond to **all** items in this section in the spaces provided)*

Item 1

Mrs. Amina is a subsistence farmer in Kamuli District, who specializes in growing maize on the same piece of land, season after season.

Few weeks after planting, Mrs. Amina noticed that her maize plants had thin stems, leaves that appeared pale yellow and small in size. She also noticed slow growth of her plants. During the flowering period, insect pests ate and damaged most of the flowers of the plants. At the time of harvesting, Mrs. Amina received poor yields despite receiving enough rainfall throughout the season.

Task

(a) Describe how the affected plants processes contribute to functioning of the maize plant.

- Photosynthesis, manufacture of carbohydrates/food which provide energy and materials for growth.
- Respiration, releases energy from food for growth, absorption of minerals and other metabolic activities.
- Mineral absorption/nutrition, supplies mineral ions required for formation of chlorophyll, proteins, enzymes and other substances.
- Translocation, transports manufactured food from leaves to growing/storage regions.
- Transpiration, loss of water vapor from leaves creates a transpiration stream that assists movement of water/mineral salts.
- Growth, increases size and dry mass of the plant through cell division and enlargement.
- Reproduction/flowering, production of flowers enables pollination and subsequent seed formation.
- **5+Ue=6 marks**
- **3-4Ue=4 marks**
- **1-2Ue=2 marks**
- **Any UL= × 1mark**

(b) Suggest to Mrs. Amina how she can improve the yields of the said crop.

- Practice crop rotation, growing different crops in successive seasons can help reduce nutrient depletion and may break pest and disease cycles.
- Apply organic manure**,** Compost or well-decomposed manure adds nutrients and improves soil structure and water-holding capacity.
- Apply appropriate fertilizers**,** Fertilisers can replace specific mineral nutrients that have been depleted thus promoting growth of crops

- Control insect pests, She should monitor the crop and use appropriate pest-control methods so that flowers and other plant parts are protected.
- Use improved maize varieties, High-yielding or pest-resistant varieties can improve productivity where they are suited to the local conditions.
- Control weeds, Weeds compete with maize for water, mineral salts, light and space. Removing them reduces competition.
- Practice proper spacing, Correct spacing ensures adequate access to light, water and mineral nutrients and reduces unnecessary competition.
- Practice proper spacing, Correct spacing ensures adequate access to light, water and mineral nutrients and reduces unnecessary competition among crop plants hence improving yields.
- Carry out soil testing Soil testing helps determine which nutrients are deficient and therefore which fertiliser or soil amendment is appropriate.

5+Ae=6 marks

- **Ae=4 marks**

1-2 Ae=2 marks

Any AL= × 1mark

Item 2

Mr. Magala a 65-year-old is a retired police man who always complains of fatigue, has swollen feet, produces large volume of dilute urine frequently and always feels thirsty. He spends most of the day seated at home and enjoys reading newspapers while smoking cigarette though he cannot read without his eye glasses. He also does not miss a bottle of beer every evening.

One day as he was reading the newspaper under the mango tree in the compound, a snake fell from the tree branch above him onto his table. Mr. Magala threw away the papers and started running for his life

Task

a) Describe how Mr. Magala's response under the mango tree was brought about.

Light reflected from the snake/ stimulus enters Magala's eyes and stimulates photoreceptors in the retina. The receptors generates a nerve impulse, The impulse travels along the sensory neuron towards the central nervous system/brain, The brain receives and interprets the information as a potentially dangerous snake and, sends impulses along motor neurons to appropriate skeletal muscles, The motor impulses cause the relevant muscles to contract in a coordinated manner, causing Magala to throw away his papers and run away from the snake.

- **4+Ue=6 marks**
- **3Ue=4 marks**
- **1-2Ue=2 marks**

- **Any UL= × 1mark**

b) Advise Mr. Magala on how he can improve his health

- Stop smoking, this reduces continued exposure of his respiratory system to harmful chemicals and lowers the risk of smoking-related disease.
- Reduce/stop alcohol consumption, this reduces the risk of alcohol-related damage to the liver and other organs.
- Exercise regularly. Appropriate physical activity improves cardiovascular fitness, muscle strength and general health.
- Eat a balanced diet, a balanced diet supplies carbohydrates, proteins, fats, vitamins, minerals, fiber and adequate water required for normal body functioning and improves body immunity.
- Attend regular medical check-ups, Regular assessment is particularly important because of his age and the investigations can help in early identification of the disease and early treatment of symptoms.
- Seek medical examination, to determine the possible cause of excessive thirst, frequent production of large quantities of dilute urine, swelling of the feet requires professional assessment rather than self-treatment.
- Have his eyes examined, an eye examination can determine the cause of his difficulty reading and establish whether spectacles or other treatment are appropriate.

5+Ae=6 marks

- **Ae=4 marks**

1-3 Ae=2 marks

Any AL= × 1mark

Item 3.

Maria, a 25-year-old woman from kabale got married to a healthy young man from Kampala. After giving birth to a baby boy, they noticed he had white hair, white eyes, very light skin and easily got skin burns whenever exposed to direct sunlight. The couple became so scared because none of them showed such signs. They took the boy to the hospital, where the doctor told them that the boy's condition was hereditary. The couple also wanted to understand the risk for future children.

Task:

a) Using genetic diagrams, explain how this condition may have been inherited by the baby.

The he hereditary condition is albinism, an autosomal recessive condition.

Let:

A = allele for normal skin pigmentation

a = allele for albinism

Since both parents appear normal but have an affected child, both parents can be treated as carriers.

Parents

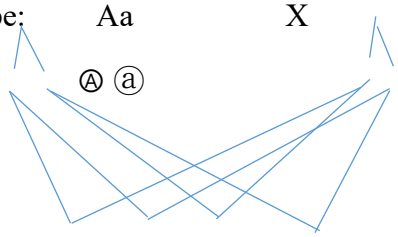

Parent's phenotype: carrier father X carrier Mother

Parent's genotype: Aa X Aa

Gametes: Ⓐ ⓐ Ⓐⓐ

Random

Fertilization:

Genotypes: 1 AA 2 Aa Aa 1aa

Phenotypes: 3 normal, 1 albino/affected

Therefore, the probability that a child will have albinism is: 1/4 = 25%

NB: Also mark the punnet square method

- **5+Ue=6 marks**
- **3-4Ue=4 marks**
- **1-2Ue=2 marks**
- **Any UL= × 1mark**

(c) What advice would you give to the couple to manage the boy and prevent complications in the family?

- Protect the skin from sunlight, due to reduced melanin Use of appropriate sunscreen helps reduce ultraviolet radiation reaching the skin.
- The child can wear protective clothing, such as Long-sleeved shirt and pair of long trousers to reduce direct exposure of the skin to sunlight.
- The boy can put on a wide-brimmed hat to protect exposed areas such as the face and neck.
- The boy should avoid prolonged strong sunlight, especially around times when sunlight is intense to reduce ultraviolet radiation reaching the skin.
- The boy can Use prescribed visual aids, Spectacles or other visual aids may improve vision where required, since Albinism is associated with visual problems
- Regular medical/skin assessment, this helps identify and manage skin complications early.
- Genetic counselling, the parents can receive information about inheritance and the probability of the condition occurring in future children.

SECTION B

Part 1

(Respond to only **one** *item from this part)*

Responses should be written in the answer booklets(s) provided

Item 4.

Namatala swamp is an important wetland in Mbale region. The fresh water and vegetation in the swamp favors interaction between living organisms and also local residents use the wetland's resources.

Large part of the swamp has been reclaimed for brick making, settlements and rice growing by local residents. Within two years, farmer's and residents started reporting low crop yield, more insect pests, fewer fish in nearby steams, some bird species are no longer present in the swamp and frequent flooding after heavy rains

Task

a) Explain how the local residents' actions resulted into the different environmental challenges as indicated in the scenario

- Establishment of settlements and rice growing by local residents caused habitat destruction, when natural wetland vegetation is removed for settlement or agriculture, organisms lose their feeding, breeding and sheltering habitats.
- Brick making, and establishment of settlements removed vegetation from wetland leading to frequent flooding after heavy rains, when the vegetation is removed, the ability of the area to retain excess water is reduced. More water flows rapidly away as surface runoff, increasing flooding after heavy rains.
- Brick making, establishment of settlements and rice growing by local residents led to fewer fish in in nearby steams, because destruction of the habitats for aquatic organisms reduces suitable places for fish to feed, breed, reproduce and survive, contributing to declining fish populations.
- Brick making, and establishment of settlements led to disappearance of bird from the swamp because Birds depend on wetland plants and animals for food, nesting and shelter, when these habitats are destroyed, some bird species may migrate away or their populations may decline.
- Rice growing by local residents and establishment of settlements increased insect pests because Changes in vegetation and food webs can disturb natural predator-prey relationships. The reduction of organisms that naturally prey on certain pests can contribute to increased pest populations.
- Rice growing by local residents and establishment of settlements increased insect pests which damaged the crops leading to low yields also flooding reduced soil fertility hence low yields

4+Ue=6 marks

3Ue=4 marks

1-2Ue=2 marks

Any UL= × 1mark, The learner must learner explain how he human activities caused environment challenges in the scenario

b) Sensitive the local residents about the importance of conserving such an area described in the scenario

- Flood control, Wetlands can store excess water during heavy rainfall, helping reduce flooding.
- Habitat for organisms, Wetlands provide habitats for fish, birds, insects, plants and other organisms.
- Biodiversity conservation, conserving wetlands protects many different species and their interactions.
- Water purification, Wetland vegetation and soils can trap sediments and absorb some pollutants, helping improve water quality.
- Fish production, Wetlands provide breeding and feeding areas for fish and other aquatic organisms.
- Support livelihoods, Communities may obtain useful resources from wetlands, provided they are harvested sustainably.
- Soil and erosion control, Vegetation helps bind soil and reduce erosion.
- Ecological balance, Wetlands support food chains and interactions among organisms.
- Climate/environmental regulation, Wetlands contribute to environmental regulation and storage of carbon.
- Sustainable use, Residents should be encouraged to use wetland resources without destroying the ecosystem.

Item 5

Kidepo national park is one of the largest parks in Uganda with great biodiversity. Residents near the park depend on food, wood fuel from the park and graze their cattle illegally inside the park

Managers of Kidepo national park have observed increasing human activities within the park. To assess the impact on wildlife, park rangers counted selected animal species likely to be affected by human activities in the same grassland area over four years

Table1: population of selected animals

Year	Uganda Kob	Buffalo	Lions	hyenas
2022	1250	820	65	48

2023	**1120**	**760**	**61**	**46**
2024	**940**	**650**	**53**	**42**
2025	**760**	**520**	**44**	**37**

The wild animal populations live naturally in the park and there is no emigration or immigrations takes place

Data from the district veterinary officer's report indicates increased cases of lion attack on domestic animals, ticks, Tsetse flies and nagana disease, among the livestock near the park areas

Task

a) Explain the observations from

i) The Park managers

- All four populations declined throughout the four-year period, this decline is due to increasing illegal grazing and obtaining resources from the park which: destroy or reduce habitats , reduce food availability, increase competition for resources, increase human-wildlife conflict.

ii) Veterinary

- When natural prey becomes less abundant, lions may move closer to human settlements and livestock in search of food, this increases human-wildlife conflict.
- Wild animals carry ticks and act as reservoir for tick borne diseases, these ticks can easily infest domestic animals since they share grazing grounds with wild animals such as Buffalos, antelopes,
- Tsetse flies are important vectors of trypanosomes, which cause trypanosomiasis/nagana in livestock.
- Areas in the park have tall grasses, forests and wetland vegetation which are suitable habitats for the Tsetse flies, his increases Tsetse flies attack to domestic animals in areas around the Park

  4+Ue=6 marks

  3Ue=4 marks

  1-2Ue=2 marks

  Any UL= × 1mark

b) Explain measures the residents should take to reduce on challenges reported by the veterinary officer.

1. Farmers can regularly inspect animals and use appropriate tick-control measures such as acarricide spraying that kill ticks
2. Control tsetse flies, appropriate vector-control measures can reduce contact between livestock and tsetse flies.

3. Avoid grazing inside the park to reduce contact between livestock and wildlife and can contribute to disease transmission and habitat pressure.
4. Practice controlled grazing by Keeping livestock in designated grazing areas reduces contact with wildlife.
5. Construct secure kraals where Livestock can be kept in secure enclosures, particularly at night, to reduce attacks by predators.
6. Seek veterinary treatment, Sick animals should be examined and treated promptly to reduce spread on Nagana and tick borne diseases among the live stock
7. Residents should report repeated predator/lion attacks to wildlife authorities rather than killing wildlife themselves.
8. Use alternative sources of wood fuel such as solar energy, bio gas to Reduce dependence on park resources reduces pressure on the protected ecosystem.

1-2Ae=2 marks
Any AL= × 1mark

Part ii

(Respond to only **one** *item from this part)*

Responses should be written in the answer booklets(s) provided

Item 6.

Mukono town is one the rapidly developing townships where the demand for construction materials is too high.

A report from mukona district hospital indicated that many workers from a newly established stone quarry owned by Chinese Construction Company experienced persistent cough, shortness of breath, poor appetite for food, weight loss and passing out small volumes of dark-colored urine after long hours of work. Workers in the stone quarry work in dusty conditions, rarely drink water and often skip meals due to the tight work schedule

Task

(a)

(i) Explain the cause of the health complications of the workers

- Persistent cough is due to inhalation of large quantities of dust Fine particles that can enter the respiratory tract and reach deep into the lungs causing irritation in the lung issues/wind pipe/air sacs hence cough

- Shortness of breath are due to inhalation of large quantities of dust Fine particles causes damage respiratory tissues/ alveolar lining and interfere with normal gaseous exchange.
- Producing smaller volume of more concentrated urine is due to inadequate water intake, when the body is dehydrated, the kidneys conserve water by reabsorbing much water in the nephron thereby producing a smaller volume of more concentrated darker urine
- Poor appetite, weakness and weight loss is because Workers skip meals which reduces intake of nutrients such as carbohydrates required for energy, proteins to build the body , vitamins and ions that can improve appetite and immunity
- **4+Ue=6 marks**
- **3Ue=4 marks**
- **1-2Ue=2 marks**
- **Any UL= × 1mark**

(ii) Suggest what can be done to improve health of the workers

- Works should drink adequate water to maintain water balance and normal kidney function.
- Workers should eat regular balanced meals/diet such as foods containing carbohydrates required for energy, proteins to build the body, vitamins and ions that can improve appetite and immunity
- Reduce exposure to Dust should b reducing number of working hours of reduce on amount of dust inhaled per day
- Wear respiratory protective masks/respirators to reduce inhalation of harmful dust.

(b) Explain to the Chinese company manager the measures he can adopt to improve working conditions at the site

- Provide Workers with respiratory protective equipment equipment/musk to reduce inhalation of dust.
- Suppress dust by regularly spraying Water to reduce airborne dust during quarry operations.
- Provide Workers with adequate safe drinking water this can increase easy access to safe drinking water hence preventing dehydration
- Provide meal breaks or Workers to have sufficient time to eat rather than routinely skipping meals.
- Improve ventilation Good ventilation to reduce accumulation of airborne contaminants in enclosed areas of the quarry
- Conduct regular occupational health screening, Workers should undergo appropriate health assessments to identify problems early.
- Sensitize workers about the hazards of dust exposure and how to protect themselves against dust
- Provide first aid and emergency procedures for dealing with emergencies such as accidents, abrupt illnesses
- **9+Ae=6 marks**
- **5-8-Ae=4 marks**

- **1-4Ae=2 marks**
- **Any AL= × 1mark**

Item 7.

Having been part of a local gang for two years where members smoke, drink alcohol and enjoy street food (kikomando) levy, developed dry cough and serious chest pain, severer stomach pain and constant tiredness, he got hospitalized after coughing blood. The doctor asked him if has been using drugs, which he utterly denied, and so the doctor put him on serious medication. In the course of the treatment, it was also discovered that levy's blood could no longer load enough oxygen, a reason why he was always very weak.

Task

a) Explain clearly how the health complications experienced by levy are as a result of his life style.

- Dry cough and serious chest pain was caused by Cigarette smoking, smoke contains harmful substances that can damage the lining of the respiratory tract and lung tissue resulting into persistent dry cough and serious chest pain
- Tiredness and weakness is due to impaired gaseous exchange, harmful substances in cigarette smoke damage lung tissue/alveolar lining thereby reducing the diffusion of oxygen into blood. If less oxygen enters the blood, less oxygen is transported to body tissues to produce energy/ ATP
- Tiredness and weakness is due to impaired transportation of oxygen in blood, carbonomonoxied in cigarette smoke inhibits binding of hemoglobin with oxygen in blood, less oxygen is transported to body tissues to produce energy/ ATP
- Long-term smoking increases the risk of serious respiratory diseases as lung cancer which might have led o coughing blood.
    - Digestive problems and abdominal pain was due to Regular excessive alcohol consumption damaged the liver and irritate the digestive system leading to poor nutrients uptake.

    - Constant tiredness may be due to consumption of street-food diet is low in nutrients content the body obtains less nutrients/carbohydrates required for energy production in the body .

4+Ue=6 marks

3Ue=4 marks

1-2Ue=2 marks

Any UL= × 1mark

b) How can levy improve his health conditions besides the medical treatment

- Stop smoking.This prevents continued exposure to harmful substances in cigarette smoke to prevent dry cough and chest pain
- Stop/reduce alcohol consumption.This reduces further damage to the liver and other organs to prevent stomach pain
- Eat a balanced diet to obtain adequate carbohydrates, proteins, fats, vitamins, minerals, fibre and water to improve energy production in the body.
- Eat more protective foods, Fruits and vegetables provide vitamins, minerals and other nutrients needed for normal body functioning to improve body immunity.
- Avoid unhealthy street foods. He should eat safer, nutritionally balanced meals and maintain food hygiene.
- Get adequate rest to supports recovery and general wellbeing.
- Follow medical advice, Lifestyle changes should complement, not replace, prescribed medical treatment.
- Attend follow-up appointments to determine whether his condition is improving. Or not

Item 1

A mango juice processing company in Soroti called TEJU wants to concentrate mango juice without losing important nutrients as well as maintain the quality of the juice. The company chemist removes excess water from the juice thereby remaining with highly concentrated juice but the current method of concentrating the juice is slow and expensive.

The company chemist has been advised to remove excess water from the juice using a highly concentrated solution and an artificial selectively permeable membrane

Water molecules move from a region of their high concentration to a region of low concentration across a selectively permeable membrane.

You are provided with specimen **T** which is an artificial selectively permeable membrane, solutions **A** and **B** which are of different concentrations.

Task

Design and carry out a scientific investigation using specimen T to determine which of the solutions A and B provides the most suitable concentration for the removal of water from the juice and give appropriate recommendation to the company chemist.

Your investigation should include the: aim, hypothesis, variables, materials, procedure, results, analysis and recommendation

Aim,

A scientific investigation/An experiment to determine which of solutions A and B is more suitable/provides the most suitable concentration for removing water from mango juice using a selectively permeable membrane in order to give appropriate recommendation to the company chemist./ In order to recommend it to the company chemist

ACCEPT:

An experiment to determine which of solutions A and B causes greater movement of water out of the mango juice/simulated juice across/ through a selectively permeable membrane to help give appropriate recommendation to the company chemist.

Aim with a correct reason=2 scores

Aim without a reason=1 score

reject: An experiment to determine the effect of.....

Hypothesis; solution **B** removes more/much water from the mango juice than solution A because it has a higher solute concentration/a lower water potential/ hypertonic or more concentrated

Or

Solution **B** is more effective than solution **A** in removing water from the mango juice because it has a higher solute concentration/a lower water potential.

Accept a correctly stated negative/null hypothesis

Hypothesis/prediction with a reason=2 scores

Hypothesis/ prediction without a reason=1 score

Variables; Independent variable; Type/concentration of external solutions A and B/ solutions A and B.

Dependent variable; Change in volume of distilled water in the beaker, change in volume of solution A and B

Controlled variables; Volume of solution **A** and **B** used, Size/length/surface area of Visking tubing, time/Duration

Award where the learner correctly identifies the independent and dependent variables.

Score			

Procedures;

9. Obtained two Visking tubing/specimen T each of 10 cm/equal lengths using a ruler to measure the length and a razor blade/knife to cut
10. Soaked each of the two Visking tubing/specimen **T** in cold water to open them
11. Labeled two beakers/ measuring cylinder/boiling tubes A and B or 1 and 2 using masking tape/paper
12. Measured 20cm3 of distilled water using a measuring cylinder/beaker/ and added it into each of the two beakers/ measuring cylinders/ boiling tubes A and B/1 and 2 respectively
13. Tied one end of the Visking tubing/specimen T securely using thread to prevent an leakage of the solution
14. Measured 5/10cm3 of solution A using a measuring cylinder/beaker/ and added it into a Visking tubing specimen T with one end tied, carefully tie the open end of the Visking tubing/specimen T using a thread
15. Immersed the Visking tubing/specimen **T** completely in distilled water in beaker/measuring cylinder/boiling tube **A/1.**
16. Repeated procedures (5), (6) and (7) using solution B and beaker/ measuring cylinder/boiling tube B/2
17. Started the stop clock and left the experiment/set-up to stand for 30 minutes.
18. After 30 minutes, measured and recorded changes in the volumes of water in the beakers/ measuring cylinder/boiling tubes A and B or 1 and 2

Results, analysis and conclusion

Table of Results;

Beaker/measuring cylinder, boiling tube	**Volume of solution in the Visking tubing/specimen T (cm^3)**	**Initial Volume of distilled water in the beaker/measuring /cylinder/boiling tube (cm^3)**	**Final Volume of distilled water in the beaker/measuring cylinder, boiling tube (cm^3)**	**Changes in Volume of distilled water in the beaker/measuring cylinder, boiling tube. (cm^3)**
A	10 or 5	20 or 10	20 or 10	0 or 0 or
B	10 5	20 10	17^{+}-1 7^{+}-1	3^{+}-1 3^{+}-1

Analysis/observation; Volume of water in beaker/measuring cylinder, boiling tube B/2 reduces and Volume of water in beaker/measuring cylinder, boiling tube A/1 remains the same after 30 minutes

Conclusion; Solution **B** is more suitable for removing water from the mango juice than solution **A**, because its higher solute concentration creates a greater water-potential gradient for movement of water across the selectively permeable membrane.

Conclusion with reason = @2 scores

Conclusion without reason=1 score

Correct Analysis/observation = @2 scores

Data processed correctly=@1 score

Data recorded correctly=@1 score

For Scorer's Use Only

Basis code	D_1	DP_2	C_2
Score			

Explanation; Solution B has a higher solute concentration/a lower water potential/hypertonic to distilled water. Therefore, water molecules move through the

selectively permeable Visking tubing/specimen T from the region of higher water potential/hypotonic solution/distilled water. to the region of lower water potential/hypertonic solution. Therefore, solution B provides a greater driving force for removal of water.

Or

Solution B is more concentrated/ hypertonic to distilled water, hence water entered the solution by osmosis from the beaker across specimen T/ Visking tube leading to decrease in volume of distilled water in the beaker

Recommendations; the company chemist use Solution B for removing water from the mango juice because its higher solute concentration creates a greater water-potential gradient for movement of water across the selectively permeable membrane.

Item 2

The school biology club conducts field studies every year in different places such as national parks, museums, and forests.

A group of students visited a local **museum** and noticed some interesting animal remains. The remains were categorized as **specimens,** belonging to different animals and each specimen had unique features. The museum guide explained that these remains have adaptations that allowed the animals to carry out specific functions within the environment they lived in. The students did not understand how these structures are helpful to the animals from which they were obtained.

To fully understand the role of the remains in animals, specimens K and L were collected from the museum. Carefully study them and use your biological understanding to answer the questions below:

Task

a) i With reason(s), identify the specimens K and L

K – Thoracic vertebra because it has: long neural spine projecting backwards, undivided transverse process

L – femur bone because it has: elongated shaft, round head, rough projections/trochanter near the head, patella groove, condyles, popliteal surface

Accept: proximal and distal epiphyses, smooth articular surfaces;

Identification with reason = 2 scores

Identification only=1 score

For Scorer's Use Only

Basis code	I_2
Score	

ii) Describe how the features on specimen L enable it to perform its function

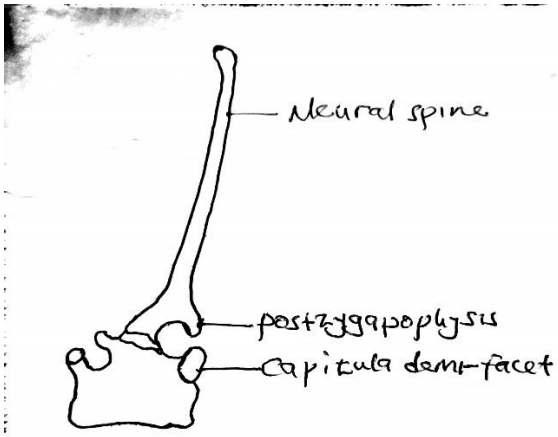

- Has trochanter for attachment of leg muscles
- Has condyles at the distal end for articulation with patella
- Has popliteal surface for articulation with tibia
- Has round head which fits into the acetabulum of the pelvic girdle
- Has elongated/longer shaft to provide large surface area or attachment of high muscles
- Has patella groove for articulation with patella/ into which the patella fits

Item 1

Item 1

In **one of the Secondary Schools** at the beginning of Term II, the school administration became concerned after receiving learners from the previous holidays showing signs and symptoms of malnutrition such as wasted muscles, poor growth, bleeding gums, tiredness and weight loss.

The school administration invited the District Nutrition Officer for guidance on how to manage the situation. After assessing the learners, the nutritionist advised the head teacher to include a new food category **D** on the school feeding menu.

The school administration accepted the nutritionist's recommendation and tasked the Senior Four Biology students to investigate the nutrient content of the recommended new food category.

You are provided with solution **D** which is a sample of the new food category that contains different nutrients

Task

Design and carry out a scientific investigation to determine the nutrient content in solution **D** and make appropriate recommendations to enable the school administration improve the diet of students

a) Aim, hypothesis, variables

Aim, investigation/ experiment to determine the nutrient content/nutrients/ nutrient composition in solution **D** to make appropriate recommendations to the school administration to enable them improve the diet of students

Or

An experiment to determine/investigate the nutrient content/nutrient// nutrient composition in solution **D** to make appropriate recommendations the school administration to enable them improve the diet of students

Aim with a correct reason=2scores

Aim without a reason=1score

Hypothesis, Solution **D** contains carbohydrates and vitamin C, proteins, and fats because they are components of a balanced diet/ they are required for good health.

Or

Solution D does not contains carbohydrates and vitamin C, proteins, and fats because they are components of a balanced diet/ they are required for good health.

Conclusion with reason = @2scores

Conclusion without reason=1score

Correct Analysis/observation = @2scores

Data processed correctly=@1score

Data recorded correctly=@1score

d) **Explanation/interpretation**

- Solution D/ new food is rich in Carbohydrates that can be broken down/metabolized to provide energy which helps to reduce tiredness
- Solution D/ new food lacks Vitamin C which helps in healing /prevent bleeding gums (scurvy) and boosts immunity.
- Solution D/ new food is low in protein, so it will not correct the wasted muscles/poor growth

Recommendations to the school management

The school can give Solution D/ new food category to students but Supplement it with protein and lipid/fat-rich foods (beans, groundnuts, fish, eggs, milk, and meat) on the menu to prevent symptoms of malnutrition among students

Item 2

Fruits are part of the daily menu in most restaurants this makes the fruits to be on high demand throughout the year.

Mr. Makona, a fruit farmer in mubende district has made observations on his farm; some plants produce many flowers while others produce very few, plants that produce many flowers also produce many fruits. In addition, some harvested fruits contain many healthy seeds whereas others have few or no seeds.

The farmer seeks assistance from your school Biology laboratory to understand the relationship between the structure of flowers and fruits and how these structures influence fruit and seed production.

To explain to the farmer specimens **A** and **C** were collected from **Mr. Makona's** farm and used to illustrate to him how flower structure relates to fruit and seed production.

Task

You have been provided with Specimens **A** and **C** Specimens. **S**tudy the specimens carefully and answer the questions that follow.

a) i) Observe specimen C and identify the parts involved in Process of fertilization

Consider only those parts/features observable with naked eyes

- Stigma
- Style

Question 1

(a) Apparent depth of a pool

(a) Apparent depth of a pool

Scoring Point	Notes	Score
This is due to refraction of light as it travels from the bottom of water into air.	Working diagram shown above: O = real depth, I = apparent depth.	
Light rays travel from the bottom of the water.		
The rays are refracted (bent) away from the normal at the boundary of the water–air surface.		
Rays then travel straight to the student's eye.		
The student's eye receives the rays as if originating from a raised surface I.		
So the pool appeared shallower than its real depth.	Any two correctly labelled parts ✓ (Ex) Correct working diagram ✓ (Ex)	Ex ✓1

(b) Reverberation

Scoring Point	Notes	Score
The effect was reverberation.	AP ✓	
Th Scoring Point	**Notes**	**Score**
Reverberation when controlled makes sound more audible in concert halls.	AP ✓	
Reverberation when designed very low is applied in recording studios, so that the room does not colour the recorded audio	AP ✓	
Reverberation makes sound more audible in large churches.	(additional example — any two required)	AP ✓2

(c) The echo method — depth of a pit and workers' pay

The echo method is to be used. Let the depth of the pit be d.

$$2d = vt, \qquad v = 320 \text{ m s}^{-1}, \quad t = 0.125 \text{ s}$$
$$d = \frac{320 \times 0.125}{2} \quad AH\checkmark$$
$$= 20 \text{ m} \quad AH\checkmark$$

$$2 \text{ m} \Rightarrow 10{,}000/-$$
$$20 \text{ m} \Rightarrow \frac{10{,}000 \times 20}{2} \quad AH\checkmark$$
$$\Rightarrow 100{,}000/- \quad AH\checkmark$$

The workers have to be paid 100,000/–. AH ✓
The workers are right to demand 100,000/–. AH ✓

Question 2

(a) Production of X-rays in an X-ray tube

The radiations are X-rays, produced in an X-ray tube.

Scoring Point	Notes	Score
When the switch is closed, current from the low voltage supply heats the cathode filament.		
The hot cathode filament emits electrons thermionically.	Working diagram ✓ (Ex)	
The emitted electrons are focused by the concave focusing cup into a narrow beam towards the	Any 5 labelled parts correctly ✓	
The anode is connected to the extra high tension voltage (EHT), which accelerates the		
At the anode, electrons hit/strike the tungsten metal target embedded in the anode.		
A small percentage of the kinetic energy of the electrons is converted to X-rays, and the rest to heat		
X-rays are allowed through the mica window.		
The heat is quickly carried away by the anode and it is cooled by the cooling fins.		
The lead shield absorbs any stray X-rays.		Ex ✓3
Scoring Point	Notes	Score
The quality/kind of X-rays is controlled by the accelerating extra high tension (EHT)		
X-rays of less penetrating power are soft and are produced by low accelerating voltage.	✓ (Ex)	

Scoring Point	Notes	Score
X-rays of high penetrating power are hard and produced by accelerating electrons through a high accelerating voltage.		
X-rays of low penetrating power are to be used to take a picture of a suspected broken bone.	✓ (Ex)	
These X-rays can pass through fresh but are absorbed by bones; the shadow photograph of the bone is obtained on the photographic plate.	✓ (Ex)	
The quality/kind of X-rays that cannot be used on the boy are hard X-rays (high penetrating power).		
Hard X-rays are used in industry to detect cracks in industrial metals. Hard X-rays are used at the airport to check luggages of passengers for prohibited items	~~Any two ✓ (AP)~~	
Used in hospitals to destroy cancer cells.		
Used by researchers to analyse organic molecules to find the interatomic spacing and arrangement of atoms.		AP ✓4

(b) Radioactive decay — minimum time in isolation

The liquid is a radioactive material with half-life of 37.5 counts per second.

Using the flow method: 600 ⟶ 300 ⟶ 150 ⟶ 75 ⟶ 37.5 AH ✓

$\frac{N_0}{N_t} = (2)^{t/t_{1/2}}$, $N_0 = 600$, $N_t = 37.5$, $t_{1/2} = 3$ days, $t = ?$

$37.5 = (2)^{t/3}$ AH

✓ $16 = (2)^{t/3}$

$2^4 = 2^{t/3} \Rightarrow 4 = t/3$

$t = 4 \times 3$ AH ✓

$= 12$ days AH ✓

Number of $t_{1/2} = 4$; time, t, taken $= 4 \times t_{1/2} = 4 \times 3 = 12$ days. AH ✓

The minimum time the father of the boy would take in the isolation room is 12 days. AH ✓

The AP row of table SA3 was left blank (unfilled) in the original scan.

Question 4

(a) Thermal expansion of metallic fire-station doors

Scoring Point	Notes	Score
The behaviour of the metallic doors is due to expansion and contraction of solids.	✓ (Ex)	
When a substance is heated, its atoms/molecules gain more energy and vibrate more.		
This causes the atoms/molecules to move apart and the spaces between them increase. This makes the volume increase, hence expand.	✓ (Ex)	
When heat is withdrawn from a substance, its particles lose energy and vibrate less.	✓ (Ex)	
This reduces the space between them, hence contract.		
When temperatures are high during the day, the metallic doors gain heat and their particles increase their vibration. This pushes the particles apart and the space between them increases, resulting in (slight)	✓ (Ex)	
The slight increase in length makes the doors harder to fit in the frames.		
When temperatures are low in the evening, the metallic doors lose energy and the kinetic energy of the particles reduces.	✓ (Ex)	
The vibration of particles reduces, making the space between particles reduce, hence contract. This makes the doors easier to fit in the frames.	✓ (Ex)	Ex ✓8

(b) Applications of expansion in construction

Scoring Point	Notes	Score
The behaviour of the doors during the day is		
Construction of railway lines: gaps are left between successive lengths of the rail, joints are overlapping i allowed.	✓ (AP) ✓ (AP)	
Metallic girders on house roofs: one end is fixed while the other end rests on rollers.	✓ (AP) (or: construction	
Construction of pavements using slabs: gaps are left between successive slabs and filled with pitch.		AP ✓9

(c) Distance, fuel, and journey feasibility

Distance = Area under the (velocity–time) curve and the horizontal axis: AH ✓

$$\text{Distance} = \frac{1}{2} \times 40 \times 0.2 + (40 \times 1.5) + (40 \times 0.1) + \frac{1}{2} \times 20 \times 0.1 + \frac{1}{2} \times 60 \times 0.2$$

$$= 4 + 60 + 4 + 1 + 6$$

$$= 75 \text{ km} \quad \text{AH} \checkmark$$

[8]Read as "Ex = 8" in the scan; the figure is partially cut off.

[9]Score partially legible in the scan; two qualifying applications are ticked.

Fuel consumed on the forward journey:

$$2 \text{ litres} \Rightarrow 15 \text{ km}$$

$$75 \text{ km} \Rightarrow \frac{2 \times 75}{\quad} \quad \text{AH} \checkmark$$

$$\Rightarrow 10 \text{ litres}$$

Fuel remaining:

$$= 16 - 10 \quad \text{AH}$$
$$\checkmark \quad = \quad 6 \quad \text{litres}$$
$$\text{AH} \checkmark$$

The forward journey took 10 litres. The return journey is expected to also take 10 litres. The remaining 6 litres is not enough. AH ✓

Question 5

(a) Nose bleeding at altitude & the simple barometer

Scoring Point	Notes	Score
They may nosebleed due to reduction in atmospheric pressure.	✓ (Ex)	
Pressure in fluids (air) depends on depth.		
Pressure is high at the bottom of the mountain because the depth of air is high, and pressure decreases as one climbs higher because the depth of air decreases	✓ (Ex)	
After climbing a certain height, the depth of air decreases and atmospheric pressure	✓ (Ex)	
The blood pressure remains constant and, at the bottom of the mountain, it balances the atmospheric pressure		
At the height above the bottom, the resulting blood pressure may make the weak blood vessels in the nose burst, leading to nose-bleeding	✓ (Ex) ✓ (Ex)	Ex ✓10

The instrument is a simple barometer. AP ✓

The instrument is a simple barometer. *AP*✓

Scoring Point	Notes	Score
A long thin-walled glass tube, sealed at one end, is filled with mercury using a funnel.	Any two correctly labelled parts ✓	
The tube is inverted several times, with a finger over the open end, to remove any air trapped in the	✓ (AP)	
The dish is half filled with mercury.	✓ (AP)	
The open end of the tube is closed by a finger, and the tube is inverted into the mercury in the dish.		
The finger is removed and mercury falls until the height, h, becomes constant.	✓ (AP)	

The height, h, at a particular point, is the atmospheric pressure in height of mercury at that point. Height h is measured by a tape measure	Correct working diagram ✓ (AP)	AP ✓11

b) Ice-pellet calorimetry

Let mass of ice pellets to be added be m.

Heat gained by ice (from $-10^{\circ}C$ to $40^{\circ}C$) = Heat lost by water (from $90^{\circ}C$ to $40^{\circ}C$) AH ✓ AH ✓

$$(m \times 2100 \times 10) + (m \times 336{,}000) + (m \times 4200 \times 40) = (5 \times 4200 \times 50)$$

AH

✓ $m(21{,}000 + 336{,}000 + 168{,}000) = 1{,}050{,}000$

$525{,}000\,m = 1{,}050{,}000$

$1{,}050{,}000 \quad 525{,}000$

AH ✓

= 2 kg AH ✓

Mass of ice to be added = 2 kg = (2 × 1000) g AH ✓ = 2000 g. AH ✓ Number of ice pellets of 50 g each:

$$\frac{2000}{50}$$

= 40 pellets AH ✓

The number of ice pellets to be added is 40. AH ✓

Uganda certificate of education scoring guides for joint mock examination 2026

MATHEMATICS

456/1

MATHEMATICS 456/1

Item 1 Number Bases and Mensuration

(a) Number of poles

Question. Convert 4213_{five} to base ten to find the number of poles required.

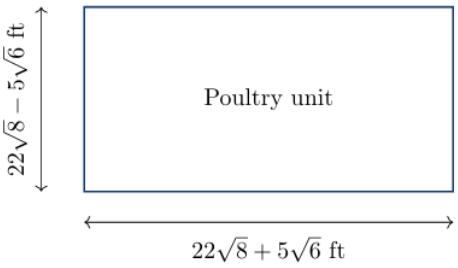

Working. Using place values of base five:

Place value	5^3	5^2	5^1	5^0
Base	5	5	5	5
Digit	4	2	1	3

$$\begin{aligned} 4213_{\text{five}} &= (4 \times 5^3) + (2 \times 5^2) + (1 \times 5^1) + (3 \times 5^0) \\ &= 500 + 50 + 5 + 3 \\ &= 558_{\text{ten}} \end{aligned}$$

The engineer required **558 poles** To partition the structure.

Question. Find the total distance around the poultry unit, given side lengths $(22\sqrt{8} + 5\sqrt{6})$ and $(22\sqrt{8} - 5\sqrt{6})$ ft.

$$\begin{aligned} \text{Perimeter} &= 2\left[(22\sqrt{8} + 5\sqrt{6}) + (22\sqrt{8} - 5\sqrt{6})\right] \\ &= 2(44\sqrt{8} + 0) \\ &= 88\sqrt{8} \\ &= 88 \times 2\sqrt{2} \\ &= 176\sqrt{2} \text{ ft} \end{aligned}$$

The total distance around the poultry unit is **$176\sqrt{2}$ ft**.

(c) Area of the poultry unit

$$\begin{aligned} \text{Area} &= (22\sqrt{8} + 5\sqrt{6})(22\sqrt{8} - 5\sqrt{6}) \\ &= (22\sqrt{8})^2 - (5\sqrt{6})^2 \\ &= 3872 - 150 \\ &= 3722 \text{ ft}^2 \end{aligned}$$

The poultry unit cover san area of **3722** ft^2.

(d) Feed ratio

Question. The ratio of current to original feed is 750 : 400. Find how many extra days the current stock will last if the original stock (400 kg) lasted 15 days.

Ratio = 750 : 400 = 15 : 8

$$\text{Days on 750 kg} = \frac{15}{8} \times 15 = 28.125 \text{ days}$$

Difference = 28.125 − 15.0 = 13.125 days

The feeds will last **13.125 Days longer** Before restocking.

Item 2 Quadratics and Linear Programming

(a) Speeds of the coaster and the bus

Question. A coaster and a bus both cover 220 km. The bus travels 30 km/h faster than the coaster, and arrives 45 minutes earlier. Find the speed of each.

Working. Let the coaster's speed be x km/h, so the bus's speed is $(x + 30)$ km/h.

$$\frac{220}{x} - \frac{220}{x+30} = \frac{45}{60} = \frac{3}{4}$$

$$\frac{220(x+30) - 220x}{x(x+30)} = \frac{3}{4}$$

$$\frac{6600}{x^2+30x} = \frac{3}{4}$$

$$3x^2 + 90x = 26400$$

$$x^2 + 30x - 8800 = 0$$

$$x = \frac{-30 \pm \sqrt{30^2 - 4(1)(-8800)}}{2(1)} = \frac{-30 \pm 190}{2}$$

$$x = -110 \text{ or } 80$$

Since speed cannot be negative, $x = 80$.

Coaster's speed= **80** km/h; Bus's speed=80+30= **110** km/h.

(i) Journey times.

$$\text{Coaster: } t = \frac{220}{80} = 2.75 \text{ hrs}$$

$$\text{Bus: } t = \frac{220}{110} = 2 \text{ hrs}$$

The bus took **2 hours** While the coaster took **2.75 hours**.

(b) Linear programming — hiring vehicles

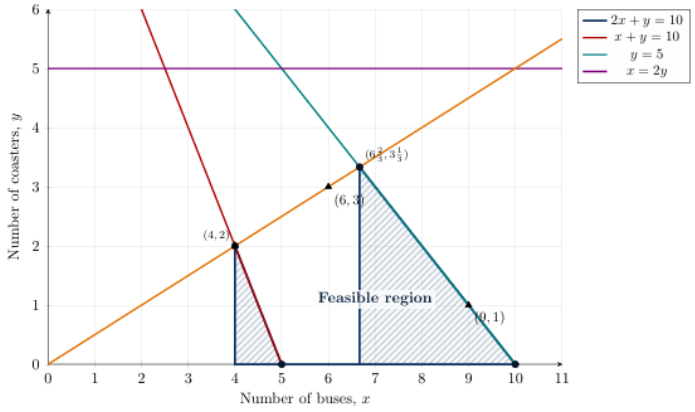

Question. A geography department needs to transport at least 300 students. A bus seats 60 and a coaster seats 30. There are at most 10 drivers available, at most 5 coasters, and the number of buses hired must be at least twice the number of coasters. A bus costs Ugx 900,000 and a coaster Ugx 400,000 to hire. Find the minimum cost.

Working. Let x = number of buses, y = number of coasters.

Seating: $60x + 30y \geq 300 \Rightarrow 2x + y \geq 10$	(i)
Drivers: $x + y \leq 10$	(ii)
Vehicles: $y \leq 5$, $x \geq 2y$	(iii)

$$x \geq 0,\ y \geq 0$$

Inequality	Boundary line	Points used to plot
$2x + y \geq 10$	$2x + y = 10$	$(0, 10),\ (5, 0)$
$x + y \leq 10$	$x + y = 10$	$(10, 0),\ (0, 10)$
$y \leq 5$	$y = 5$	$(0, 5),\ (10, 5)$
$x \geq 2y$	$x = 2y$	$(2, 1),\ (6, 3)$
$x \geq 0$	$x = 0$	vertical line
$y \geq 0$	$y = 0$	horizontal axis

Minimising the cost. Let $T = 900{,}000x + 400{,}000y$.

Feasible point	$900\,000x$	$400\,000y$	T (Ugx)
$(4, 2)$	3 600 000	800 000	**4 400 000**
$(6, 3)$	5 400 000	1 200 000	6 600 000
$(9, 1)$	8 100 000	400 000	8 500 000

The geography department should hire **4 buses and 2 coasters** to spend a minimum cost of **Ugx 4,400,000**.

Minimising the cost. Let $T = 900{,}000x + 400{,}000y$.

Feasible point	$900000x$	$400000y$	T **(Ugx)**
(4,2)	3600000	800000	**4400000**
(6,3)	5400000	1200000	6600000
(9,1)	8100000	400000	8500000

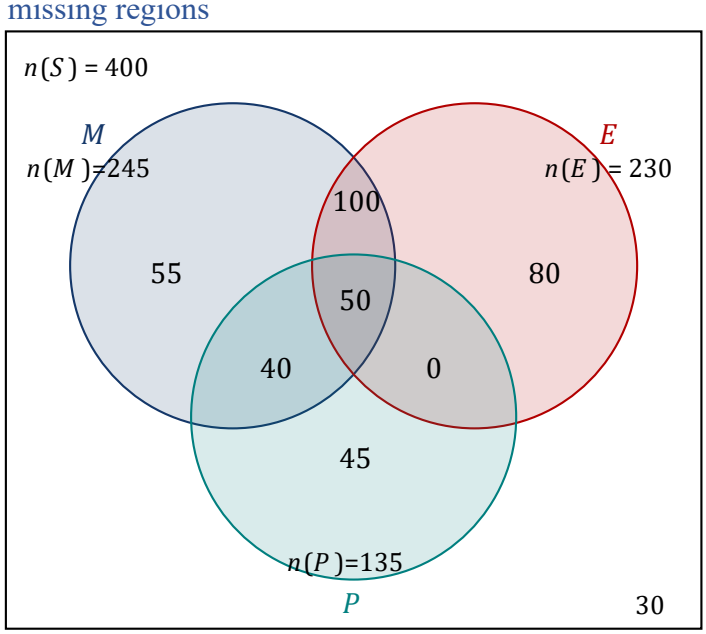

The geography department should hire **4 busesand2coasters** To spend a minimum cost of **Ugx4,400,000** .

Item 3 Sets, Venn Diagrams and Probability

Question. In S.5, $n(M)$ = 245 study Mathematics, $n(E)$ = 230 study Economics, $n(P)$ = 135 study Physics, 40 study Mathematics and Physics only, 100 study Mathematics and Economics

only, 0 study Economics and Physics only, 50 study all three subjects, and 30 study none of the three. Find the total number of students in S.5 and the probability that a student offers Mathematics.

(a) Venn diagram and missing regions

a (Maths only) = 245 − (100 + 40 + 50) = 245 − 190 = 55

b (Physics only) = 135 − (40 + 0 + 50) = 135 − 90 = 45

(b) Total number of students

$n(S) = n(M)$ + (Economics only) + (Physics only) + (none)

= 245 + 80 + 45 + 30

= 400

ThetotalnumberofstudentsinS.5is **n(S)= 400**.

(c) Probability of offering Mathematics

$$P(\text{Mathematics}) = \frac{n(M)}{n(S)} = \frac{245}{400} \approx 0.6$$

The probability that a student offers Mathematics is ≈ **0.6**, so there is a good likelihood of getting learners who take Mathematics.

Item 4 Statistics — Grouped Data

(a) Class width

Question. Given the highest value (HV) = 47 and the lowest value (LV) = 11 from a raw mass data set, and using 8 classes, find a suitable class width and the first class.

$$c = \frac{HV - LV}{8} = \frac{47 - 11}{8} = \frac{36}{8} = 4.5 \implies c = 5 \text{ kg (rounded up)}$$

Classwidth **c = 5** kg; first class **10–14**.

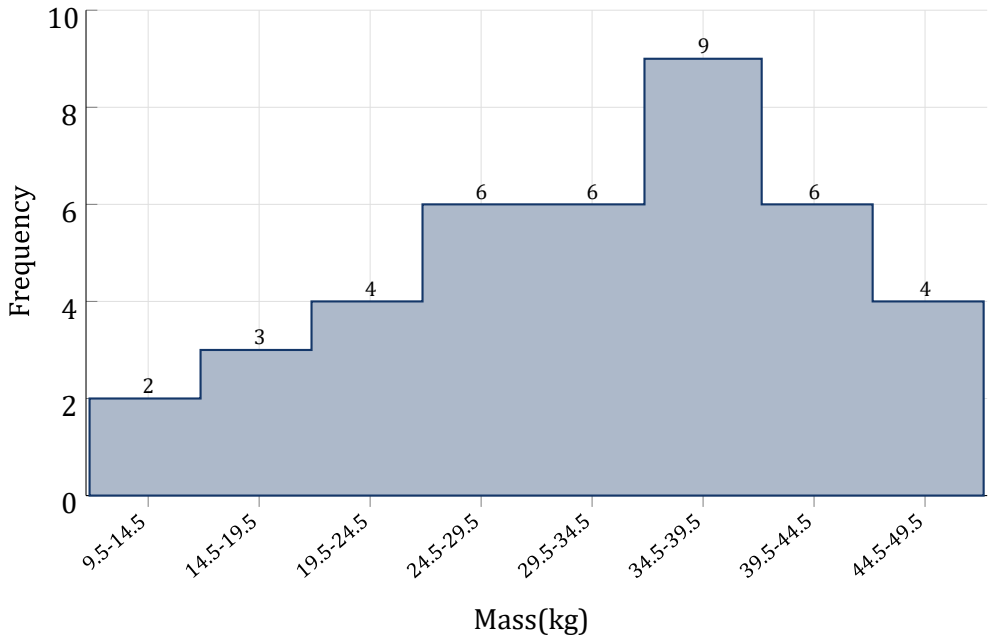

(b) Frequency distribution table

Mass (kg)	Class boundaries	Frequency f	Mid-mass x	fx	Cum. freq.
10–14	9.5–14.5	2	12	24	2
15–19	14.5–19.5	3	17	51	5
20–24	19.5–24.5	4	22	88	9
25–29	24.5–29.5	6	27	162	15
30–34	29.5–34.5	6	32	192	21
35–39	34.5–39.5	9	37	333	30
40–44	39.5–44.5	6	42	252	36
45–49	44.5–49.5	4	47	188	40
Total		$\sum f = 40$		$\sum fx = 1290$	

$$\text{Mean} = \frac{\sum fx}{\sum f} = \frac{1290}{40} = 32.25 \text{ kg}$$

The pupils gained a **mean mass of 32.25 kg**. The modal class is 35–39 kg, so most pupils gained a mass of about **37 kg**.

(c) Histogram

(d) Probability of the 30–34 kg class

$$P(30\text{–}34) = \frac{6}{40} = 0.15$$

Itis **Very unlikely** toselectapupilweighingbetween30and34kg since the probability (0.15) islessthan0.25.

Item 5 Financial Mathematics and Travel Graphs

(a) Mortgage repayment

Question. Mr Livingstone buys a house worth Ugx 120,000,000, paying a 10% deposit and financing the balance over 20 years at 5% p.a. compound interest. Find his monthly instalment.

$$\text{Deposit} = \frac{10}{100} \times 120{,}000{,}000 = 12{,}000{,}000$$

$$\text{Mortgage} = 120{,}000{,}000 - 12{,}000{,}000 = 108{,}000{,}000$$

$$A = P\left(1 + \frac{r}{100}\right)^{n} = 108{,}000{,}000\left(\frac{105}{100}\right)^{20}$$

$$= 286{,}556{,}152.2$$

$$\text{Monthly instalment} = \frac{286{,}556{,}152.2}{12 \times 20} = 1{,}193{,}983.97$$

Mr Aziz should advise Mr Livingstone to pay **Ugx 1,193,983.97 monthly**.

(b) Distance–time graph: two families travelling to Kabale

Question. Two families travel from Matale to Kabale (360 km apart) — one in a Toyota Harrier, the other in a Super Custom, using the schedules below. Find where and roughly when they met for lunch, and the difference in their arrival times at Kabale.

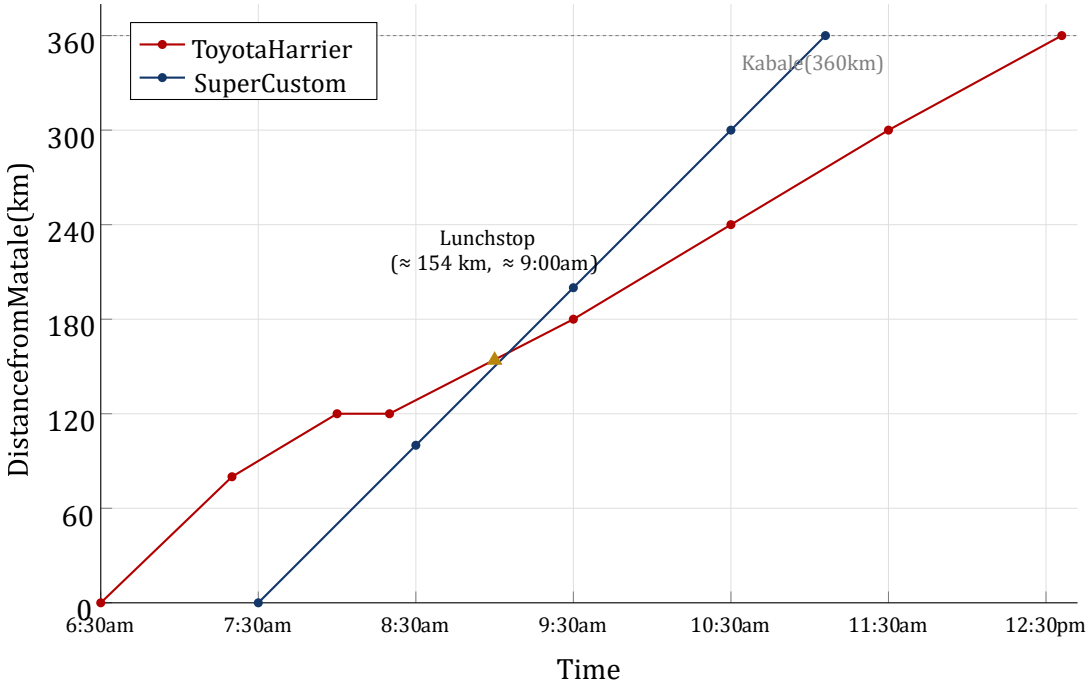

Toyota Harrier (Matale → Kabale, 360 km)

Distance (km)	0	80	120	120	180	240	300	360
Time	6:30am	7:20am	8:00am	8:20am	9:30am	10:30am	11:30am	12:36pm

Super Custom (Matale → Kabale, 360 km)

Distance (km)	0	100	200	300	360
Time	7:30am	8:30am	9:30am	10:30am	11:06am

Note: the Harrier rests at 120 km from 8:00am to 8:20am; the Super Custom travels at a constant 100km/h.

Difference in arrival times = 12:36 − 11:06

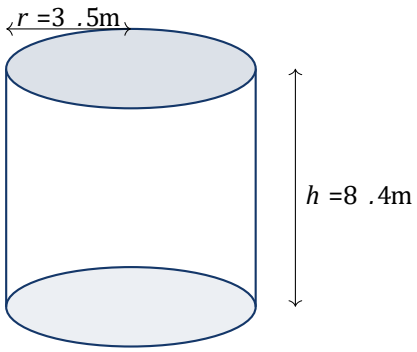

= 1 hr 30 min

The two families met for lunch about **206 km from Kabale** (154 km from Matale, around 9:00am). The **Super Custom** arrived at Kabale **1.5 hours earlier** than the Toyota Harrier.

Item 6 Mensuration and Trigonometry (3-D)

(a) Cost of painting a cylindrical house

Question. A cylindrical house has radius 3.5 m and wall height 8.4 m. Find the total area to be painted (inside and outside walls, plus the ceiling), the litres of paint required (1 litre covers 1.225m^2), and the shortfall against a budget of Ugx 600,000 at Ugx 7,500 per litre.

Area of 2 cylindrical walls = $2\times \pi rh = 2 \times \frac{22}{7} \times 3.5 \times 8.4 = 193.6\ \text{m}^2$

$$\text{Area of ceiling} = \pi r^2 = \frac{22}{7} \times 3.5 \times 3.5 = 38.5 \text{ m}^2$$

$$\text{Total area painted} = 38.5 + 193.6 = 232.1 \text{ m}^2$$

$$\text{Paint required} = \frac{232.1}{1.225} \approx 189.5 \text{ litres}$$

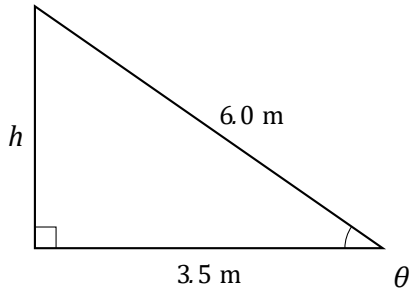

Cost = 189.5 × 7,500 = 1,421,250 Ugx

Shortfall = 1,421,250 − 600,000 = 821,250 Ugx

Mr Vincent's budget for painting the house falls short by **Ugx821,250** .

(b) Height of the bulb wire and roof angle

Question. A wire of length 6.0 m holds a bulb, running from the apex of a conical/triangular roof down to a point 3.5 m (horizontally) from the wall. Find (i) the vertical height h of the wire, and (ii) the angle θ between the roof's slant height and the ceiling.

(i) Pythagoras: $h^2 + 3.5^2 = 6.0^2$

$h^2 = 36.0 - 12.25 = 23.75$

$$h = \sqrt{23.75} \approx 4.8734 \text{ m}$$

The heigh to the wire holdingthe bulb is **4.8734 m**.

(ii) cos

$$\theta = \frac{3.5}{6}$$

$$\theta = \cos^{-1}\left(\frac{3.5}{6}\right) \approx 54.3°$$

The roof's slant height is inclined to the ceiling at **54.3°**.

ITEM1: SUMMARYWRITING

ScoreAllocated:15/15

Title Options:

- **Title Case and Underlined:** Why the Competence-Based Curriculum Should Be Embraced

Title

- **UPPERCASE:** WHY THE COMPETENCE-BASED CURRICULUM SHOULD BE EMBRACED (Underlining is optional)

Title Rule: The title must be strictly extracted from the scenario. Faults On title lead to **SCORE 00**

Summary Points Breakdown (20 Total Ideas):

1. Focuses on practical skills development. Hands-on learning / psychomotor
2. Learners acquire problem-solving skills needed in real-life situations
3. Uses a more collaborative approach to learning
4. Learners express their ideas
5. Developing self-confidence
6. Assertiveness
7. Self-esteem
8. Learners have a chance to showcase and develop their leadership skills
9. Through groups, learners are able to learn from others
10. The curriculum is highly interactive

13. Every child aids the other's learning with less struggle

14. Engaging when learners work towards a specific goal in a timely manner

15. CBC allows for more accurate assessment of learners' competences

16. Through laid-out basis of assessment

17. Assessment provides clear...

18. ...and timely feedback for improvement

19. Tailored to suit different learning styles...

20. ...and learners' needs

21. Helps learners improve their cognitive abilities

22. Acquire values...

23. ...and positive attitudes

Sample Model Summary (126 words):

The competence-based curriculum focuses on practical skills development and learners acquire problem-solving skills (needed in real life situation). It uses a more collaborative approach to learning and learners are able to express their ideas making them have self-confidence, assertiveness and self-esteem. The learners have a chance to showcase and develop their leadership skills. Through groups, learners are able to learn from others. The curriculum is highly interactive and engaging (when learners work towards a specific goal in timely manner). CBC allows for more accurate assessment of learners' competences through laid out basis of assessment. Its assessment provides clear and timely feedback for improvement. CBC is tailored to suit different learning styles and learners' needs. It helps learners improve their cognitive abilities and get values and attitudes.

Handwritten Examiner Coordination Additions (Item 1):

- **Paragraph Penalty:** Must strictly be ONE indented paragraph. If more than one paragraph is used, score the first paragraph normally and award 00 for subsequent paragraphs.
- **Noun Subject Rule:** The noun subject must appear in the first sentence. If not, score 00 until you meet it.
- **Idea Dependency 1:** Without ”learners are able to express their ideas”, ideas 4, 5, and 6 DO NOT score.
- **Idea Dependency 2:** For idea 9, without the word ”groups”, award 00.
- **Outlined Points:** If points are outlined/bulleted, award 00.
- **Punctuation Penalty:** No punctuation marks = NO MARKS AT ALL
(Score 00).
- **Comma Abuse:** If commas are used continuously throughout, award score 00 for ideas after the second consecutive comma use.
- **Incomplete Sentences:** Sentences missing a subject, verb, or object score 00.

ITEM 2: READING COMPREHENSION

ITEM2—Comprehension Analysis & Responses

ScoreAllocated:20/20

Sub	Response Details	Scoring Rules
a)	**Explanation of Concept (EC2):** The bus was overloaded / overstrained / full of people and luggage, so it made unpleasant/straining noise and struggled many times / for a long time before managing to move.	One correct response = **04 scores** Minor spelling errors = ignore Gross spelling errors = 00 Incomprehensible = 00
b)	**Grammar Usage (GU):** Many passengers alighted from the bus *so that they could/would* stretch their legs. (*Acceptable:* so as to / in order that they could/would / in order to)	One grammatically correct response = **06 scores** Incorrect/no response = 00 No full stop = 00 Any spelling error = 00 "In order that hat" = 00
c)	**Character Analysis (CA2) — Conductor:** • *Rude/Arrogant:* shakes his fist at passenger in a rude manner. • *Abusive/Aggressive:* tells passenger to keep his big mouth shut. • *Insensitive/Selfish:* overpacks passengers without minding comfort for profit. • *Harsh / Quarrelsome / Tough*.	Correct trait + correct justification = **06 scores** Reject positive traits (e.g., jolly) = 00 Correct trait + no justification = 00 Correct trait + wrong justification = 00 Wrong standpoint = 00
d)	**Advice (AD2):** • Sensitive to wife's feelings regarding leaving the village. • Discuss major family decisions with wife beforehand.	One relevant advice + justification = **05 scores** Advice must be positive Irrelevant/incorrect advice = 00

	• Investigate wife's physical state before long journeys (she is pregnant).	Advice without explanation = 00
e)	**Writer's Intention (IF2):** • Condemn/criticize ruthless actions of conductors. • Teach public transport operators to respect passengers. • Condemn husbands who disregard wives' well-being. • Criticize patriarchal society.	Intention = **05 scores** No/wrong justification = 00 scores
f)	**Opinion/Measures (OP3):** All major decisions are made by Ochola, like moving to town at a particular point in time.	Stand + explanation = **03 scores** Implied stand = 03 No stand / no explanation = 00

Uganda certificate of education scoring guides for joint mock examination 2026

HISTORY

241/1

HISTORY AND POLITICAL EDUCATION 241

Instructions to candidates: Attempt three items. Items in Section A are compulsory. Choose one item from Section B.

SECTION A

Item 1

In the pre-colonial period, several communities in East Africa began to organize themselves into centralized political systems. Leaders emerged to control trade, maintain security, and settle disputes among the people. Some societies developed strong kingdoms with kings, chiefs, and administrative structures. These states grew through conquest, alliances, and control of resources such as land, cattle, and trade routes. As a result, powerful states like Buganda Kingdom, Bunyoro-Kitara Kingdom, and Ankole Kingdom emerged in the region.

Task (a) Explain the factors that led to formation of the above states in East Africa referred to the scenario.

Task (b) Identify the features of the above states in East Africa.

Expected Responses — Part (a)

- The problem in the scenario is failure to understand the factors that led to state formation in East Africa.
- Need for security and defence. Communities united under strong leaders to defend themselves from enemies and protect their land and cattle.
- Growth of trade. Trade encouraged the formation of strong leadership to control trade routes and collect taxes. This helped strengthen states like Buganda Kingdom.
- Population increase. As populations grew, people needed organized leadership to manage resources and maintain order.
- Good leadership. Strong and capable rulers organized people, created laws, and expanded their territories. For example, rulers of Bunyoro-Kitara Kingdom built powerful administrations.
- Agriculture and food surplus. Improved farming produced enough food to support leaders, soldiers, and administrators.
- Conquest and expansion. Some states expanded by conquering weaker neighboring communities, bringing them under their control.
- Control of resources. Areas with fertile land, cattle, iron, or salt attracted people and helped rulers consolidate power.
- Outstanding/strong armies, e.g. the Abambowa in Buganda and the Abarusura in Bunyoro.
- Migration and settlement, e.g. by the Bantu, Cushites, and Ngoni.
- A clear system of succession, which reduced succession disputes.
- Strategic location.

Note: the four bullets above were added from the coordinator's handwritten margin notes on the scan. One word in "a clear system of succession" was hard to read with certainty (the coordinator crossed out "successful" and wrote a replacement) — please confirm this is the wording you want before this is finalized as the official guide.

- *In conclusion, the above are the social, political and economic factors that made state formation in East Africa inevitable.*

Success Criteria for 1(a)

Ref	Descriptor	Score
P1 (3)	Exhaustively presents, explains and applies 7–8 factors of centralised states in East Africa.	**6**
P1 (2)	Satisfactorily/adequately presents and explains 4–6 factors of centralized states in East Africa.	**4**
P1 (2)	Generally presents 2–3 factors of centralized states in East Africa.	**2**
P1 (2)	Presents/mentions/outlines 1 and below 3 factors of centralized states in East Africa.	**0**

Expected Responses — Part (b)

The system of succession of power was hereditary in nature where the king could be succeeded by own son or a member from the royal family. This reduced succession disputes. Many had standing armies for defense of the kingdom and wars of expansion and external attacks. The king was the highest court of appeal in case of conflicts. The clan leaders and chiefs were in charge of minor cases and major ones were referred to the king for the final judgment. They had royal regalia e.g. the royal crown, royal stool, spear and shield. They were highly respected instruments of power. They collected tributes from conquered societies. The tributes were in form of gold, iron, food stuffs etc. from the conquered societies. Their people were divided into social classes i.e. the royals and peasants. People in these societies belonged to different clans, each with a totem and a leader who was a king's representative. The king was the head of all clans. This promoted their social organization. They had small scale industries which were made of skilled personnel like the blacksmiths, potters, and bark cloth makers among others. These produced different items that were needed in day-to-day lives. Major economy like land was controlled by the king. He would distribute it as he wished among the chiefs. This promoted hard work among the chiefs so they could be rewarded by the king. The people participated in different economic activities like trade, agriculture, hunting, and iron smelting for economic survival. These promoted specializations in the society.

- *In conclusion, the above are the social, political and economic features of centralized states in East Africa.*

Success Criteria for 1(b)

Ref	Descriptor	Score
P1 (3)	Exhaustively presents, explains and applies 7–8 characteristics of centralised states in East Africa.	**6**
P1 (2)	Satisfactorily/adequately presents and explains 4–6 characteristics of centralized states in East Africa.	**4**
P1 (2)	Generally presents 2–3 characteristics of centralized states in East Africa.	**2**
P1 (2)	Presents/mentions/outlines 1 and below 3 characteristics of centralized states in East Africa.	**0**

Item 2

In recent times, protests by native black South Africans against foreign nationals, including Ugandans, with some even losing their lives during these violent incidents. This has raised concern among East African politicians, who criticize South Africa's poor international relations. Some argue the country has not recovered from white minority rule and is using similar strategies to expel foreigners from its territory, while others believe that past rule caused today's problems but also contributed to development. This has attracted Historians in your Country to educate people about South African Colonial History. A local radio station in your community has organized a political talk show to discuss these events, and you have been selected as one of the key discussants.

Task (a) Prepare a presentation about the strategies used against the country's rule referred to in the scenario.

Expected Responses — Part (a)

- In the scenario some East African politicians lack clear information about the strategies used by South Africans to struggle against Apartheid/White minority rule.
- South Africa was ruled by the white minority who ruled them under Apartheid. This was a policy of racial segregation under which the whites dominated the political, social and economic affairs of South Africa. It was characterized by creation of separate homes of Africans.
- They had separate education institutions and they were segregated in all aspects of life.
- The Africans used different strategies to end the white minority rule, ranging from peaceful to forceful and violent military methods.
- They mobilized the masses against the racist government by organizing political rallies through which they sensitized the people on the need to fight for their freedom.

- They used mass media such as newspapers, radios, and magazines to decampaign apartheid policies.
- Through writing books, novels, and journals — such as No Easy Walk to Freedom by Nelson Mandela, Cry the Beloved Country by Alan Paton, and Mine Boy by Peter Abrahams — they exposed the evils of the policy and sensitized people on the need for independence.
- The musicians composed and sang songs which exposed Apartheid policy.
- Through music, they appealed to the world for support internally and externally, for example musicians like Lucky Dube, PJ Powers, and Yvonne Chaka Chaka among others.
- They solicited financial, military and material support from fellow Africans to support them against apartheid activities.
- They formed political parties such as the ANC and PAC, which became channels through which Africans aired their dissatisfaction against apartheid policy.
- They organized demonstrations like the defiance campaign; they burnt and destroyed passbooks and participated in boycotts against poor working conditions and little pay.
- The youth and students organized riots and demonstrations against apartheid rule, for example the Soweto uprising of 1976.
- Through religious organisations and religious leaders like Bishop Desmond Tutu.
- Through acts of sabotage and violence such as bombing buildings and attacking government offices, sometimes killing whites.
- They demanded the release of political prisoners like Nelson Mandela and Walter Sisulu, who had been imprisoned because they openly opposed Apartheid.
- They launched struggles against Apartheid rule through armed groups such as POQO (PAC) and Umkhonto we Sizwe (ANC), and opened military bases in friendly neighbouring countries to disorganize the Apartheid regime.
- A relevant conclusion should be given.

Success Criteria for 2(a)

Ref	Descriptor	Score
P1 (3)	Exhaustively presents, explains and applies 7–8 strategies used by South Africans to struggle against Apartheid/White minority rule.	**6**
P1 (2)	Satisfactorily/adequately presents and explains 4–6 strategies used by South Africans to struggle against Apartheid/White minority rule.	**4**
P1 (2)	Generally presents 2–3 strategies used by South Africans to struggle against Apartheid/White minority rule.	**2**
P1 (2)	Presents/mentions/outlines 1 and below 3 strategies used by South Africans to struggle against Apartheid/White minority rule.	**0**

Task (b) Using the information in the scenario, explain how white minority rule shaped South African society, politics, and economy, and its lasting effects on citizens' lives.

Expected Responses — Part (b)

- In the scenario some East African politicians lack clear information about the effects of white minority rule on the people of South Africa. The following are the effects of white minority rule on the people of South Africa.
- White minority rule institutionalized apartheid, dividing people along racial lines and denying black South Africans equal rights, education, healthcare, and housing.
- Black communities were deliberately underdeveloped, with poor schools, hospitals, and infrastructure compared to white areas.
- The exclusion and competition for limited resources created deep inequalities that fuel resentment today, leading to tensions even with fellow Africans like Ugandans.
- Black South Africans were stripped of the right to vote, hold office, or participate in decision-making, leaving them politically marginalized.
- It led to violent riots and protests, for example the Sharpeville uprising in 1960 and the Soweto uprising of 1976. These led to destruction of property such as villages and buildings.
- It led to the death of many Africans as they tried to resist the segregative system, for example the Sharpeville massacre of 1960.
- It led to the imprisonment of many Africans such as Nelson Mandela, Albertina Sisulu, and many others.
- Repressive laws led to the rise of liberation movements (ANC, PAC) and iconic leaders such as Nelson Mandela, whose struggle eventually led to democracy in 1994.
- The dictatorial nature of white minority rule left behind weak institutions and ongoing struggles with corruption, accountability, and governance.
- It led to land alienation by the whites. Large tracts of fertile land were seized by white settlers, pushing black South Africans into "homelands" or reserves, creating long-term poverty and inequality.
- Blacks were forced into low-wage labour in mines, farms, and industries, while wealth accumulated in the hands of whites.
- Unequal land ownership and wealth distribution patterns established during minority rule still persist, with South Africa among the most unequal societies globally.
- It led to poverty and inequality, as generations of black South Africans remain disadvantaged in education, healthcare, and employment opportunities.
- This rule led to social tensions; high unemployment and poor service delivery often spark violence and scapegoating of foreign nationals, including Ugandans.
- The history of exclusion and humiliation has left scars of mistrust, anger, and identity struggles within South African society.
- Despite being oppressive, colonial and minority rule also laid some infrastructure and industrial bases (railways, mining, urban centers) that support South Africa's economy today, though the benefits were unevenly shared.
- In conclusion, white minority rule in South Africa deeply shaped the country's society, politics, and economy by institutionalizing inequality, marginalization, and dispossession. The lasting effects are still visible in today's poverty, unemployment, and xenophobic tensions.

Success Criteria for 2(b)

Ref	Descriptor	Score
P1 (3)	Exhaustively presents, explains and applies 7–8 effects of how Apartheid/White minority rule affected the people of South Africa.	**6**
P1 (2)	Satisfactorily/adequately presents and explains 4–6 effects of how Apartheid/White minority rule affected the people of South Africa.	**4**
P1 (2)	Generally presents 2–3 effects of how Apartheid/White minority rule affected the people of South Africa.	**2**
P1 (2)	Presents/mentions/outlines 1 and below 3 effects of how Apartheid/White minority rule affected the people of South Africa.	**0**

Item 3

The Head teacher of one of the schools in central Uganda announced on assembly at the beginning of second term that the third week was to be for patriotism and national pride. This was in line with the launch of patriotism in schools by the president of Uganda in 2009. In as much as the lower classes of S.1, 2 and 3 were happy with the program, the upper classes of S.4, 5 and 6 responded negatively, calling it a wastage of time. Following the above reaction, the head teacher has organized a seminar to educate them about the purpose and significance of patriotism to them as citizens of this country.

Task (a) Prepare the document that the Head teacher will use in the seminar he has organized for the upper classes of S.4, 5 and 6 in the scenario above.

Task (b) Make a write-up explaining the significance of the practice identified in the scenario above.

Expected Responses — Part (a)

- The problem in the scenario is failure by the upper classes to understand the purpose of patriotism in their lives.
- Patriotism is the love, loyalty and devotion that a person has for his or her country. Patriotism encourages citizens to participate in the democratic processes like voting and advocating for policies that benefit the nation.
- It encourages citizens to buy goods made in their own country and this reduces over-dependency on foreign goods, leading to economic development of the country.
- It inspires individuals to become role models by demonstrating values like loyalty and service to others.
- This helps to promote a sense of responsibility and leadership among citizens.
- It encourages personal involvement in civic activities like volunteering and community service (e.g. clearing roads), and this promotes personal growth, skills development and community engagement.

- It helps to create a shared sense of national identity that is built around a common history, culture and values. This fosters a feeling of belonging among citizens.
- Patriotism promotes a sense of shared values and goals which helps to bridge social, cultural and economic divisions, encouraging citizens to work together for a common goal.
- It has emphasized the importance of civic education by encouraging Ugandans to understand their rights and responsibilities, fostering a sense of awareness among Ugandans.
- By encouraging participation in different national activities like politics, it leads to the development of leadership skills among the youths.
- It has improved Uganda's reputation globally by showcasing the country's cultural heritage and achievements, contributing to international recognition and respect for the country.
- Negatively, excessive patriotism has discouraged critical thinking among some Ugandans, making them accept information and policies without questioning, which has sometimes led to the formulation of poor policies that do not last long.
- Emphasis on patriotism has led to an emphasis on national pride which has undermined critical reflection and self-awareness.
- Excessive patriotism by leaders suppresses opposing views from citizens, restricting freedom of speech and limiting constructive criticism.
- *In conclusion, patriotism has significantly affected Uganda socially, politically and economically as elaborated above.*

Note: on the scan, the coordinator wrote a word after "...politically and" and then struck it out (along with a further crossed-out line beneath it) — a self-cancellation. Nothing has been changed here; the original printed conclusion is kept as-is.

Success Criteria for 3(a)

Ref	Descriptor	Score
P1 (3)	Exhaustively presents, explains and applies 7–8 purposes of patriotism in their lives.	**6**
P1 (2)	Satisfactorily/adequately presents and explains 4–6 purposes of patriotism in their lives.	**4**
P1 (2)	Generally presents 2–3 purposes of patriotism in their lives.	**2**
P1 (2)	Presents/mentions/outlines 1 and below 3 purposes of patriotism in their lives.	**0**

Expected Responses — Part (b)

The problem in the scenario is lack of knowledge about the significance of patriotism in Uganda. The following are the significance of patriotism in Uganda.

- Patriotism has contributed to increased national pride, encouraging Ugandans to buy locally made products like Buy Uganda Build Uganda (BUBU), leading to the growth of domestic industries and hence economic development.
- It has inspired Ugandans to make investments in the country. Many private schools and hospitals, for instance, have been built and these have led to better service delivery.
- It has fostered national unity by promoting a sense of shared identity and purpose, helping to reduce tribal and ethnic tensions.
- Patriotism has encouraged cultural exchange programs through cultural tours and participation in activities like MDD, promoting understanding and appreciation of Uganda's diverse cultural heritage.
- It has inspired Ugandans to engage in community service like general cleaning of their communities, promoting social responsibility and volunteerism.
- It has led to the establishment of patriotism clubs in secondary schools following their launch in 2017. These clubs have helped to develop leadership skills among students.

SECTION B

Choose one item from this section.

Item 4

After Uganda gained independence in 1962, the country experienced a series of political struggles and conflicts. The 1966 Kabaka Crisis led to the abrogation of the 1962 Constitution, with Prime Minister Milton Obote centralizing power. Later, military coups and regime changes created political instability.

In 1971, Idi Amin seized power through a coup, ruling with brutality. His regime was marked by human rights abuses, economic decline, and the expulsion of Asians from

Uganda. Amin was overthrown in 1979 by the combined forces of Tanzanian troops and Ugandan exiles, leading to continued struggles to stabilize the country.

Following Amin, Uganda experienced short-lived governments and military interventions until 1986, when Yoweri Museveni's National Resistance Army (NRA) captured power, ending years of armed conflict. The post-independence liberation struggles involved political rivalries, ethnic divisions, military interventions, and popular resistance, shaping modern Uganda's political landscape.

Tasks: Using evidence from the scenario, write an essay:

Task (a) Explain the causes of post-liberation struggles in Uganda.

Task (b) Discuss the effects of liberation struggles on Uganda referred to in the scenario above.

Expected Responses — Part (a)

- The problem in the scenario is failure to understand the causes of post-independence liberation struggles in Uganda.
- The post-independence liberation struggles in Uganda mainly occurred after independence in 1962 and were caused by political, social, and economic problems as elaborated below.
- Dictatorial leadership; leaders such as Idi Amin ruled Uganda through force, suppressing opposition and violating human rights. This pushed many Ugandans to form liberation movements to remove such regimes.
- Rigged elections; elections were often manipulated, especially during the rule of Milton Obote. Many groups felt cheated and decided to fight the government.
- Tribalism and sectarianism; political leaders favored people from their own ethnic groups in government jobs and the army, which created resentment and conflict among other communities.
- Abuse of human rights; there were arrests, killings, and torture of suspected opponents, especially during the regimes of Amin and Obote. This forced many people to join liberation struggles.
- Economic decline; mismanagement of the economy, corruption, and the expulsion of Asians in 1972 under Idi Amin led to economic collapse and suffering among the population.
- Military domination in politics; the army played a major role in politics and often took power through coups, creating instability and encouraging armed resistance.
- Influence of exiles and opposition groups; Ugandan exiles in neighboring countries organized armed groups to fight the government and restore democracy.
- Desire for democracy and good governance; many Ugandans wanted a government that respected the rule of law, human rights, and fair elections, leading to liberation movements such as the one led by Yoweri Museveni.
- *In conclusion, liberation struggles in Uganda were caused by social, political and economic factors as shown above.*

Success Criteria for 4(a)

Ref	Descriptor	Score
P1 (3)	Exhaustively presents, explains and applies 7–8 causes of post-independence liberation struggles in Uganda.	**5**
P1 (2)	Satisfactorily/adequately presents and explains 4–6 causes of post-independence liberation struggles in Uganda.	**4**
P1 (2)	Generally presents 2–3 causes of post-independence liberation struggles in Uganda.	**2**
P1 (2)	Presents/mentions/outlines 1 and below 3 causes of post-independence liberation struggles in Uganda.	**0**

Note: as with 3(b) above, the top band here is printed as "Score 5" in the original scan (the others in this guide use 6) — kept as printed.

Expected Responses — Part (b)

The post-independence liberation struggles in Uganda had several political, social, and economic effects.

- Change of government in Uganda. Liberation struggles led to the overthrow of some regimes; for example, the government of Milton Obote was overthrown in 1986 by the forces led by Yoweri Museveni.
- Loss of lives; many people, including civilians and soldiers, were killed during the fighting.
- Destruction of property; houses, schools, roads, and other infrastructure were destroyed, especially in areas where fighting took place.
- Economic decline in the country; agriculture, trade, and industries were disrupted, leading to poverty and economic hardships.
- Displacement of people; many Ugandans became refugees or internally displaced persons as they fled war zones.
- Political reforms; after the struggles, efforts were made to introduce political reforms to promote democracy and improve governance.
- Growth of the national army; the liberation struggles led to the formation and strengthening of the national army, now known as the Uganda People's Defence Force.
- Increased political awareness; Ugandans became more aware of their political rights and the importance of good leadership.
- *In conclusion, the above are the social, political and economic effects of the post-independence liberation struggles in Uganda.*

Lu1(1)	Merely outlines reasons for disasters (Ap=1–2, Cl=05)	01
Lu0	Merely outlines measures / No or wrong responses	00

Reasons why disasters take place in highland areas

- Fast-flowing rivers (like River Nyamwamba) undercut river banks, weakening the rocks and increasing the risk of banks bursting, thus destroying property and lives.
- Frost weathering at high altitudes contributes to rockfalls that increase the risk of injuries and death.
- Heavy rainfall combined with high altitude contributes to landslides that weaken rocks and increase the risk of injury.
- Steep, sparsely-vegetated cliffs and escarpments increase the risk of rockfalls that destroy property and lives, worsened by deforestation and overgrazing.
- Sparse vegetation, due to overgrazing, weakens the binding effect of roots, so loose, weathered soils on the slope can easily be washed away.
- Numerous narrow gorges channel rainwater during heavy rains, leading to flash floods that claim people's lives and property.
- Earthquakes in some highland regions trigger landslides that may lead to death.
- Some volcanic highland regions experience volcanic eruptions, lava flows and ash fall, which may trigger landslides and cause death. **✓ Lu4**

Characteristics of steep highland slopes

- Heavy rainfall on the windward side **✓ CK**
- Glaciers, due to high altitude **✓ CK**
- Thin, infertile soils **✓ CK**
- Few, fast-flowing rivers **✓ CK**
- Bare rock **✓ CK**

Effects

- Accelerated soil erosion **✓ CU**
- Landslides and floods **✓ CU**
- Avalanches **✓ CU**
- Death of communities, and sometimes of people **✓ CU**

Solutions / measures to avoid disasters

- Terracing **✓ AP**
- Growing cover crops **✓ AP**
- Relocating settlements away from high-risk slopes **✓ AP**
- Planting trees / afforestation **✓ AP**
- Building water diversion channels **✓ AP**

- Contour ploughing ✓ **AP**

Item 4(a) — Identify and Describe the Feature (Delta)

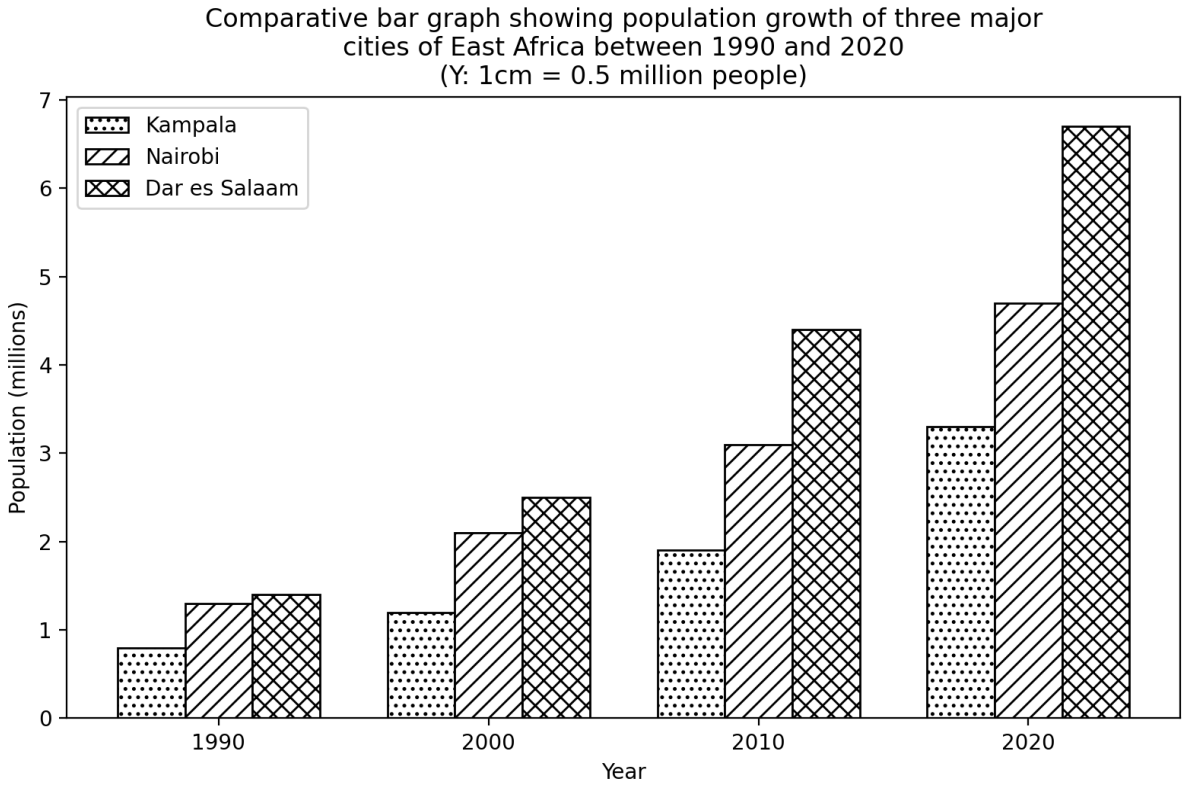

- The feature is a delta. ✓ **Ck**
- A delta is a low-lying depositional feature found at the mouth of a river.
- It forms when sediments/alluvium/silt deposited in the lower stage of a river settle due to the reduced speed of the river. ✓ **AP**
- The material is deposited because the river divides into smaller channels called distributaries.
- Continued deposition further reduces the river's speed and leads to the delta building up, and to the growth of swamp vegetation. ✓ **AP**

Marks: Ck=01, Ap=05

Item 4(b) — Importance of a Delta

- Deltas have forests that promote timber and pole production, used in the construction of houses and also sold to earn income. ✓ **AP**
- The delta region has fertile alluvial soil that promotes crop cultivation, hence increased income. ✓ **AP**
- Mining in the delta area promotes revenue. ✓ **AP**
- The vegetation in the delta region promotes tourism, hence earning foreign exchange. ✓ **AP**
- The land between distributaries has fertile soil, promoting settlement. ✓ **AP**
- The delta region's forests support wildlife, which promotes tourism. ✓ **AP**
- The delta promotes fishing, creating employment. ✓ **AP**
- The distributaries provide better/improved water supply for communities. ✓ **AP**
- The delta area has extensive land that promotes urbanisation and settlement. ✓ **AP**
- A variety of fish species and wild animals in the delta region create employment through fishing and related activities. ✓ **AP**

Item 5(a) — Comparative Population Graph

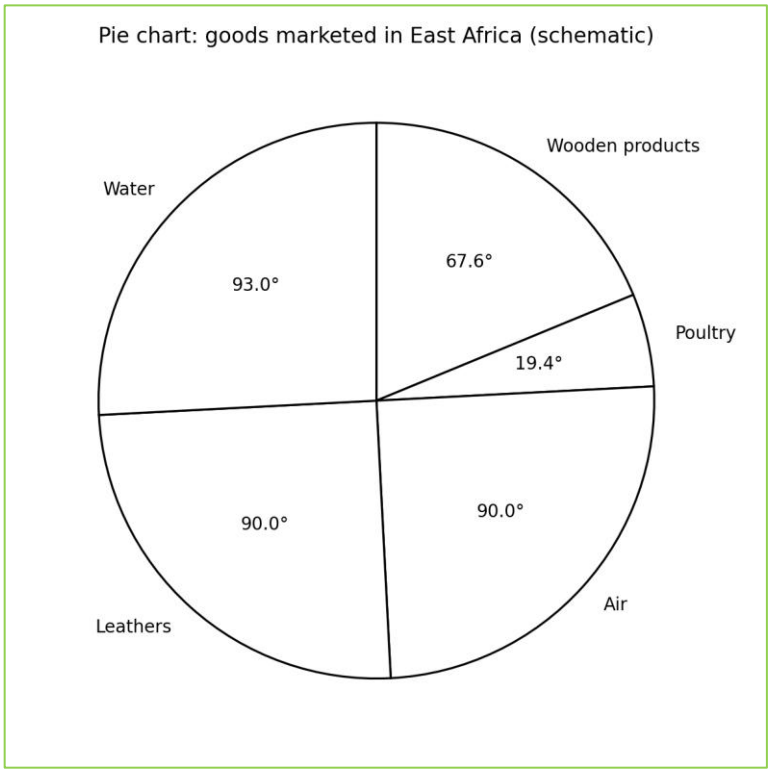

Comparative bar graph showing population growth of three major cities of East Africa between 1990 and 2020 (Y: 1cm

Item 5(b) — Measures to Address Urban Development Challenges

- Enforce laws on urban development, e.g. controlling illegal construction, to reduce slum development and ensure the safety of urban dwellers. ✓ **AP**
- Create green belts in urban areas to reduce air pollution and improve the urban environment. ✓ **AP**
- Plant trees/forests to reduce air pollution and promote afforestation. ✓ **AP**
- Encourage recycling and proper disposal of waste, enabling scavenging youth to earn an income. ✓ **AP**
- Provide skilling programmes for the youth (e.g. carpentry, tailoring) so they can earn an income and reduce unemployment. ✓ **AP**
- Construct industries that employ the youth in urban areas, improving their incomes and standard of living. ✓ **AP**
- Improve access to clean water and other sanitation facilities. ✓ **AP**
- Construct more schools and health centres at village level to ensure better health and decongest existing urban facilities. ✓ **AP**
- Provide street lighting and community security programmes to secure dark spots and homes. ✓ **AP**

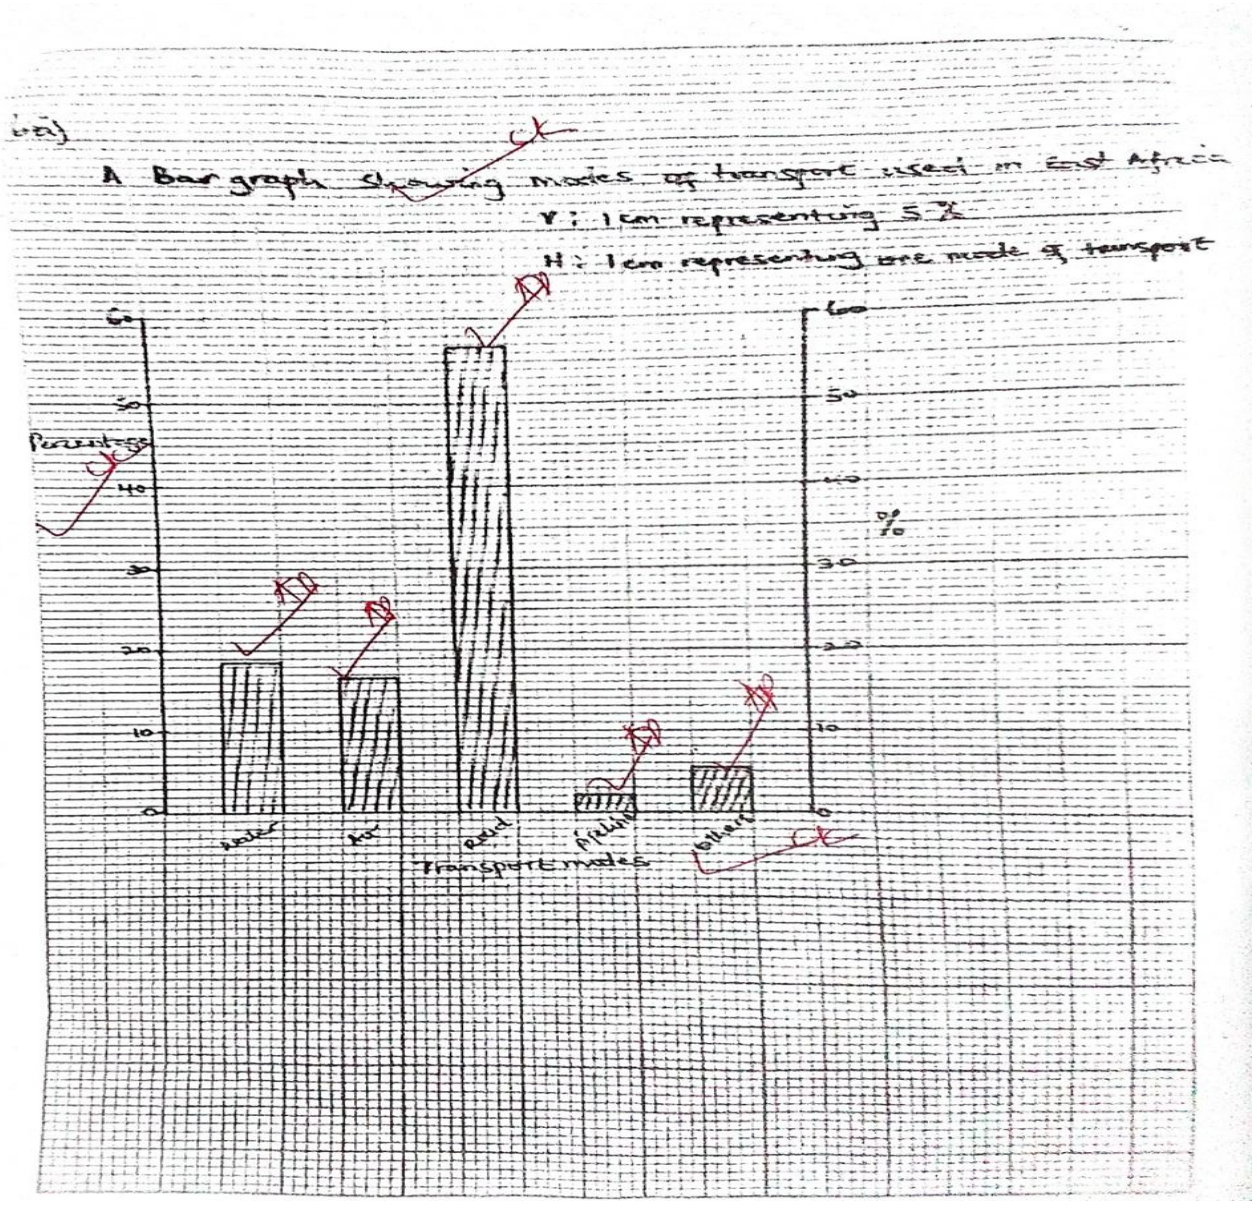

- Deploy more security personnel, like police, to ensure security in urban areas. ✓ **AP**
- Construct and upgrade urban infrastructure, like roads, to reduce traffic congestion. ✓ **AP**

Item 6(a) — Pie Chart of Goods Marketed

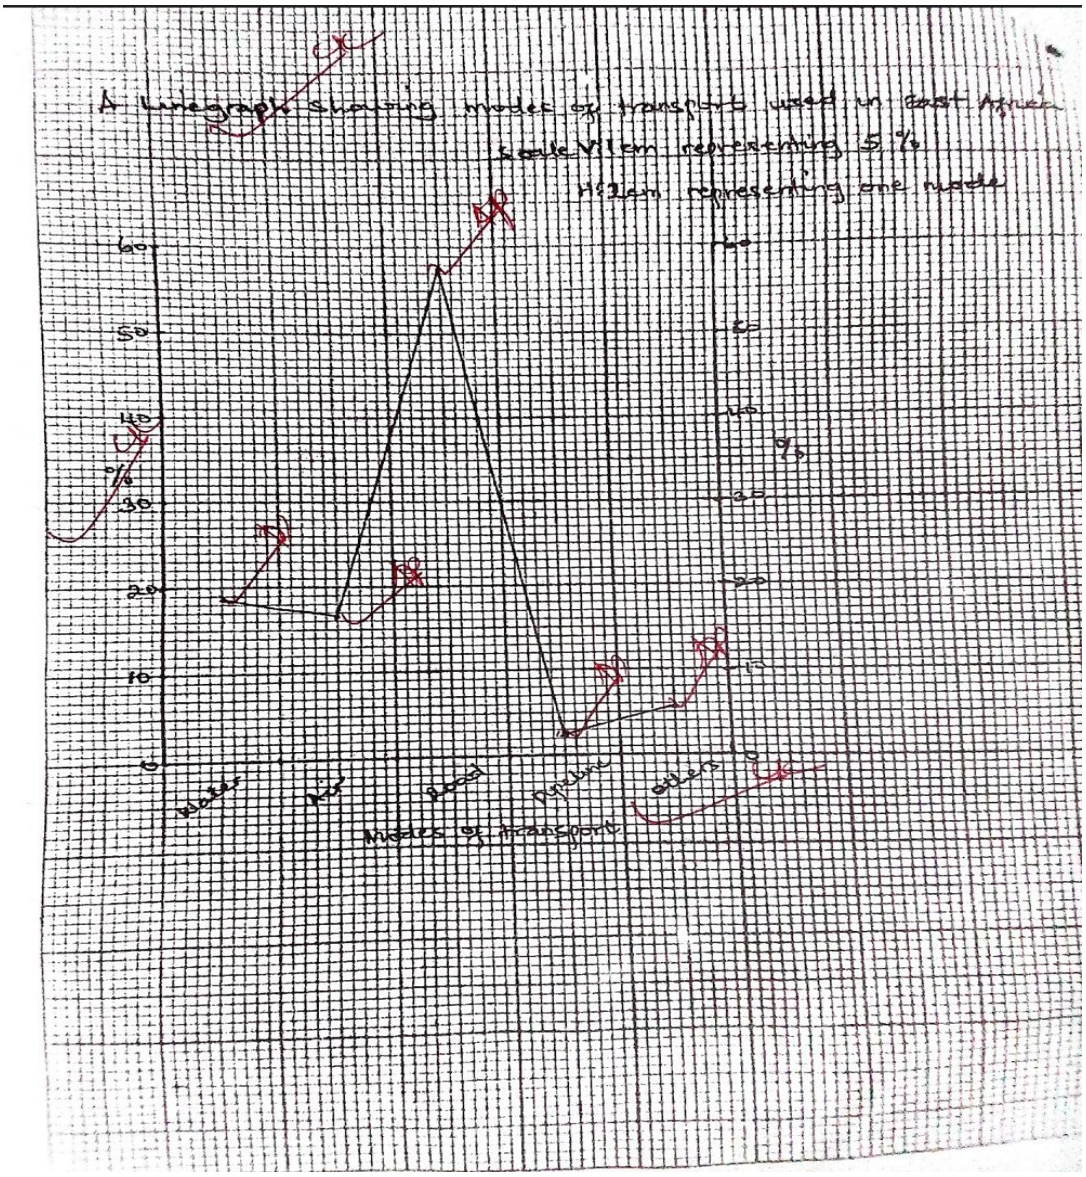

Pie chart showing goods marketed in East Africa.

Item 6(b) — Bar Graph of Modes of Transport

Bar graph showing modes of transport used in East Africa (V: 1cm = 10%, H: 1cm = one mode).

Item 6(c) — Line Graph of Modes of Transport

Line graph showing modes of transport used in East Africa (V: 1cm = 10%, H: 1cm = one mode).

Uganda certificate of education scoring guides for joint mock examination 2026

CHRISTIAN RELIGIOUS EDUC. (CRE)

223/1

CRE 223/1

ITEM 1

1a) Explain the nature of God according to Christians today as reflected in the Bible text above.

- God is a forgiver according to Christians today. Christians today seek for God's forgiveness while praying. This is reflected in the Bible text above which states that "But you forgive us, so that we should stand in the awe of you."
- God is loving according to Christians today. Christians today, e.g. born against testify about God's love whenever they go for fellowship. God's love is manifested through providence, protection against calamities, accidents, etc. This is reflected in the Bible text above which states that "Israel, trust in the Lord because his love is constant and he is always willing to save his people Israel from their sins."
- God is a savior according to Christians today. Christians today call upon God to save them from all forms of challenges/troubles while praying. This is reflected in the Bible text above which states that "Israel, trust in the Lord because his love is constant and he is always willing to save his people Israel from their sins."
- God is a helper according to Christians today. Christians today seek for God's help in case of danger through prayer. This is reflected in the Bible text above which states that "I wait eagerly for the Lord's help, and in his word, I trust."
- God fulfills his promises according to Christians today. Today, Christians present their prayer requests to God and patiently wait for Him to answer their prayers. This is reflected in the Bible text above which states that "I wait for the Lord more eagerly than watchmen wait for the dawn."

1b) Explain the Islamic beliefs about God that are similar to those in the Bible text above.

- Islam presents God (Allah) as a forgiver. Muslims, while praying, call upon God (Allah) to forgive them their sins. Similarly, the Bible text above states that "But you forgive us, so that we should stand in the awe of you."
- Islam presents God (Allah) as a loving God. Muslims today attribute the provision of life, daily needs, protection, and success in one's endeavors to God. They therefore call for His love through prayers. This is similar to the Bible text above which states that "Israel, trust in the Lord because his love is constant and he is always willing to save his people Israel from their sins."
- Islam presents God (Allah) as a savior. Today, Muslims believe that God saves them from all sorts of challenges and evil and they often call upon Him to save them from their sins. Similarly, the Bible text above states that "Israel, trust in the Lord because his love is constant and he is always willing to save his people Israel from their sins."

- Islam presents God (Allah) as a helper. Muslims today believe that God helps them through difficult times by giving them strength, He guides them on how to live righteous lives, He provides them with basic needs and protects them from danger and all sorts of evil. This is similar to the Bible text above which states that "I wait eagerly for the Lord's help, and in his words I trust."

Item 2

2a) Explain christian teachings that can stabilize the marriage in the scenario above.

- Christianity calls for love of one another. For example, one of the greatest commandments states that “Love your neighbour as you love yourself.” Alex should therefore love his wife Manjerina. Loving her will make him change and he will stop beating her before her in-laws. Hence stability of the marriage in the scenario above.
- Christianity calls for permanency in marriage, e.g. it is stated in the book of Mark 10:9 that no human being then must separate what God has joined together. Manjerina should therefore stay in a permanent marriage relationship. This will enable her drop the idea of filing for divorce, hence stability of the marriage in the scenario above.
- Christianity calls for monogamy, e.g. during the creation, God created one man and one wife. Alex should therefore embrace monogamy. Embracing monogamy will make Alex drop the second wife he married and concentrate on one wife, hence stability of the marriage in the scenario above.
- Christianity calls upon marriage partners to perform their marital duties. For example, it is stated in 1 Corinthians 7:3 that “a man should fulfil his duty as a husband and a woman should fulfil her duty as a wife, and each should satisfy each other's needs.” Alex should therefore perform his marital duties. Performing his marital duties will solve the problem of Alex failing to perform his marital duties, hence stability of the marriage in the scenario above.
- Christianity calls upon people to pray in case of problems. For example, it is stated in the Bible that “ask and you shall receive.” “Pray unceasingly “Manjerina should therefore pray. Praying will enable her get a child, hence stability in the marriage in the scenario above.
- Christianity calls upon people to fast in case of problems. For example, in the bible, Jesus fasted for forty days and nights and this enabled him to overcome temptations. Manjerina should therefore fast. Fasting will enable her get her own matrimonial home hence stability of the marriage in the scenario above

2b) Why do many Ugandan husbands and wives behave in ways that are similar to those in the scenario above?

- Sexual dissatisfaction is one of the reasons why many Ugandan husbands and wives today behave in ways that are similar to those in the scenario above. Some husbands today are dissatisfied by their wives. They therefore marry other wives to satisfy them sexually. This

is similar to the scenario above where Alex suddenly changed his behaviour and married another wife.

- Limited time in courtship. Today many Ugandan wives rush into marriage. They do not take enough time to study their intending marriage partners. This causes sudden change of behaviour and they are subjected to domestic violence. This is similar to the scenario above where Alex suddenly changed his behaviour and started beating his wife before her in-laws.

- Accumulation of wealth. Today many Ugandan husbands disrespect their wives after accumulating a lot of wealth and treat them as inferior. This is similar to the scenario above when Alex suddenly changed his behaviour and started disrespecting his wife by beating her before her in-laws.

- Marital unfaithfulness of some Ugandan husbands. Today some Ugandan husbands deny their wives conjugal rights after marrying other women. This is similar to the scenario above where Alex suddenly changed his behaviors, married another wife and stopped performing his marital duties.

- Bad peer influence. Today some Ugandan wives are misled by their peers in case of marriage disagreements and are influenced to divorce. This is similar to the scenario above where manjerina dropped her love and she is now firing divorce.

Item 3

3a) Explain the Christian teachings Mukisa can use to overcome the problems he is faced with.

- Christianity calls upon people to pray in case of problems. For example, it is stated in the book of Daniel 9:3-4 that "And I prayed earnestly to the Lord God, pleading with him, fasting..." Mukisa should therefore pray to God; praying will return the customers, who will in turn boost the business.
- Christianity calls upon Christians to fast in case of problems. For example, Jesus fasted for 40 days and nights, and this enabled him to overcome temptations. Mukisa should therefore fast. Fasting will increase his savings.
- Christianity teaches monotheism. For example, one of the Ten Commandments calls upon Christians to worship one true God. Mukisa should therefore worship one true God. Worshiping one true God will enable him to drop the option of going to a witch doctor for a charm to boost his business.

- Christianity teaches hard work. For example, it is stated in the book of 2 Thessalonians that "whoever refuses to work is not allowed to eat." Mukisa should therefore work hard. Working hard will enable him to get money that will enable him to pay rent...
- Christianity teaches patience. For example, in the Bible, Job, after losing all his property, patiently waited for God to restore his property. Mukisa should therefore be patient. Being patient will enable him to overcome the problem of decline of the business.
- Christianity teaches us to seek guidance from rightful people in case of challenges. For example, the Old Testament prophets often sought for guidance from God whenever they were challenged. Jesus often sought for guidance from God in case of challenges. Mukisa should therefore seek for guidance from God. Seeking for guidance will enable him to come up with rightful ways of boosting his business other than going to the witch doctor.

3b) Explain the contemporary approaches Mukisa can apply to solve the challenges in the scenario above.

- Mukisa should carry out market research. This is done by reaching out to the customers and investigating their preferences and finding out why they have lost interest in his goods. Carrying out market research will enable him solve the problem of decline of his business.
- Mukisa should rebrand his business. This is done by designing new packaging bags, putting up new logos, changing the advertising style, changing the business name, etc. Re-branding the business will attract more customers, regain old customers, and compete more effectively, hence solving the problem of losing customers.
- Mukisa should improve on customer care. This is done by welcoming customers with warm greetings, appreciating their services, giving them after-sales services like replacing a faulty product, teaching customers how to use a product, and following up the customers to know if they are satisfied with the products, etc. Improving on customer care will attract more customers and regain old ones, and this will enable Mukisa to acquire more profits that will be used to save hence solving the problem of low savings.
- Mukisa should advertise his business. This is done by taking pictures/photos and videos of his products and posting them on social media platforms like TikTok, WhatsApp status, Instagram, and Facebook. Such pictures and videos indicate the prices of commodities, location, and how customers can order them. Advertising his business will attract many customers, and this will enable him to out compete his neighbor's business.
- Mukisa should reduce the prices of his goods. This is done by giving discounts and promotional offers like "buy two items and get one free." Reducing the prices of goods will attract more customers, which will increase his income, and it will make him drop the idea of going to a witch doctor to boost his business.

- Mukisa should improve on the quality of his goods. This is done by supplying products that are attractive, safe, and reliable. Improving on the quality of goods will restore customers' confidence, improve the business's reputation, and make him drop his friends' advice of visiting a witch doctor.

ITEM 4

4a) How can the Bible teaching on the use of wealth guide Mr Balinda on how to use his wealth appropriately?

- The Bible teaches us to use our wealth while giving back to God. For example, Abel offered to God the best lamb of his sheep (Genesis 4:4). Mr Balinda should therefore use his wealth to give back to God to get blessings, other than spending his wealth lavishly on alcohol.
- The Bible teaches us to use our wealth offering charity. For example, in the Bible, Tabitha (Dorcas) spent all her time doing good and helping the poor, i.e. she made clothes and gave them to the widows. Mr Balinda should therefore spend his wealth helping the poor with basic needs to give them hope, other than spending his wealth lavishly on sport betting.
- The Bible teaches us to spend our wealth building places of worship, e.g. King Solomon spent his wealth building the Temple of Jerusalem. Mr Balinda should therefore spend his wealth building places of worship like churches to strengthen his relationship with God, other than spending his wealth lavishly in homosexuality with his employees.
- The Bible teaches us to spend our wealth sharing our belongings with others, especially those who do not have. For example, the believers in Acts 4:32-35 sold their property, brought the money to the apostles, and it was distributed to each one according to his need. Mr Balinda should therefore take his wealth to the church to be served to those in need.This will strengthen his relationship with God, other than spending it lavishly on alcohol.
- The Bible teaches us to spend our wealth while supporting God's servants, especially those on missionary journeys. For example, in the Bible, the Philippians gave financial support to Paul when he was preaching the good news (Philippians 4:15-16). Mr Balinda should therefore spend his wealth facilitating church activities and missionary journeys for spiritual enrichment, other than spending his wealth lavishly in strip clubs watching strip dancing.

4b) Explain the African traditional ways of acquiring wealth that are different from those in the scenario above.

- Traditional Africans acquired wealth through the payment of taxes and tributes. For example, among the Banyoro of western Uganda, the kings and chiefs accumulated a lot of wealth through the payment of taxes and tributes that came in form of crops, livestock

and other goods that were collected from tributary states. This is different from the scenario above where Mr Balinda acquired wealth by evading tax payment.

- Traditional Africans acquired wealth through trading. For example, the Banyoro of western Uganda exchanged their goods, like iron tools and food, with their neighbouring communities. This is different from the scenario above where Mr Balinda accumulated wealth through human trafficking.

- Traditional Africans acquired wealth through receiving gifts. For example, among the Baganda of central Uganda, the hardworking chiefs were appreciated by giving them land. This is different from the scenario above where Mr Balinda acquired wealth by grabbing the neighbours' land.

- Traditional Africans acquired wealth through inheritance. For example, among the Basoga, the children, especially boys, inherited their father's property like land. This is different from the scenario above where Mr Balinda acquired wealth through armed robbery.

- Traditional Africans acquired wealth by making handcrafts. For example, the Acholi of northern Uganda made pots that were exchanged for other goods. This is different from the scenario above where Mr Balinda acquired wealth by asking for bribes from those who wanted to work at his company.

ITEM 5

5a) How does the Bible text above teach Christians today on preventing conflicts?

- The Bible text above teaches Christians today to prevent conflicts by seeking for guidance from rightful people. It states that "Then Peter came to Jesus and asked, 'Lord, if my brother keeps on sinning against me, how many times do I have to forgive him?'" Therefore, Christians today should seek for guidance from rightful people in case of any disagreement. Seeking for guidance will enable them make a rightful decision on how to end such disagreements, hence preventing conflicts.

- The Bible text above teaches Christians today to prevent conflicts by forgiving those who offend them. For example, in the Bible text above, the king felt sorry for the servant who had failed to pay his debt, forgave him and let him go. Christians should therefore forgive those who offend them. Forgiving the offenders will promote love among the conflicting parties, hence preventing conflicts.

- The Bible text above teaches Christians today to prevent conflicts by being patient with the people who owe them money/debtors. It states that "Be patient with me and I will pay you everything." Christians should therefore be patient with their debtors by giving them time to pay their debts. Being patient with them will promote forgiveness, thereby preventing conflicts in society.

- The Bible text above teaches Christians today to prevent conflicts by listening to those they owe money. For example, it is stated in the Bible text above that the king listened to the servant who had failed to pay his debt when he begged him to be patient with him and

forgave him his debt. Christians should therefore listen to the people they owe money. Listening to them will enable the creditors understand the debtors' economic challenges and know the period when they are to recover their money, hence preventing conflicts.

5b) Why do some Ugandans today find it challenging to apply the message in the Bible text above while solving conflicts?

- The desire to revenge. Some Ugandans today feel that evil should be solved by evil. Such Ugandans end up administering any punishment of their choice to the offender. They therefore find it challenging to apply the message in the Bible text above, where the king felt sorry for the servant who had failed to pay his debt, forgave him his debt and let him go. /Or they find it challenging to live according to the teaching in the Bible text above which states that "The king felt sorry for him, so he forgave his debt and let him go."
- Fear of losing their money. Today, some creditors do not listen to their stubborn debtors via non-payment of loans or delayed payment of loans. Such creditors take their debtors to courts of law and other authorities to ease the recovery of their money. This makes it challenging to apply the message in the Bible text above, where the king listened to the servant who had failed to pay his debt, forgave him his debt and let him go.s
- Pride/arrogance. Some Ugandans today feel that they are above everyone and feel that they can make independent decisions. This makes it challenging to apply the message in the Bible text above where Peter sought for guidance from Jesus on what to do when a brother keeps on sinning against him.
- Impatience. Some Ugandan creditors today are too strict on loan payment days/ dates and they are never ready to hear any explanation in line with delayed payments. This makes it challenging for such creditors to apply the message in the Bible text above which states that "Be patient with me," he begged, "and I will pay you everything."

ITEM 6

6a) How should justice be promoted in the light of the Bible text above?

- Justice should be promoted by seeking for guidance and counselling from rightful people. Today, people who are subjected to injustices of various forms look for personalities in various fields and share with them the injustices they are experiencing. Seeking for guidance and counselling will enable them make a clear decision of how to solve such injustices. This is in light of the Bible text above where the two prostitutes who were claiming for the ownership of the child sought for guidance from King Solomon.
- Justice should be promoted by listening to the conflicting parties. This is done by calling upon the conflicting parties for a dialogue.Listening to the conflicting parties will enable them settle their differences amicably. This is in light of the Bible text above where King Solomon listened to the two prostitutes and he was able to identify the rightful owner of the child.

- Justice should be promoted by being honest/truthful. This is done by explaining what exactly happened at the scene in courts of law or to the authorities whenever there is need.Being honest will make the weak feel loved. This is in light of the Bible text above where one of the prostitutes exhibited honesty by explaining to King Solomon how the woman who had smothered her baby took her son and placed the dead child in her bed.
- Justice should be promoted through fair judgment. This is done by critically listening to the conflicting parties and passing a verdict without taking a side, as this will give hope to the oppressed and ensure fair judgment. This is in light of the Bible text above when King Solomon gave the child to the rightful mother after listening to the two prostitutes.

6b) Explain the dangers that are likely to arise if Christians go against the teachings in 1 Kings 3:16-27 (GNB).

- Wars are likely to arise. War will result into bloodshed. If Christians go against the teachings in the Bible text above which calls upon Christians to promote justice by listening to conflicting parties.
- Imprisonment of the innocent. This will result into suffering in jail. If Christians go against the teachings in the Bible text above which calls upon Christians to promote justice by being honest/truthful.
- Mob justice. This may result into loss of lives and destruction of property. If Christians go against the teachings in the Bible text above which calls upon Christians to promote justice through fair judgment .
- Wrong decision making. This may result into enmity. If Christians go against the teachings in the Bible text above which calls upon Christians to promote justice by seeking guidance and counselling from rightful people.

ISLAMIC RELIGIOUS EDUC. (IRE)

225/1

ISLAMIC RELIGIOUS EDUCATION 225/1

SECTION A

Item 1.

Swaibu of kantela village has a friend whose father is a priest. His friend always invites him to attend evening prayer services at his father's church. The services are characterized by singing which Swaibu seems to enjoy. He also makes offerings to the church and was convinced by his friend to buy a rosary for protection and blessings. He now speaks about some practices in Islam as being hard to practice. When the village Imam got to know about all this he invited Swaibu for guidance.

Task: a) Explain Islamic teachings that can help Swaibu improve his ways of worship according to the above scenario.

Swaib should pay Sadaqah (voluntary charity) and Zakat, ensuring his intentions are purely to please Allah. (CK) Giving financial offerings or charity (Sadaqah) is highly encouraged in Islam, but it must be directed to Islamic avenues (the poor, mosques) for the sake of Allah alone, not to churches or non-Islamic religious practices. The Quran in Surah Al-Baqarah 2:43 says "*And establish prayer and give Zakat and bow with those who bow (in worship and obedience).*" (CU) If Swaib previously gave money meant for Zakat to a church, he needs to calculate that amount and pay it again to proper Islamic channels (like poor Muslims or local mosques) so his obligation is truly fulfilled. (AP)

Swaib should be introduced to the melodious recitation of the Quran, attending Halaqas (Islamic study circles), and engaging in Dhikr (remembrance of Allah) (CK). This provides genuine tranquility because he enjoys auditory and community worship. Replace church singing with the beauty of Islamic remembrance. (CU) Instead of listening to church singing or music, Swaib can listen to the peaceful and emotional recitation of the Quran by renowned reciters.

This fulfills his love for beautiful sounds while filling his heart with the words of Allah. (AP) The Imam should remind Swaib that Allah intends for you ease and does not intend for you hardship (CK). This is found in the Quranic principle in Surat Baqarah 2:185 that; "*Allah intends for you ease and does not intend for you hardship.*" (Surah Al-Baqarah, 2:185) He should be taught to take small, consistent steps in his prayers (Salah) and focus on the spiritual relief and physical discipline it brings, rather than viewing it as a burden. (CU) This will help address Swaibu's complaint that Islam is "hard to practice." (AP)

Swaib should manage Peer Pressure while staying kind to his friend. He should firmly decline invitations to non-Muslim religious services. (CK) The Prophet (PBUH) said: "*A man is upon the religion of his best friend, so let one of you look at whom he befriends.*" (Sunan al-Tirmidhi) (CU) Following the advice of the Prophet (PBUH), Swaib should choose close friends who respect and support his Islamic values, helping him stay strong in his faith. (AP)

Swaibu should seek protection through the Mu'awwidhatayn (Surah Al-Falaq and Surah AnNas) and Ayat al-Kursi before sleeping and leaving the house. (CK) He should use his

fingers to make authentic Islamic remembrances for blessings. "*The Prophet (PBUH) used to count the tasbih (praises) on his right hand.*" (Sunan Abi Dawud) instead of using a rosary. When praising Allah (Dhikr), Swaibu should follow the exact practice of the Prophet (PBUH) by counting his praises on the fingers of his right hand rather than using a rosary or prayer beads. (CU) By weaving these short recitations and finger-counting habits into his waking and sleeping routines, Swaibu will easily protect his faith and draw closer to Allah every single day instead of using a rosary for protection and blessings. (AP)

b) How do the practices in the scenario differ from those in Islam. Swaibu is attending evening services at a church and making financial offerings there as a way of worship (CK) while in Islam worship (*Ibadah*) and religious offerings must be dedicated exclusively to Allah within an Islamic framework. (AP) Making financial offerings to a church compromises a Muslim's *Tawheed* (monotheism), as those funds support doctrines that contradict the absolute oneness of Allah. Islamic offerings are given as Zakat (obligatory) or Sadaqah (voluntary charity) to the needy or for Islamic causes. **(CU)**

In the scenario Swaibu was convinced to buy a rosary under the belief that the object itself would grant him protection and blessings **(CK)** while in Islam, relying on a physical object (like a rosary, amulet, or charm) for divine protection is viewed as Shirk (associating partners with Allah). (AP) Islam teaches that protection and *Barakah* (blessings) come from Allah alone. A Muslim seeks protection actively through words and faith—by reciting the Quran (such as *Ayat al-Kursi* or *Surah Al-Falaq* and *Al-Nas*) and making *Du'a* (supplication). **(CU)** In the scenario the evening services are characterized by singing, which Swaibu "seems to enjoy." **(CK)** This relies heavily on emotional highs, music, and entertainment to feel a spiritual connection. (CK) which is different from Islamic worship which is rooted in spiritual discipline, submission, and tranquility (*Sakeenah*). (AP) Islam features the beautiful, melodious recitation of the Quran, it strictly prohibits mixing musical entertainment with formal worship. Prayers (*Salah*) involve structured, physical, and mental submission to Allah five times a day, prioritizing long-term spiritual growth over temporary emotional excitement. (CU)

In the scenario Swaibu finds the church environment easy and enjoyable, which has led him to complain that Islamic practices are "hard to practice." (CK) which is different from Islam that requires personal discipline (waking up early for *Fajr*, fasting in Ramadan, etc.), which can feel challenging to someone drifting away from faith. (AP) However, Islamic theology emphasizes attainable consistency rather than impossible hardship. The Prophet Muhammad taught that "*the religion is easy*," and rules are relaxed during times of genuine hardship (e.g., praying while sitting if sick, or breaking fast while traveling). (CU)

Item 2.

"*O mankind, fear your Lord, who created you from one soul and created from it its mate and dispersed from both of them many men and women. And fear Allah, through whom you ask one another, and the wombs. Indeed Allah is ever over you an observer.*" Surat An-Nisa 4:1.

Task a) Examine the guidance in the above text in regard to respect to human life, marriage and family.

The verse guides that all humanity was "created from one soul," emphasizing that every human being shares a common origin. (CK) This teaches that all people are fundamentally equal in dignity regardless of race, tribe, colour, or status. Since life comes from Allah the Creator, human life is sacred and must be respected. No one has the right to unjustly take a life. (CU) This guidance is taken from the text where it says that: "*O mankind, fear your Lord, who created you from one soul...*" (AP)

The text guides mankind to fear and respect Allah. (CK) The repeated command to "fear your Lord" reminds people that Allah is "ever over you an observer." This awareness that God watches all actions encourages people to treat one another justly and avoid harm. This also includes marriage and family where when the spouses and family members fear Allah they will treat each other well. (CU) This is reflected in the text that: "*And fear Allah, through whom you ask one another,.....*" (AP)

The text guides on equality and brotherhood (CK) Because all people descended from one soul, humanity forms a single family. This discourages pride, discrimination, and oppression, promoting unity and mutual respect. The acknowledgment that humanity was "dispersed from both of them many men and women" fosters a sense of global kinship. It guides individuals to view others not as strangers or enemies, but as extended members of the same human family, deserving of compassion and justice. (CU) This guides in respect to human life where it says "*.....created from it its mate and dispersed from both of them many men and women.....*"

(AP)

The text guides that marriage is a natural and divinely ordained relationship. (CK) The verse mentions that marriage is part of Allah's design when it mentions that Allah created from it its mate. The creation of the mate emphasizes that spouses are meant to be companions and partners, complementing one another and finding comfort together. Through marriage, Allah "dispersed from both of them many men and women." This shows that marriage is the legitimate means for procreation and the continuation of the human race. (CU) This is reflected in the text where it says; "*.....created from its mate.....*" (AP)

On the guidance of family, the verse traces the entire human population back to a single couple. (CK) It teaches that the family is the foundation of society and the source from which communities grow. The command to fear Allah "and the wombs" (*al-arham*) stresses the importance of maintaining kinship relations. Blood ties and family bonds are sacred and must be honored, not severed. (CU) This is reflected in the text that: "*.....And fear Allah, through whom you ask one another, and the wombs.....*" (AP)

Divine Accountability in Family Affairs: The verse ends with, "Indeed Allah is ever over you an observer." (CK) This serves as a powerful reminder that how one treats their spouse, children, and extended family is being watched by God. Injustices within the private sphere of the home—such as neglecting the womb (family ties), mistreating a spouse, or failing to

provide for children—do not escape divine observation. (CU) This is in line with the part of the text that says: "*Indeed Allah is ever over you an observer.*" (AP)

b) How are the teachings in the above text abused in society? The teachings are abused through discrimination and Tribalism (CK): Some people claim they follow this text, but they still act as if their own tribe, family, or social class is "better" than others. They abuse the text

by creating "us vs. them" groups, treating people from other backgrounds as if they are not part of that "one soul." (CU) This goes against the part of the text that says: "*.....who created you from one soul.....*" (AP)

There is gender Inequality in society (CK): Some men use the idea of "one soul" to claim that they are the "original" human and that women are just an "accessory" or a "side creation." They use this to treat women as second-class citizens, ignoring the part of the verse that says both come from the same origin. (CU) This also goes against the part of the text that says:

"*.....who created you from one soul.....*" (AP)

The teachings in the text are abused through ignoring the rights of the vulnerable (CK): People often talk about "protecting the family" but use it as an excuse to silence women or young people. For example, if a girl is being mistreated at home, an abuser might tell her, "You must obey because of family honor (the wombs)." They use the idea of "family ties" to force someone to stay in an abusive situation. This is against the teaching in the verse that says: "*And fear Allah, through whom you ask one another, and the wombs.....*" "the wombs" refers to family ties and kinship. It means we have a duty to take care of our relatives, look after orphans, and protect our family members. (CU)

The teachings are abused through Corruption and Nepotism (CK): Sometimes people take this verse to mean, "I must favor my own family members above everything else." They use this to justify corruption, like giving jobs or money to their relatives instead of the people who actually deserve it, even if it is unfair to the rest of society (CK). This is against "*And fear Allah, through whom you ask one another and the wombs.....*" (AP)

Its abused through scaring people into obedience (Spiritual Gas lighting) (CK): People in power such as husbands, teachers, or community leaders sometimes use this phrase to stop others from asking questions. If a person stands up for their rights, the person in power might say, "You should fear God and stop questioning me." This is an abuse of the text because it uses God's name to silence someone and stop them from seeking justice. This abuses the part of the text that says "*And fear Allah, through whom you ask one another, and the wombs.....*" (AP) Society focuses on fear rather than fairness (CK): Many people talk a lot about "fearing God" but completely ignore the part of the verse that says you must be fair to others. They act very 'religious' in public, but treat their family or workers very badly in private (CU). This is against the teaching in the text that says "*Fear your Lord.*" To "fear your Lord" is a reminder to be honest, fair, and kind. It means that because God is watching, you should not lie, cheat, or bully others. (AP)

Giving "Moral Police": Instead of using this teaching to check their own behavior, some people use it to judge others (CK). They spend all their time watching and gossiping about how other people dress or behave, claiming that God is "watching" them. This creates a society where people are afraid to be themselves because they are being judged by neighbors, rather than focusing on their own character (CU). This is against the teaching that: "*Indeed Allah is ever over you an observer.*" This is a comfort for those who are suffering (that God sees their pain), and a warning to those who are bullies (that they cannot hide their bad actions) (AP)

SECTION B

This section has two parts I and II
Part I
Answer one item from this part

Item 3.

At Kigona village is a private school that employs a good number of teachers who often report late for work, do work of poor quality, they also often complain of too much work, and they barely listen to the junior administrators. They also sometimes sell part of the school property such as laboratory apparatus, boxes of chalk and electric extensions whenever the salary delays.

The teachers' conduct has led to the poor academic performance of the learners in the school. At the end of the term the Directors and Head teacher complain about the learner's performance but nothing changes.

Task: Basing on the scenario, explain:

a) the Islamic teachings that should guide the teachers.

Teachers must fulfill their duties honestly, regardless of whether their salaries are delayed (though the school also has an obligation to pay on time) (CK). In Islam, employment is a binding contract, and work is a trust (*Amanah*). Late coming, poor quality work, and stealing school property are severe breaches of this trust. The Quran says: "*O you who have believed, fulfill [all] contracts.*" (Surah Al-Ma'idah, 5:1). It also says: "*Indeed, Allah commands you to render trusts to whom they are due...*" (Surah An-Nisa, 4:58). From the Hadith: The Prophet Muhammad emphasized that breaching trust is a sign of hypocrisy "*The signs of a hypocrite are three: Whenever he speaks, he tells a lie; whenever he promises, he breaks his promise; and if he is entrusted, he proves dishonest.*" (Sahih Al-Bukhari) (CU). When teachers execute their professional duties with absolute honesty, excellence, and diligence, regardless of external challenges such as delayed compensation, they will not commit vices such as late coming to school. (AP)

The teachers must do their work to the best of their ability. Islam demands that when a person undertakes a job, they must do it to the best of their ability. (CK) Delivering poor

quality work while complaining about the workload violates the Islamic concept of Ihsan (perfection/excellence). From the Hadith: The Prophet said: "*Verily, Allah loves that when any of you does a job, he does it perfectly and with excellence.*" (Al-Mu'jam al-Awsat) (CU) When the teachers understand the Islamic teaching that when a person undertakes a job they must do it to the best of their ability, the standard of service delivery will be elevated, and thus the students will receive the highest quality of work. (AP)

The teachers should protect school property and not sell it (CK). Selling school properties

(laboratory apparatus, chalk, extensions) because of a delayed salary is strictly prohibited. In Islam, two wrongs do not make a right. Taking property that does not belong to you is theft and consumes *Haram* (unlawful) wealth, which destroys the blessings (*Barakah*) in a person's life. From the Quran: "*And do not consume one another's wealth unjustly...*" (Surah Al-Baqarah, 2:188) From the Hadith: The Prophet Muhammad (PBUH) warned against taking what belongs to others: "*The blood, property, and honor of every Muslim is sacred to another Muslim.*" (Sahih Muslim) (CU) They must return or compensate for the stolen school property and seek forgiveness. (AP)

The teachers should have respect for Authority and Order. (CK) Refusing to listen to junior administrators creates chaos (*Fasad*) and breaks down the school hierarchy. Islam teaches respect for designated leadership, as long as they are not commanding something sinful. The Quran says: "*O you, who have believed, obey Allah and obey the Messenger and those in authority among you.*" (Surah An-Nisa, 4:59) (CU) When the teachers understand that Islam teaches respect for authority they will listen to the junior administrators. (AP)

The teachers should be accountable and show the Shepherd's Responsibility. (CK) Teachers are leaders and role models in the classroom. Their negligence directly causes the poor academic performance of the learners. Islam holds everyone accountable for those under their care. The Prophet (PBUH) said: "*Every one of you is a shepherd and is responsible for his flock. The leader of people is a guardian and is responsible for his subjects... and the employee is a guardian of his master's property and is responsible for it.*" (Sahih Al-Bukhari) (CU). When the teachers actively embrace their role as responsible leaders they will prioritize student success hence bettering learner's performance. (AP)

b) the ways in which the school's administration can improve on the situation in the school.

The school's administration must establish Salary Reliability (CK): Even if the school has

to pay in installments or renegotiate pay structures, salaries must be paid on a predictable, guaranteed date. If delays are absolutely unavoidable, communicate this before the due date, not after (CU). When the administration pays the teachers in time financial anxiety will be removed, enabling teachers to focus entirely on delivering excellence (*Ihsan*) in the classroom

(AP)

The school administration should create a system where teachers who show up on time, submit high-quality lesson plans, and improve student grades receive small bonuses or

public recognition. (CK) When hard work is noticed and rewarded, teachers feel valued and excited to do their jobs. Rewarding punctuality and careful planning helps teachers stay on time and organized. It encourages teachers to always do their very best work, matching the Islamic teaching to perform every task with excellence. (CU) When teachers are motivated learners will get better grades because they will be excited to do their work. (AP)

Administration must clearly communicate that any future theft will result in immediate termination and legal action (CK). There should be a Zero-Tolerance Policy on Theft: While delayed salary explains the desperation, stealing school property (chalk, lab apparatus) is a criminal offense. The policy must be in position to stop supply losses: Lab equipment, chalk, and other school tools stop disappearing, ensuring teachers always have what they need to teach. The school will no longer have to constantly waste money replacing stolen items. (CU) This will help create a Safe Workplace where staff and students feel safer knowing that dishonest behavior is not allowed or covered up. (**AP**)

The school's administration should empower the Junior Administrators (CK). The Directors and Head teacher must publicly back their deputy head teachers and department heads. If a teacher disrespects a junior administrator, the Head teacher must step in immediately to enforce disciplinary measures. The fact that teachers ignore junior administrators indicates a total collapse of the chain of command **(CU).** Teachers will respect deputy head teachers and department heads when there are swift consequences, thereby empowering junior administrators.

845/1

ENTREPRENEURSHIP 845/1

SECTION A

Item 1

(a) The selection of a suitable business opportunity to be based on the following features;

1. Identify the business opportunity
2. Presence of market
3. Low or moderate startup capital
4. Availability/related to one's skills
5. Reasonable return on ivestiment/profit
6. Ease of enry into the market
7. Leagallly acceptable in the community
8. Level of competition
9. Risks/cost involved
10. Growth potential
11. Government policy
12. Properly timed
13. Ability to meet entrepreneur's objectives

(b) Hajji Kamoga can increase the sales of his restaurant in the following ways;

1. Through selling food on credit to trustworthy customers
2. Offering cash discount (price off offers) .This involves selling the food at a slightly low price so as to attract or boost sales.
3. Using attractive packaging materials, for example aluminium foils for take away customers.
4. Giving free samples of food to customers when introducing new dishes to the market.
5. Giving premium or bonus offer for example, salads for free to whoever buys food.
6. Giving free coupons for food, especially on special days like Christmas.
7. Through offering after sales services e..g free delivery of food, free water, etc

8. Advertising of products in newspapers, radio,television, posters, sign posts. Banners, bill boards, electronic displays, calendars, brochures, etc
9. Providing free and convenient parking space ushers to customers, etc
10. Renovating of business premises so as to improve or their quality, for example, repainting them.
11. Sponsoring different activities, events and games where most people are involved so as to attract their attention e.g football, music festivals, health campaigns.
12. Ensuring proper customer car/good relationship with customers, for example, being polite to them
13. Offering good quality food to customers
14. Ensuring timely delivery of products to customers
15. Through developing an App for selling food online and making deliveries.

(b) Mabonga should undertake the following measures to improve the relationship with his employees;

1. Ensuring job security by provided appointment letters/job contracts to workers.
2. Giving fair and attractive payment/remuneration to workers' which is timely to minimize labour turn over.
3. Involving workers in decision making so that they feel the sense of belonging to the business.
4. Respecting workers in all ways ie genuine respect to the workers in business regardless of status.
5. Ensuring promotion of workers on merit without discrimination
6. Ensuring safety of the workers by providing a safe work place eng safety gadgets like gum boots, helmets, masks etc.
7. Providing a working environment that is conducive with necessary tools and equipments and free from unnecessary noise.
8. Providing period of rest like annual leave, maternity leave, sick leave etc
9. Handling workers' complaints in time.
10. Providing on job training so as to equip employees with the basic/required skills for effective performance.
11. Ensuring politeness in treating employees even when they are in the wrong.

Inside code Ge

Success criteria

5 or more =06

2-4 = 04

Item 4

(a) Annual gross rental income = rental income from all the buildings.

= 3 x 10,0000

=Ugx. 30,0000,000

Chargeable income: = annual gross rental income - threshold

=U**gx 30,000,000 -2,820,000**

= Ugx 27,180,000

Annual rental income tax = tax rate x chargeable rental income

=Ugx . 12/100 x 27,180,000

= Ugx. 3,261,600

Rental tax liability to URA = Annual rental tax x period

= Ugx. 3,261,600
x 4

(b) The good practices to be followed when managing and insuring his buildings include the following:-

- Register with and pay Rental income tax to Uganda Revenue Authority.
- Acquire clearance from the Municipal council Authorities before construction of the buildings.
- Construct using high quality construction materials.
- Utmost good faith ie declaring the true/correct value at the time of insuring.
- Insurable interest ie insuring only property that will cause financial loss himself not his neighbours.
- Proximate cause ie comparing the cause of loss to risk insured against before claiming for compensation.
- Loss minimization by taking all possible precautionary measures to reduce the severity of the loss, for example, keeping petrol away from the building.

Uganda certificate of education scoring guides for joint mock examination 2026

AGRICULTURE

527/1,2

AGRICULTURE 527/1

ITEM 1

(a) Advise Jude on how better he should handle farm produce and manage his farm business for increased profits

Challenge	Solution	Justification
Keeps sacks of harvested maize near the walls of the storage facility	Keep sacks of harvested maize a reasonable distance from the walls	To prevent dampness / prevent produce from absorbing moisture from the walls
Drying of maize takes place on bare ground	Dry maize on tarpaulin / Sacks/concrete floor	To prevent contamination of produce with soil
Maize grains develop moulds and unpleasant Smell	Proper drying of produce Keep produce off the ground	To reduce moisture content and prevent growth of moulds and unpleasant smell Prevent up take of water
Grains tend to contain small stones	Sort out small stones	To maintain the quality of grain / prevent contamination
Sometimes Jude makes unintended expenses	Proper budgeting	To avoid misuse of funds
He likes working alone yet lacks collateral security to acquire a loan	Formation of self-help groups / farming organisations / cooperatives	To ease acquisition of loan

Scoring grid for Item 1(a)

	6	5	4	3	2	1	0
Solutions	6	4–5	3	2	1	1	0
Justifications	6	4–5	3	2	1	0	0

After scoring, get the number of Justifications (J) and Solutions (S) and rate them on the scoring grid to get the score.

(b) How to make high-quality briquettes from farm wastes

Materials / Tools and Equipment required for making carbonised briquettes

Cow dung

Maize stalks
Maize cobs
Banana peelings

Briquette press

Cutting tool / panga

Kiln

Drying equipment / solar drier

Mixing container

Water

Protective gears

Procedure for carbonised briquettes

1. Wear protective gears for safety.
2. Assemble materials and equipment for easy access
3. Chop the materials using a knife / panga into small pieces to increase surface area for easy access / burning.
4. Put the materials into a kiln / heap and burn them to drive off water, tar and gases to leave behind carbon-rich charcoal.
5. Allow the materials to cool down completely to prevent spontaneous combustion.
6. Crush cooled material into powder to ease bonding / binding of the material.
7. Mix the crushed material with water and binders (dung / flour / clay) to bind the material.
8. Put the mixture in the briquette press / mould to shape the briquettes.
9. Compress the mixture to produce briquettes of suitable sizes and shape.
10. Dry the briquettes in a solar dryer / well-ventilated place to reduce moisture content.
11. Pack briquettes in a wooden box / suitable containers to ease handling during transportation.
12. Label the product with company name, contact, location, ingredients for easy identification.
13. Store briquettes in a cool dry place to prevent dampness / crumbling of briquettes.

NOTE: The learner must be able to give a complete procedure of making carbonised briquettes.

Key steps:

Wearing protective gear

Assembling materials and equipment

Chopping / cutting materials

Burning materials

Crushing burnt material into powder

Mixing burnt materials with binders

Compress materials in briquette press

Drying briquettes

Packaging of briquettes

Scoring descriptors for briquette procedure

Score	Descriptor
6	7–8 logical steps with clear explanations
5	6 Correctly sequenced steps involved in making briquettes which Are justified
4	4–5correctlysequencedstepsinvolvedinmakingbriquettesand Their justifications
3	3 Correctly sequenced steps and their justifications
2	2 Correct steps involved in making briquettes and their justifica - tions
1	1 Correct step involved in making briquettes
0	No response or irrelevant response

Score=X/6

Requirements for making uncarbonised briquettes

Agro wastes such as maize cobs, maize stalks, banana peelings

Binders such as manure

Briquette press / mould

Mixing container

Solar drier

Knife

Protective gears

Water

Procedure for uncarbonised briquettes

1. Wear protective gears for safety.
2. Assemble the materials and equipment for easy access.

3. Chop the materials using a knife into small pieces to increase surface area for binders to coat.
4. Soak the materials in water for 3–5 days to reduce carbon dioxide on combustion.
5. Dry the material in sunshine. Add drying agent such as lime to reduce the moisture content.
6. Mix the materials with water and binders (manure) in the mixing container to bind the materials.
7. Crush the material to ease bonding.
8. Put the mixture in the briquette press to mould into desired shape and size.
9. Compress the mixture using briquette press into desired shape and size.
10. Remove the briquettes from the mould / briquette press and dry them in a well-ventilated place to reduce moisture content.
11. Pack briquettes in suitable containers to ease handling during transportation.
12. Label the product with product name, ingredients, location, company's name, address for easy identification.
13. Store briquettes in a cool dry place to prevent dampness / crumbling.

NOTE: The learner should present the following steps in a logical order with justifications:

Wear protective gear

Assembling of material

Chop the materials

Soak them in water

Dry the material

Crush the material

Mix the material with binders

Compress the material into briquettes

Dry the briquettes

Accept any type of briquettes. Score = X/6

ITEM 2

Challenge	**Solution**	**Justification**

She freely got land from the nearby state land covered by wet land	Purchase land / lease land / rent land	To prevent disrupting farming activities
Alkaline soil (Soil pH 10)	Addition of acidic fertilisers	To lower the pH to the required level Correct soil PH
Reddish brown soil	Addition of manure / organic matter / mulching	To increase the level of organic matter in the soil / improve soil fertility
Surface run-off from a steep land	Carry out terracing / contour ploughing/ridges	To reduce the rate of soil erosion
Field was flooded with water which made plants to rot	Construct drainage channels / addition of organic matter / marling with sandy soil	To improve drainage and prevent rotting of crops
Dark green leaves (excess nitrogen)	Apply other fertilisers such as phosphatic fertilisers	To prevent excess nitrogen that leads to low yield

Scoring grid

	6	**5**	**4**	**3**	**2**	**0**
Solutions	5	4	3	2	1	0
Justifications	5	4	3	2	1	0

ITEM 3

Challenge	**Solution**	**Justification**
Bought Aberdeen Angus cattle for milk production *(AE)*	Buy Friesian / Jersey / Guernsey / Ayrshire / Brown Swiss cattle for milk production/dairy breeds	To increase milk yield / production
Reared 15 cattle on one acre of land *(AE)*	Rear 1–3 cows per acre	To prevent overgrazing / competition for feeds (pastures) / easy spread of diseases
Located a farm in a lowlying area *(AE)*	Locate / site a farm on a raised/elevated ground with cooler climate	Maximum comfort and steady milk yield. To prevent flooding / ease drainage

Floor finished off using a steel float *(AE)*	Construct a rough finished floor by finishing it with a wood float	To prevent slipping / sliding of animals which may lead to injuries
Feeding animals entirely on elephant grass *(AM)*	Provide balanced diet / provide supplementary Feeds	To prevent deficiency diseases / promote faster growth / increase milk production
Small organisms hiding in the fur of the cows around the horn base, udder and below the withers (Ticks) *(AM)*	Dip / spray animals using well-mixed acaricides / hand pick and crush ticks / spray using acaricides	To kill ticks/external parasites
All born male calves were left to grow to maturity *(AM)*	Castrate male calves / sell off male calves	To facilitate controlled breeding / to reduce feeding costs
Male calves lived freely with females *(AM)*	Separate male calves from females	To facilitate controlled breeding To control random mating
Collected milk in cleaned plastic buckets *(AHT)*	Collect milk in metallic / aluminium coated buck-Ets/milk cans	To ease cleaning / prevent milk contamination
Animals are massaged with cold water *(AHT)*	Massage animals with warm water	To stimulate milk let-down

Scoring grid for Items 3 and 4

$$AE = \frac{X}{6}, \quad AM = \frac{X}{6}, \quad AHT = \frac{X}{6}, \quad TT = \frac{X}{18}$$

ITEM 4

Advise Jackie on how she can overcome the challenges to maximise profits in her business.

Challenge	Solution	Justification
She usually constructs fish ponds on coarse textured soil with high water infiltration rate *(AE)*	Construct fish ponds on fine-textured soil (clay soil)	To increase water retention / water holding capacity for the survival of fish
She stocks 5000 fingerlings per pond *(AE)*	Stock 400 fingerlings per pond	To prevent congestion / overcrowding in the fish pond
She acquired fingerlings from the swamp that borders her farm *(AE)*	Acquire fingerlings from a reliable source / certified supplier / trusted sources	To get high quality fingerlings
She stocks catfish with tilapia in the same pond *(AE)*	Separate catfish from tilapia fish in different fish ponds	To prevent catfish from feeding on tilapia/predation on tilapia with cat fish
She routinely feeds fish on yam leaves *(AM)*	Provide balanced diet / provide supplementary Feeds	To promote faster growth / prevent deficiency diseases / enable fish get variety of nutrients
Predators such as otters have a tendency of eating fish *(AM)*	Fence off the fish ponds / set traps to catch predators / slash the bushes around the fish ponds	To prevent entry of predators in the fish pond / eliminate breeding grounds for predators
Fish ponds tend to flood during rainy season *(AM)*	Pond with raised dyke Construct a spill way / construct drainage channel around the pond	To carry away excess water and prevent flooding during heavy rains
She applies lime in the fish ponds when the pH of pond water exceeds pH 7 *(AM)*	Apply acidic fertilisers	To lower the pH of pond water to the recommended level
Fish is harvested four months after stocking the ponds *(AHT)*	Harvest fish seven months (210 days) after stocking the ponds	To get high quality fish / fish of desired size
Some tilapia fish slip through the net and fall back into the water *(AHT)*	Use fish net of recommended size to harvest Fish	To retain fish

ITEM 5

Advise Mr. Odongo on how he can ensure high yield from his crop.

Challenge	**Solution**	**Justification**
He carried out primary cultivation and planted maize *(CE)*	Carry out secondary cul-Tivation	To break big soil clods into fine soil particles / to create a fine seed bed for proper seed germination
He planted one maize seed per hole *(CE)*	Plant 2 or 3 seeds per hole. Plant recommended number of seeds	To get optimum plant population and maximise yield
Planted maize seeds at a depth of 2 cm *(CE)*	Plant maize at a depth of 5 cm	To prevent pests such as birds from digging out and eating seeds / to protect seeds from surface drying or harsh weather / to provide enough rooting space
He planted maize using seeds from the previous harvest grown from hybrid variety BK 777 *(CE)*	Buy new seeds for planting	To maximise yield / get high yield To avoid spread of disease and pests from previous harvest
Removed spear grass from roots of planted maize by uprooting *(CM)*	Spray the weed with recommended herbicides / deep plough with a forked hoe to remove rhizomes from the ground, dry the rhizomes and burn them to ash	To control the weed effectively
Sprayed super green fertiliser on leaves of maize when maize had started flowering *(CM)*	Spray super green fertiliser on maize when maize is at knee height stage / 4–6 weeks after Emergence	To promote vegetative growth
Some maize plants were stunted and developed white stripes parallel to the veins *(CM)*	Uproot and destroy the infected crop/rogueing Spray using recommended pesticides	To prevent spread of the disease to other crops To control grass hoppers that spread the disease

Empty spaces were observed in the garden a week after planting maize *(CM)*	Carry out gap filling	To get optimum plant population and high yield
Harvested maize manually *(CH)*	Use machines to harvest 30 hectares of maize	To ease work / save time / reduce labour requirements
Harvested maize 4 months after planting *(CH)*	Harvest maize at 3‰ months after planting	To get high quality produce To prevent robbing of maize

ITEM 6

Guide the farmer on how best he can manage coffee plantation for more profits.

Challenge	**Solution**	**Justification**
Planted arabica coffee on a lower altitude *(CE)*	Plant arabica coffee on a higher altitude of 1500m-2300m / plant robusta coffee on land with low altitude of 900m-1500m above the sea level.	To promote proper plant growth and maximise yield
Planted coffee seedlings he found growing in a nearby natural forest *(CE)*	Obtain coffee seedlings from a reliable source / certified supplier / trusted sources	To get high quality coffee seedlings Competition for growth requirements
Transplanted two coffee seedlings per hole *(CE)*	Transplant one seedling per hole	To prevent congestion / overcrowding To enable plants benefit from Nitrogen flush
Transplanted coffee seedlings towards the end of rainy season *(CE)*	Transplant coffee seedlings at the onset of rains	To enable crops get sufficient moisture for proper growth
All seedlings were maintained up to maturity *(CM)*	Carry out thinning	To prevent congestion / overcrowding
Strange plants grew in the coffee plantation *(CM)*	Carry out weeding	To prevent competition for growth factors

Many branches developed on the same coffee tree *(CM)*	Carry out pruning	To ease light penetration / to economise chemical sprays / to prevent congestion & competition for growth factors / to control pests
Orange powdery substance on the lower side of the leaves (coffee leaf rust) *(CM)*	Spray crops with recommended chemicals	To control diseases
Harvested green and red berries *(CH)*	Harvest only red berries	To maintain the quality of produce
Some coffee trees / branches broke during harvesting *(CH)*	Training / bending coffee trees at early stage / pegging Use appropriate tool to harvest coffee berries	To enable coffee plants keep within a good reach where berries can easily be harvested / to prevent breaking of branches

3. Health responses item 3

Health issue	**Cause (cq) NOT consequences.**	**Mitigation/Prevention (mt)**
Back ache	Poor sitting posture Prolonged use Substandard furniture	• Use of ergonomic furniture • Should sit upright • Always have frequent breaks
Headache	Prolonged use Too much light Noise due to vibrations of some ICT tools eg earphones/headsets	• Having breaks • Regulate the light by using screen filters • Regulate the sound in the ears by reducing the volume of the head sets
Repetitive strain	Prolonged use	• Having breaks

injury	Using non-ergonomic keyboards	
Eye strains	Too much light from display Poor lighting Flickering of monitors	• Use of antiglare filer screens • Reduce on the light
Neck pain	Poor monitor positioning	• Parallel positioning of the monitor
Wrist pains	Use of non – ergonomic keyboard	• Use ergonomic keyboards
Fatigue	Prolonged use	• Having breaks
Stress/Depression	Prolonged use	• Having breaks
Skin Cancer	Due to EMR (Electro Magnetic Radiations from monitors)	• Adopt green computing practices I.e use monitor that don't produce a lot of radiation • Sit a reasonable distance from the monitor
Deep vein thrombosis (Blood clots in veins)	Immobility (Not moving for a long time)	• Exercise
Obesity	Lack of regular breaks	• Exercise
Muscle twitching (Involuntary contraction of muscles)	Prolonged sitting	• Exercise

-R — Recommendation	03

Item 1 (a)

From the scenario, the following risk factors were observed:

- Children playing handball in their jean trousers.
- Playing on an abandoned old court with a rough surface and ant hills.
- Always seen playing mid-afternoon in the scorching sun.

It was observed that:

- (a) One of the children was seen seated down in the middle of the playground with stiffness and reduced flexibility in the muscle, acute pain and difficulty moving the affected limb.
- (b) Another player fell and could not respond to verbal calls or touch; seen with an exposed knee that looked scratched, white, swollen, and painful, with little traces of blood.

The following are the ways how you would prevent such issues from arising again:

(i) Wearing proper and right attire

[Pm] Proper attire — not "jean trousers" — reduces the injury risk by preventing restrictions, absorbing impact, protecting against hazards, and regulating body temperature.

[Pe] For example, well-fitting attire allows a full range of motion, comfort, and helps mitigate specific dangers in a given activity.

(ii) Ensuring a safe area of play

[Pm] Children were supposed to play handball from a safe play area — not an "abandoned court" that had a rough surface and anthills. A safe playing area with enough grass, using soft, impact-absorbing surfaces, cushions falls.

[Pe] Ensuring that anthills are removed, stones picked, and equipment properly maintained protects against common injuries like fractures, sprains, dislocation, head injuries, etc.

(iii) Warming up

[Pm] Warming up reduces the risk of injury by increasing blood flow to muscles, improving their flexibility and elasticity, and gradually preparing the body for more intense activity. This gradual preparation, including a rise in body temperature, makes muscles more pliable and less susceptible to strains, sprains, and tears.

[Pe] For example, for one of the children who was seen seated down in the middle of the playground with stiffness and reduced flexibility in the muscles, it is evident that they did not warm up.

(iv) Scheduling games well

[Pm] In order to avoid the scorching sun and peak heat, more games should be organized early in the morning or late in the afternoon when temperatures are lower.

[Pe] Playing in the scorching midday sun increases the risk of dehydration and heat-related illnesses, which likely contributed to the first child's muscle cramp, because dehydration causes electrolyte or heat shortage. Proper hydration also helps prevent heat-related illnesses like convulsion or unresponsiveness, like the case with the second child.

(v) Proper and timely injury management

[Pm] Proper injury management reduces the risk of future injury by promoting healing, minimizing long-term damage, and improving physical readiness through strategies like: stopping the game and assessing the injury by running out for someone who has sustained an injury.

[Pe] For example, the child who sat down in the middle of the field was supposed to be lifted and taken out of the playing area. The same applies to the other one whose condition was unresponsiveness.

(vi) Cooling down

[Pm] Cooling down reduces the risk of injury by gradually transitioning the body from a state of high-intensity activity to rest, preventing issues like blood pooling, muscle soreness, and stiffness.

[Pe] This process allows temperature to come down (reduces) and helps the body to efficiently remove metabolic waste products like lactic acid, which causes muscle cramps (stiffness).

Base Code for Scoring (PJ)

PJ (Prevention of Injuries)	**PJ 05**	**PJ 04**	**PJ 03**	**PJ 00**
Pm — The learner mentions a preventive measure / risk factor	3	2	1	00
Pe — The learner explains how such a measure or risk factor helps to reduce or prevent injuries	3	2	1	00

TOTAL: 05 scores

Item 1 (b)

From the scenario, it was observed that two children sustained injuries, i.e.:

- One of the children was seen seated down in the middle of the playground; when observed, they noticed stiffness and reduced flexibility in the muscle, acute pain, and difficulty moving the affected limb. (Muscle Cramp)

- One of the players fell down and could not respond to verbal calls or touch; seen with an exposed knee that looked scratched, white, swollen, and painful, with little traces of blood. (Knee injury causing unresponsiveness)

(A) Management of the Child with Muscle Cramp — the First Aid Can Be Used to Manage His Condition as Follows:

(i) Rest the casualty

[Pf] The immediate action was to help him move gently to the shaded, cool spot of the court. Have him sit or lie down comfortably.

[Pfe] (explanation as above)

(ii) Allow hydration

[AH] Give him small, frequent sips of water or, ideally, a diluted sports drink / ORS solution.

[AHe] This helps to cool down the temperature and initiate the treatment.

(iii) Do gentle stretching and massage

[MS] Identify the cramped muscle (likely calf or thigh). Help him gently and slowly stretch it (e.g. for calf cramp, straighten the leg and gently pull toes towards the shin).

[MSe] You can also apply firm, even pressure with an elastic bandage or clean cloth.

(iv) Do ice / cold compression

[MP] Apply cold for 10–20 minutes every 2–3 hours in the first 24–48 hrs. Use a cold pack, ice wrapped in a cloth, or a cold wet towel.

[MPe] Cold constricts blood vessels → less bleeding & less swelling & numbs pain.

N.B. Never put ice directly on skin — it can cause frostbite. Frostbite is an injury to body tissue caused by freezing.

(v) Management of Referral

[Rm] Referral means getting the casualty to professional medical care after immediate first aid has been given. It is the last step of P'AS (Preserve life, Alleviate suffering, Prevent further injury, and promote recovery).

[Rme] (Also accept PRICER, or Provide first aid if given under-course.)

(B) For the Unresponsive Child

We start CPR straight away, before we handle the knee injury.

CPR — Cardiopulmonary Resuscitation. Includes: ABC (Airway, Breathing, Compression).

Procedures for CPR

- (i) Position of the casualty: The casualty should be made to lie on the back; you kneel beside the child's chest.
- (ii) Hand placement: For a larger child, use two hands — place the heel of one hand on the centre of the chest, place the heel of the other hand on top of the first hand, interlocking your fingers. Keep fingers off the ribs.
- (iii) Body position: Keep your arms straight, shoulders directly over your hands, and lock your elbows.

Compression Technique

- Push hard and fast.
- Rate: Compress at a rate of 100 to 120 compressions per minute.
- Depth: Compress the chest at least one-third the depth of the chest — about 5cm or 2 inches for most children.
- Allow the chest to recoil completely to its normal position after each compression. Full recoil allows the heart to refill with blood.

(iv) Count

Perform 30 compressions; after 30 compressions, open the airway again using the Head-tilt–Chin-lift manoeuvre (Jaw-Thrust if a neck injury is sustained).

(vi) Breath (Rescue Breath)

- Pinch the nose: Pinch the child's nose closed with your thumb and index finger.
- Seal your mouth: Take a normal breath (not a deep one), cover the child's mouth completely with your mouth, creating an airtight seal.
- Give a breath: Blow steadily into the child's mouth for about 1 second, watching to see the chest visibly rise (like normal breathing). Watch the chest fall as the air comes out.
- Give a second breath: Take another breath and give a second rescue breath (lasting about 1 second), watching for chest rise.
- If the chest does not rise, re-tilt the head to ensure the airway is open and try again to get a visible chest rise. Continue CPR cycles.

(C) Then Manage the Knee Injury

(i) [Pf] Do not move the leg or try to straighten it — movement could worsen any fracture or ligament damage (Protect).

(ii) [Pm] Control bleeding (if active) by applying gentle pressure around the wound with a clean cloth or gauze. Avoid pressing on a visible bone.

(iii) [Pf] Protect the wound: If available, loosely cover the exposed area with a clean, damp cloth (ideally sterile saline, but clean water is better than nothing) to prevent contamination.

NOTE: Do not try to clean it vigorously at this stage — priority is his unresponsiveness.

(iv) [Rm] Decide if referral is needed: Unconscious / Severe bleeding that won't stop / Suspected fracture. All these conditions require immediate referral to medical personnel, or call an ambulance.

Base Code for Scoring (MJ) — KASSEC Mocks 2026

Competencies Scored	MJ 06	MJ 05	MJ 04	MJ 03	MJ 00
Pf — Explains how they will prevent further injuries	✓	✓	✓	✓	—
Mp — Explains how they will manage pain	✓	✓	✓		
Ms — Explains how they will manage swelling	✓	✓			
Rm — Explains how they will refer for further treatment	✓				

Item 2 (a)

Grace has the following indications:

- She is 35 years old.
- She was advised by a doctor to improve her health fitness components and fight against chronic diseases.

These include:

- (i) Cardiovascular endurance
- (ii) Muscular endurance
- (iii) Muscular strength
- (iv) Flexibility
- (v) Body Composition

Here a candidate identifies the fitness component under health, and then chooses a particular exercise(s) they can use to develop such a component. For example:

1. Cardiovascular Endurance

[FT] This refers to the ability of your heart, lungs, and circulatory system to deliver oxygen and nutrients to the working muscles efficiently during prolonged physical activity(s). Cardiovascular endurance can be developed through running, walking, cycling, swimming, and dancing.

[FTe] Running/Jogging develops cardiovascular endurance because it strengthens the heart muscle, improves its efficiency, and enhances the body's ability to deliver oxygen to the working muscles. Through these exercises, the heart muscle becomes stronger and can

pump more blood with each beat, leading to a lower resting heart rate. Over time, the body adapts by increasing lung capacity and developing more fatigue-resistant muscles.

2. Muscular Endurance

[FT] Focuses on the ability of your muscles to perform repetitive contractions over an extended period of time. Activities that can develop muscular endurance include: push-ups, lunges, planks, burpees, mountain climbing, various, and resistance band exercises.

[FTe] Push-ups, for example, improve muscular endurance by building the ability of muscles like the chest, shoulders, and core muscles that provide stability and help prevent fatigue. This is due to performing repeated contractions over time, which is achieved through a combination of engaging multiple muscle groups simultaneously and gradually increasing the volume of repetitions.

3. Flexibility

[FT] Refers to the range of motion around the joints. Exercises that Grace can use to develop this component include: stretching exercises like toe touch, cobra pose, thigh hold, seated straddle, etc.

[FTe] These stretching exercises increase flexibility by lengthening muscles, improving nerve signals, and making the nervous system more tolerant to the sensation of stretching over time. This allows for greater range of motion and can include both temporary changes to muscle-tendon compliance and long-term structural adaptation.

4. Muscular Strength

[FT] This component measures the amount of force your muscles can exert against resistance. Building muscular strength is essential for activities like lifting heavy objects, maintaining good posture, and preventing injuries.

[FTe] Weight-lifting exercises improve muscular strength through a process of stress and adaptation, where muscle fibres experience microscopic tears that, during rest, are repaired and become stronger and thicker.

5. Body Composition

[FT] Refers to the proportion of fat, muscle, bone, and other tissues in your body. Maintaining a healthy body composition is essential for overall health and physical fitness. Achieving a balance between muscle mass and body fat through regular exercise and a nutritious diet contributes to optimal body composition.

[FTe] Regular exercises like push-ups, squats, and lunges can be done with little to no equipment. These exercises burn calories, which reduces body fat and builds muscle, particularly in the legs and core. The combination of fat loss and muscle gain creates a leaner appearance and boosts metabolism, as muscle tissue burns more calories at rest than fat tissue.

Base Code for Scoring (FT)

FT — Explain how the different fitness components develop using exercises

FT 06	FT 05	FT 04	FT 03	FT 00
Explains how 4/5 components can be developed by specific exercises	Explains how 3/5 components can be developed by specific exercises	Explains how 2/5 components can be developed by specific exercises	Explains how 1/5 components can be developed by specific exercises	0/5 components explained

Item 2 (b)

The two-week training program to help Grace achieve her goal will target components like:

- Cardiovascular endurance (in moderation)
- Muscular endurance
- Muscular strength
- Flexibility

Preliminary Information

- Grace should ensure that the activity area is safe for performance.
- She must wear appropriate attire fit for the day's performance.
- Grace should endeavour to carry out warm-up activities before the actual activities.
- Grace should train under a qualified and experienced coach to prevent injury and minimize risk.
- Grace should ensure that there is a first aid kit present for management of injuries.
- She should ensure constant hydration.
- After all the main activities, Grace should engage in cool-down activities.

A 2-Week Fitness Program for Grace

To develop muscular strength, flexibility, cardiovascular endurance, and muscular endurance.

Day 1 — Monday

Day	Fitness Component	Activity	Intensity	Duration
Monday	Cardiovascular endurance	Brisk walking around compound	1 mile walk around the compound at slow, moderate, and fast pace	1 hour

	Flexibility	Superman, single-leg standing, seated straddle	3 sets each exercise, 10 repetitions (counts)	15 minutes
	Muscular strength	Controlled bodyweight squats using chair for support	3 sets of 10 repetitions at a slow pace	12 minutes
		Push-ups	3 sets of 10 repetitions at a slow pace	5 minutes

Day 2 — Tuesday

Day	Fitness Component	Activity	Intensity	Duration
Tuesday	Cardiovascular endurance	Marching in place	Steady pace, high knee for 200 steps	15 minutes
	Muscular strength	Controlled wall push, push-ups	3 sets of 20 counts; 3 sets of 15 repetitions at a moderate pace	5 minutes; 10 minutes
	Flexibility	Thigh hold, toe touch, superman	3 sets of 20 counts; 3 sets of 5 counts; 3 sets of 10 counts	10 min; 5 min; 5 min

Day 3 — Wednesday

Day	Fitness Component	Activity	Intensity	Duration
Wednesday	REST	REST	REST	REST

Day 4 — Thursday

Day	Fitness Component	Activity	Intensity	Duration
Thursday	Muscular endurance & muscular strength	Sit-ups, push-ups, mountain climbing, shoulder press	5 sets of 10 push-ups; 5 sets of 10 sit-ups; 5 sets of 20 cycles; 10 sets of 10 cycles	3 min; 3 min; 5 min; 5 min

Day 5 — Friday

Day	Fitness Component	Activity	Intensity	Duration

Friday	Cardiovascular endurance	Running	10 laps around the track, 2 sets	10 minutes each lap
	Flexibility	Calf stretching, thigh hold stretching, toe touch stretching, shoulder shrugs, cobra pose, cat-cow pose, bend and reach exercises (dynamic)	Holding the pose for 3 seconds, changing alternately 3x; holding the pose for 3 seconds in 3x; 1 set each side, 3 seconds each side	2 minutes; 1 minute; 2 minutes

Day 6 — Saturday

Day	Fitness Component	Activity	Intensity	Duration
Saturday	REST for recovery from 1st week exercises	REST	REST	REST

Day 7 — Sunday

Day	Fitness Component	Activity	Intensity	Duration
Sunday	Cardiovascular endurance	Aerobics and dance movement	Marching, punches, leg and arm movement strokes, each stroke done in combination of 10 counts before changing	30 minutes session
	Flexibility	Manipulation of equipment, arm cycles involving rope skipping, dynamic stretch accompanied with music	Juggling the ball, rolling a hoop 20 times count, 2 sets completed; 20 sets of 50 cycles of rope skipping (single leg, double, alternate); stretching while counting, each stretch 5 sec, then change joint	30 minutes whole session

Day 8 — Monday (Week 2)

Day	Fitness Component	Activity	Intensity	Duration
Monday	Cardiovascular endurance	Steady brisk walking around neighbourhood	Cover 10 km, to and from your starting point	1 hour
	Flexibility	All activities of cool down employed	Lower limb stretching of the calf muscle, hamstring, quadriceps, holding a stretch for 3 seconds	5 minutes

Day 9 — Tuesday

Day	Fitness Component	Activity	Intensity	Duration
Tuesday	REST	REST	REST	REST

Day 10 — Wednesday

Day	Fitness Component	Activity	Intensity	Duration
Wednesday	Muscular strength	Lifting of heavy objects	Lifting of 10kg dumbbells and doing bicep curling for 5 counts in 3 sets	5 minutes
		Leg pushing the heavy objects	Push 20kg load for calf muscle strength; make 2 sets of 20 counts each set	2 minutes

Day 11 — Thursday

Day	Fitness Component	Activity	Intensity	Duration
Thursday	Muscular endurance	Lifting of heavy objects	Lifting 10kg barbell and holding it at the shoulder for 30 seconds, repeat for 3 sets	10 minutes

		Leg pushing the heavy objects	Sit and push 20kg load in 30 seconds, 30 counts	10 minutes

Day 12 — Friday

Day	Fitness Component	Activity	Intensity	Duration
Friday	Cardiovascular endurance	Swimming activities / aerobics exercises like cycling	Moderate speed, covering 1 mile	30 minutes

Day 13 — Saturday

Day	Fitness Component	Activity	Intensity	Duration
Saturday	Muscular endurance	Squats	3 sets of 10 squats	5 minutes
	Flexibility	Muscle stretching — upper limbs	2 sets of holding stretch	5 minutes

Nutritional Advice that Grace Has to Follow

Grace is a 35-year-old office woman requiring a balanced diet to support her new exercise routine, improve her fitness components, prevent chronic diseases, and perform daily activities with ease. I therefore recommend:

(i) [HA] She should feed on food rich in carbohydrates to support cardiovascular endurance, muscular endurance and muscular strength, since Grace likely feels fatigued during activities like climbing stairs due to a sedentary lifestyle.

[E] Complex carbs provide steady energy for exercise like brisk walking and running, ensuring her heart and muscles have enough glycogen to reduce fatigue and lower cardiovascular disease risks.

[HS] Sources of carbohydrates include: oats, whole grain bread and sweet potatoes, cassava, and rice, which are accessible for an office worker.

(ii) [HA] Proteins, to enhance muscular strength, since Grace struggles with tasks like carrying groceries due to weak muscles.

[E] Protein supports muscle repair and growth after exercises like squats and push-ups, promoting hypertrophy and improving her ability to lift objects.

[HS] Protein sources may include foods like chicken, eggs, beans, and Greek yogurt, which are practical for her lifestyle.

(iii) [HA] Water and hydration, to improve flexibility and balance, since dehydration can stiffen muscles and impair stability during daily movement.

[E] Proper hydration ensures efficient muscle function during stretches and balance exercises, reducing injury risk and supporting overall mobility.

[HS] Drink 2–3 litres of water daily; eat juicy fruits such as watermelon and oranges too. Use flavoured water (e.g. with a slice of lemon) during exercise to encourage drinking and replenish fluids.

(iv) [HA] Vitamins, fruits and vegetables, to support all components, particularly cardiovascular endurance and strength.

[E] These provide vitamins, e.g. vitamin C, for energy metabolism, and fibre, which supports heart health and prevents chronic diseases by managing weight and blood sugar.

[HS] Sources of vitamins may include bananas, apples, spinach, and carrots, which are affordable and accessible. Aim for 5 servings daily to ensure adequate nutrient intake.

Scoring Key

- HA = Appropriate Nutrient
- E = Explanation of relevance of the nutrient — improving a given fitness component
- HS = Correct Nutrition Source

NT = 04 Scores

Scoring — Item 2(b)

Base Code: OP (Output)

- Introduction

- HS — Correct nutrition source

NT = 04 scores

Total Item 2 = 06 + 15 = 21 Scores

Section B

Item 3 (a)

Title: The Impacts of Her Observing Leisure Time by the Community's Working Group

Leisure time is any person's free time gathered for resting, hobbies, socializing, or just doing nothing in particular. When you don't have any, the body and mind pay for it. Here is what happens:

1. Physical Health Dangers

[I] Like insomnia, which comes as a result of poor sleep, and weak immunity due to poor resting, since hormones...

2. Mental Health Dangers

[I] E.g. stress and anxiety, depression (loss most are time), irritability — e.g. you can snap at a family friend or classmate because of being always tense.

3. Social and Relationship Dangers

[I] E.g. isolation, since there is no time for friends, family, church, or community — as a result you feel lonely.

4. Productivity and Growth Dangers

[I] I.e. lower performance; your brain needs downtime to process and create...

(b) Practical Recommendations

However, the following are practical recommendations that can already be used to improve the kind of attitude towards physical exercises.

1. [P] Combining leisure with what you already do, like listening to music, comedy, etc.

2. [P] Pick low-cost, low-energy leisure, e.g. journaling, rope skipping, dancing, watching a show, and so on.

3. [P] Enter it like an appointment; schedule it. Say, "Sunday 4–5pm = No work, family time only."

4. [P] Watch the warning signs like constant tiredness, headaches, etc.

(c) Ways to Increase the Number of People Engaging in Physical Activities

1. [PI] Establishing sports facilities and fields where people can always go and engage in sporting activities at a low cost.

[PIe] This can be useful in reducing depression, anxiety, and any crime that can be caused by permissiveness and idleness.

2. [PI] Extending tax waivers or reducing the tax on sports equipment so as to reduce the prices of such materials like balls, nets, tables, ropes, and hula hoops.

[PIe] This can increase the access of community members to such items since the prices will be relatively lower, and hence they will change their lifestyle into an active one.

3. [PI] Starting up "fitness days" where communal and obligatory physical activities can be conducted in the community.

[PIe] Through such days, more information about the need to stop gender-based violence can be shared and spread to a larger part of the community.

4. [PI] Lobbying for scholarships and sports sponsorships for sports-talented students who may have dropped out of school.

[PIe] This can give inspiration to many other students to engage in physical activities and sports.

Conclusion

[Fm] If you're bouncing nonstop between school, home, family, or business, you don't need 3 hours at a spa to get leisure. You need micro-leisure — small resets that fit into a busy day.

Scoring for Item 3

Base Code: Fm — Format of Presentation

Title | Introduction | Conclusion

Fm = 05: The learner will get all 5 marks if they satisfy 2/3 of the intended competencies (or not).

Base Code: CH — Has Understanding of the Impact of the Challenge and the Recommendation

- I — The learner states the impact of the challenge
- Ie — The learner explains the impact of the challenge
- R — The learner states the recommendation to be taken
- Re — The learner explains the recommendation to be taken

Component	**Score**
Ie	03 scores

Re	03 scores
Total CH	06 scores

For part (c), as in the scenario of Item 3, learners need to satisfy strategies for mass participation in sports.

Item 4 — Response

Heading: Addressing Barriers and Promotion of Inclusive Sports Participation at the Community Sports Center

Introduction

[Intro Fm] Inclusive sports facility is a sports venue designed so that everyone can use it — including people with disabilities, the elderly, children, women, and beginners — not just professional athletes. It's not just about a ramp; it's about physical, social, and financial inclusion.

However, challenges such as financial constraints, limited sports offerings, scheduling conflicts, rising obesity rates, and stigma around participation — particularly for non-athletic or obese individuals — pose significant barriers.

Therefore, the following are the impacts of the challenges, and solutions to overcome such significant barriers.

Impacts of Not Having an Inclusive Sports Center

1. [I] Poor physical health: People with disabilities, the elderly, and overweight people become inactive, leading to higher risk of obesity, heart disease, diabetes, high blood pressure, etc.

2. [I] Poor mental health: Exclusion leads to low self-esteem, depression, and loneliness.

3. [I] No rehabilitation: Sports is a key part of physiotherapy after injury; without it, recovery is slower.

4. [I] Isolation and discrimination: People with disabilities feel they don't belong, creating an "us vs. them" mentality.

5. [I] Increased stigma: When others never see people with disabilities playing, myths and stereotypes continue.

6. [I] Loss of community and unity: The community loses chances to bond through unified sports.

7. [I] Gender inequality: Women and girls often drop out if facilities are not safe or private.

8. [I] Wasted talent: Uganda has many talented para-athletes who can't be discovered without inclusive facilities.

9. [I] Higher healthcare costs: An inactive population gets sick more often, costing facilities and government more.

10. [I] Less income for the facility: You lose out on 15–20% of potential users.

11. [I] Violates the right to play and recreation under the UN CRPD (Convention on the Rights of Persons with Disabilities).

12. [I] Schools that are not inclusive fail to meet the Ministry of Education's inclusive education policy.

13. [I] Can lead to lawsuits or loss of funding from inclusive donors/NGOs.

14. [I] Wasted talent pool: Only able-bodied men benefit.

15. [I] Poor national performance: No para-sports medals, no diversity.

16. [I] Poor innovation: Coaches never learn adaptive coaching skills.

Conclusion

[Fm] Non-inclusive sports environments create unhealthy, divided, and unequal communities.

Practical Solutions to Create an Inclusive Sports Environment

These are divided into: what you can do, what the facility can do, and what leaders can do.

1. [R] On the facility: do universal design from the start — ramps, wide doors (90cm), flat entrances, accessible toilets and changing rooms.

2. [R] Adapted entry & play areas: ramps for swimming pools, level playing fields, non-slip surfaces.

3. [R] Clear signage: large print, contrasting colours, Braille, pictograms.

4. [R] Accessible equipment: low basketball hoops, audible balls, light receivers, sitting volleyball nets, wheelchair-friendly gym machines.

5. [R] Safety first: good lighting, first aid point, accessible emergency exits.

6. [R] Mixed ability programs: unified football/basketball where people with and without disabilities play together.

7. [R] Diverse time slots: women-only hours, elderly morning blocks, kids after school, para-sports evening slots.

8. [R] Low-cost/free community days: removes financial barriers.

9. [R] Sensory-friendly sessions: low music, smaller groups for people with autism/sensory needs.

10. [R] Include local games: ludo, omweso, rope skipping — not only expensive modern sports.

11. [R] Train all staff and coaches in inclusive coaching, basic sign language, disability awareness, and first aid.

12. [R] Hire people with disabilities as coaches, referees, and receptionists — be role models.

13. [R] Zero tolerance for discrimination — clear policy posted.

14. [R] Peer buddy system: pair new participants with experienced inclusive players.

15. [R] Advertise in accessible formats: radio, WhatsApp, voice notes, posters in local languages — not just Facebook.

16. [R] Use inclusive images in posters — show wheelchair users, women, and the elderly playing.

17. [R] Involve Disabled People's Organizations (DPOs) in planning — "nothing about us without us."

18. [R] Build accessible toilets & changing rooms.

19. [R] Apply for inclusive grants from NGOs, UNICEF, GIZ, and the Ministry.

20. [R] Start inclusive games.

	1

Total score for the paper is 20.

Note : For the skill or item to be scored. It must be consistently performed and observed.

Assessment base						score
1. Technical skills (Execution of movement skills, control and accuracy) ● **Aerobics** , 5 arm and 5 leg movements ● **Gymnastics** , 9 skills, straight stand, swan balance, crouch balance, forward roll, v-balance, child pose, hollow shape, bur-pees five alternate leg skips. ● **Athletics** runs through the cones in zigzag format, dodges obstacles, sprints towards hurdles with high knees, clears hurdles, leans forwards at finish .Lands in hoops on one leg. ● **Soccer**: Dribbles the ball through cones.						
2. **Tactical awareness** (for a trait to be achieved, there should be consistency ie repeated. ● **Decision making** (use arm movements that blends with leg movements consistently , good timing in hurdle clearance) ● **Space awareness** (instructor maintains a safe distance in aerobics , keeps in lane athletics, in areas of gymnastic) ● **Flow between elements** (transitions smoothly from one skill to another ie turns smoothly from one directions to another from one set of movement to another in aerobics, from the skill to another in gymnastics) ● **Synchronization** ie movements follow the rhythm of music for aerobics , synchronizes breathing with arm movements for swimming , controls speed towards the cone for easy turning. ● **Follows** the game strategy or plan.(runs from cone with consistent pace, maintains stride rhythm during hurdle clearance. ● **Creativity** (patterns of movements to make the performance interesting for aerobics or gymnastics, performs artistically)						
3 . Physical Fitness ● **Balance** (holds for 5s, stays stable after landing , stays stable during turns. ● **Endurance** (sustains the entire performance, sustains the jumping at the same pace, moves through cones at the same pace. ● **Muscular** strength (long strides, clears the hurdle) performs 5 push ups. ● **Flexibility** (case of leg lift during hurdle clearance, case of rolling in gymnastics , full body arm and leg extension during aerobics. ● **Speed** (fast sprint from cones to hurdles, fast movements during hurdles. ● **Coordination** (arms and legs moves concurrently during aerobics, arm and leg movements during rope skip, proper dribbling of the ball)						

• **Power** (high knee lift during sprint, jumps to clear the hurdle) • **Agility** (adjusts instantly during movements with speed e.g towards hurdle, change in aerobic skills, changes direction with speed)						
4. Personality and attitude • **Confidence** (maintains eye contact with audience, stands tall and open body to the audience, no fear of audience/assessors) • **Communication** (talks during activity or counts, uses signals at change of activity during aerobics) • **Enthusiasm** (uses gestures/tone in a lively stay, full focused during performance, maintains energy during performance) • **Leadership** (encourages performers in aerobics gives clear instructions during performamnce) • **Resilience** (finishes the entire performance , persist-as even in difficulty/ mistakes) • **Sportsmanship** (respects rules , winning/loses humbly ,shows appreciation, is honest)

ART & DESIGN

610/1,2

ART AND DESIGN
612/1

SECTION A
Item 1: [General Marking Basis]

Level 3	Level 2	Level 1	Level 0
Excellently explains 5 or more points (Ps)	Moderately explains 3–4 points (Ps)	Fairly explains 1–2 points (Ps)	Wrong or no response at all

Judgement (J)

- Learner gives a conclusion / summary about all important aspects.
- Learner gives personal opinion.

Level 2	Level 1	Level 0
Both Summary & Opinion	Either Summary or Opinion	No Judgement / Wrong response

---

Item 2: Contemporary Art / Painting Assessment

1. Interpretation

- **Context:** Contemporary Art
- **Support as Painting / Book Cover Painting**

Level 2	Level 1	Level 0
Both Correct	Gets either Context OR Support Correct	No response or Wrong response

2. Visual Literacy (VL)

- **Theme:** Boda boda, daily life, family transport
- **Type of Artwork:** Painting explained (Definition)
- **Location:** Uganda
- **Author:** Grego Kyeyune
- **Elements:** Line, shape, texture, color, form, space, tone

- **Principles:** Balance, proportion, contrast, emphasis/dominance, rhythm, perspective
- **Materials:** Canvas, paint, oil, water, wood, primer, fabric (underwater)
- **Tools:** Brush, palette, palette knife, easel, pencil *(Explained through the uses/actions)*

Level 3	Level 2	Level 1	Level 0
Excellently explains 5 or more VLs	Moderately explains 3–4 VLs	Explains 1–2 VLs	No response or wrong response

3. **Stylistic Characteristics** *(Except Elements, Principles, Materials, and Tools)*

- Semi-abstract
- 3-dimensional artwork / In the round
- Study of drapery / Study of anatomy
- Realism
- Study of proportions
- Static posture
- Half nude
- Symmetrical balance
- Patterns / Veil
- Bright colors
- Dynamic movement
- Dramatic composition
- Textured finish / Palette knife application finish

Level 3	Level 2	Level 1	Level 0
Excellently explains 5 or more characteristics	Moderately explains 3–4 characteristics	Explains 1–2 characteristics	No response or wrong response

4. **Processes and Techniques**

- **Technique:** Carving refers to cutting away parts of material to achieve a desired work of art. / Wet media
- **Process (Ideation):**
  - Idea generation

- Collection / Preparation of materials & tools
- Sketching
- Trialing / Experimenting with tools & materials
- Selection of technique
- Actual carving / Execution
- Appropriate finishing / Framing

Level 3	Level 2	Level 1	Level 0
All steps explained	Moderately explains 3–4 steps	Explains 1–2 steps	No response or wrong response

5. Historical Context (HC) / Influences *(Factors that influenced the artwork produced)*

- Availability of materials & tools
- Artistic mastery of artists
- Honor of Pharaoh
- Religious beliefs
- Political shifts
- Royal patronage – artist taught by master
- Educational / Institutional training
- Demand by galleries / art shops
- Need to showcase society realities

Level 3	Level 2	Level 1	Level 0
Explains 3 or more influences	Explains 2 influences	Explains 1 influence	No response or wrong response

6. Contribution to Development

- Utilization of local resources
- Facilitates education and training
- Income
- Employment
- Tourism

- Inspires young / modern artists
- Historical documentation
- Community pride
- Decoration
- Revenue
- Wear / acts as fashion industry
- Cultural preservation / identity
- Therapeutic value / Therapy

Level 3	Level 2	Level 1	Level 0
Excellently explains 7 or more	Moderately explains 4–6	Explains 1–3 contributions	No response or wrong response

7. Reflection and Conclusion

- Learner summarizes all important aspects.
- Learner provides a relevant standing point / opinion.

Level 2	Level 1	Level 0
Both the summary and learner's standing point / opinion	Either a summary OR learner's opinion	Wrong responses OR No response

SECTION B

Item 3: Batik / Textile Decoration

1. Introduction (I_3)

- **Context / Theme:** Fabric / Textile Decoration
- **Support:** Batik

Level 2	Level 1	Level 0
Both Correct	Either Theme or Support Correct	No response or wrong response

2. Materials and Tools (MT_3)

- **Materials:** Fabric / textile, wax, water, dyes, fixers
- **Tools:** Brushes, fire source, tjanting tool, tjap (stamping style — dip in wax and stamp on cloth), containers, sticks, gloves, mask, papers, flat iron / iron box

Level 3	Level 2	Level 1	Level 0
Excellently explains 5 or more tools & 5 or more materials	Moderately explains 3–4 tools & 3–4 materials	Fairly explains 1–2 tools & 1–2 materials	No response or wrong response

3. **Elements and Principles (*EP_3*)**

- **Elements:** Line, shape, texture, space, color
- **Principles:** Pattern, balance, harmony, contrast, unity, variety, emphasis

Level 3	Level 2	Level 1	Level 0
5 or more elements & 5 or more principles	3–4 elements & 3–4 principles	Fairly explains 1–2 elements & 1–2 principles	No response or wrong response

4. **Processes and Techniques (*PT*)**

- **Technique:** Crackle effect, Stamping (using the Tjap)
- **Process:**

1. Ideation (Type of work) – ideas, source of inspiration
2. Collection and preparation of tools and materials
3. Sketching
4. Trialing / experimentation
5. Selection of technique
6. Execution
7. Appropriate finishing

Note: MUST consider the chronological flow. No process should be missed.

Level 3	Level 2	Level 1	Level 0
Excellently explains ALL processes in chronological order (Ideation, Execution, Finish)	Moderately explains 3–4 steps in chronological order (Planning to Execution)	Fairly explains 1–2 steps / processes	No response or wrong responses

Emphasis to be put on:

- Ideation
- Execution / Manipulation
- Finishing

1. OKUSOMA BWINO

a) ID

Omuyizi anyonnyole Biitu ebirungi ebiri mu mulimu ogw'obusawo ng'asinziira ku kitundu ky'asomye:

- Oweebwa ekitiibwa
- Weegombebwa bangi / ofuuka kyakulabirako eri abalala.
- Ofuna ssente n'osobola okwekulaakulanya.
- Ofuna emikwano / oganja mu bantu singa oba obayisa bulungi.
- Ofuna ebirabo mu ngeri y'okusiimibwa.
- Tobulwa kyakulya anti ofuna ne ku mmere enkalu.
- Weebuuzibwako
- Ofuna mangu omulimu.
- Osobola okwetandikirawo eddwaliro eriryo / omulimu omulala.
- Osobola okuyamba bazadde bo n'abantu abalala.

Score 3

- Alaze nti alina gw'anyonnyola (Biitu)
- Awadde ensonga 7+

Score 2

- Alaze nti alina gw'anyonnyola
- Awadde ensonga 5 – 6

Score 1
- Alaze / Talaze gw'anyonnyola
- Awadde ensonga 2 – 4

Score 0
- Awadde ensonga emu oba bimulemedde ddala (0 – 1)

** Bw'atalaga muntu gw'anyonnyola, adda ku mutendera oguddako.

b) EC

Omuyizi yeesigame ku kitundu ky'asomye anyonnyole mukwano gwe okusoomoozebwa okuli mu mulimu gw'obusawo:
Amugambe nti; Mukwano gwange …….

- Mukamaawo asobola okwagala okukuganza kyokka bw'ogaana n'akuteekako embeera enzito.
- Abalwadde abamu bajja bakyafu nnyo.
- Okukola ennyo ng'abasawo abalala beebulankanya ate oluusi nga batono.
- Abalwadde abamu boogera ng'abatalina mannyo mu kamwa.
- Okusula ng'otunula olw'okukola ekiro.
- Abasawo oluusi batulugunyizibwa bakama baabwe.
- Omusaala okuba omutono.
- Okuwalanibwa bakozi banno olw'okukola obulungi.
- Eddwaliro obutabaamu ddagala.
- Abalwadde abamu baba bakambwe era nga boogera baboggoka.

Score 4
- Alaze nti anyonnyola mukwano gwe.
- Awadde ensonga 8+

SECTION A

يَتَّبِعُ الطُّلَّابُ التَّعْلِيمَاتِ وَيُجِيبُونَ بِالاعْتِمَادِ عَلَى الْقَاعِدَةِ الأَسَاسِيَّةِ

1- المَعْلُومَاتُ الوَارِدَةُ فِي النَّصِّ

بَدَأَ قَاسِمٌ رِحْلَتَهُ مِنْ كَمْبَالَا بِسَيَّارَتِهِ الخَاصَّةِ، وَمَرَّ بِعِدَّةِ دُوَلٍ وَمُدُنٍ، مِنْهَا كِينْيَا وَتَنْزَانِيَا وَزَامْبِيَا وَبُوتْسْوَانَا، حَتَّى وَصَلَ إِلَى جُوهَانْزْبَرْغَ فِي جَنُوبِ إِفْرِيقِيَا، ثُمَّ أَقَامَ فِيهَا ثَلَاثَةَ أَشْهُرٍ وَعَادَ إِلَى أُوغَنْدَا بِالطَّرِيقِ نَفْسِهِ

2- اسْتِخْدَامُ النَّقْلِ البَرِّيِّ

اسْتَخْدَمَ قَاسِمٌ سَيَّارَتَهُ الخَاصَّةَ لِلسَّفَرِ بَيْنَ الدُّوَلِ وَالمُدُنِ، مِمَّا مَكَّنَهُ مِنَ التَّنَقُّلِ وَالتَّوَقُّفِ لِلرَّاحَةِ. وَذَكَرَ النَّصُّ أَنَّهُ كَانَ يَسْتَخْدِمُ النَّقْلَ الجَوِّيَّ أَحْيَانًا، وَلَكِنَّهُ اسْتَخْدَمَ النَّقْلَ البَرِّيَّ فِي هٰذِهِ الرِّحْلَةِ

3- خُطَّةُ الرِّحْلَةِ

أَبْدَأُ مِنْ كَمْبَالَا، ثُمَّ أَمُرُّ بِمَالَابَا وَنَيْرُوبِي وَنَامَانْغَا وَدُودُومَا وَمِبِيَا وَتُونْدُومَا وَلُوسَاكَا، ثُمَّ لِيفِنْغْسْتُونَ وَغَابُورُونِي وَبْرِيتُورِيَا، حَتَّى أَصِلَ إِلَى جُوهَانْزْبَرْغ، مَعَ التَّوَقُّفِ لِلرَّاحَةِ فِي المَحَطَّاتِ الرَّئِيسِيَّةِ

4- صُعُوبَاتُ الرِّحْلَةِ

تَمَثَّلَتْ أَبْرَزُ الصُّعُوبَاتِ فِي طُولِ المَسَافَاتِ، وَطُولِ مُدَدِ السَّفَرِ، وَالإِرْهَاقِ، وَكَثْرَةِ التَّوَقُّفَاتِ. وَلِذٰلِكَ كَانَ قَاسِمٌ يَتَوَقَّفُ لِلرَّاحَةِ فِي عِدَّةِ مُدُنٍ، مِمَّا سَاعَدَهُ عَلَى اسْتِعَادَةِ نَشَاطِهِ وَمُوَاصَلَةِ رِحْلَتِهِ بِأَمَانٍ

SECTION B

يَقْرَأُ الطَّالِبُ السِّينَارْيُوهَيْنِ قِرَاءَةً جَيِّدَةً، ثُمَّ يَخْتَارُ السِّينَارْيُو الأَسْهَلَ لَهُ وَيُجِيبُ عَنِ الْأَسْئِلَةِ وَفْقًا لِلتَّعْلِيمَاتِ. وَعَلَى الْمُمْتَحِنِ أَنْ يَلْتَزِمَ بِالْقَاعِدَةِ الأَسَاسِيَّةِ عِنْدَ تَصْحِيحِ الإِجَابَاتِ

The first scenario

Sample response (item1)

زِيَارَةٌ إِلَى الْجَامِعَةِ وَالتَّخْطِيطُ لِلْمُسْتَقْبَلِ

نَظَّمَتْ مَدْرَسَتُنَا زِيَارَةً تَعْلِيمِيَّةً إِلَى إِحْدَى الْجَامِعَاتِ؛ لِلتَّعَرُّفِ عَلَى الْحَيَاةِ الْجَامِعِيَّةِ وَالْبَرَامِجِ الدِّرَاسِيَّةِ وَشُرُوطِ الِالْتِحَاقِ. وَكَانَتِ الزِّيَارَةُ تَجْرِبَةً مُفِيدَةً؛ لِأَنَّهَا سَاعَدَتْنِي عَلَى فَهْمِ الْمَرْحَلَةِ الْجَامِعِيَّةِ وَالتَّفْكِيرِ فِي مُسْتَقْبَلِي.

خِلَالَ الزِّيَارَةِ تَعَرَّفْنَا عَلَى مُخْتَلَفِ الْبَرَامِجِ الدِّرَاسِيَّةِ، وَشُرُوطِ الْقَبُولِ، وَالْفُرَصِ الْأَكَادِيمِيَّةِ وَالْمِهْنِيَّةِ الَّتِي تُوَفِّرُهَا الْجَامِعَةُ لِطُلَّابِهَا. كَمَا تَعَرَّفْنَا عَلَى نِظَامِ الدِّرَاسَةِ وَأَهَمِّيَّةِ الِالْتِزَامِ وَالِاجْتِهَادِ فِي الْمَرْحَلَةِ الْجَامِعِيَّةِ.

وَبَعْدَ هَذِهِ الزِّيَارَةِ، أَدْرَكْتُ أَنَّ النَّجَاحَ فِي الْمُسْتَقْبَلِ يَحْتَاجُ إِلَى تَخْطِيطٍ مُبَكِّرٍ وَاجْتِهَادٍ مُسْتَمِرٍّ. لِذَلِكَ سَأَحْرِصُ عَلَى تَحْسِينِ مُسْتَوَايَ الدِّرَاسِيِّ، وَتَحْدِيدِ التَّخَصُّصِ الَّذِي يُنَاسِبُ قُدُرَاتِي وَمَيُولِي، وَمَعْرِفَةِ شُرُوطِ الِالْتِحَاقِ بِالْجَامِعَةِ الَّتِي أَرْغَبُ فِي الدِّرَاسَةِ فِيهَا.

وَكَمَا سَأَعْمَلُ عَلَى تَنْمِيَةِ مَهَارَاتِي وَالِاسْتِفَادَةِ مِنَ الْفُرَصِ التَّعْلِيمِيَّةِ وَالتَّدْرِيبِيَّةِ، وَسَأَضَعُ أَهْدَافًا وَاضِحَةً وَخُطَّةً زَمَنِيَّةً لِتَحْقِيقِهَا. وَأُؤْمِنُ أَنَّ تَحْدِيدَ الْهَدَفِ، وَحُسْنَ التَّخْطِيطِ، وَالِاجْتِهَادَ، وَالِاسْتِمْرَارَ فِي التَّعَلُّمِ مِنْ أَهَمِّ الْعَوَامِلِ الَّتِي تُسَاعِدُ الطَّالِبَ عَلَى تَحْقِيقِ أَهْدَافِهِ الدِّرَاسِيَّةِ وَالْمِهْنِيَّةِ.

The second scenario

Sample response(item2)

بَعْدَ أَنْ فَازَتْ مَدْرَسَتُنَا بِرِحْلَةٍ تَعْلِيمِيَّةٍ إِلَى إِحْدَى الدُّوَلِ الْعَرَبِيَّةِ، اخْتَارَتْنِي الْإِدَارَةُ لِتَمْثِيلِ طُلَّابِ اللُّغَةِ الْعَرَبِيَّةِ. وَعِنْدَ وُصُولِي إِلَى الْمَطَارِ، كُنْتُ بِحَاجَةٍ إِلَى وَسِيلَةِ نَقْلٍ مُنَاسِبَةٍ لِلْوُصُولِ إِلَى الْفُنْدُقِ.

سَأَلْتُ أَحَدَ السَّائِقِينَ عَنْ أُجْرَةِ الرِّحْلَةِ، ثُمَّ قَارَنْتُ بَيْنَ أَجْرَةِ سَيَّارَةِ الْأُجْرَةِ وَبَعْضِ وَسَائِلِ النَّقْلِ الْأُخْرَى. وَبَعْدَ الْمُقَارَنَةِ، اخْتَرْتُ سَيَّارَةَ الْأُجْرَةِ لِأَنَّهَا كَانَتْ أَنْسَبَ لِي مِنْ حَيْثُ السُّرْعَةُ وَالرَّاحَةُ وَالْكُلْفَةُ.

قُلْتُ لِلسَّائِقِ: «كَمْ أُجْرَةُ الرِّحْلَةِ إِلَى الْفُنْدُقِ؟» فَقَالَ: «الْأُجْرَةُ تِسْعُونَ دِينَارًا». فَسَأَلْتُهُ: «هَلْ يُمْكِنُ أَنْ تَكُونَ الْأُجْرَةُ ثَمَانِينَ دِينَارًا؟» فَقَالَ: «نَعَمْ، أَقْبَلُ بِهَذَا فَدَفَعْتُ لَهُ ثَمَانِينَ دِينَارًا، وَشَكَرْتُهُ عَلَى تَعَاوُنِهِ.

وَخِلَالَ الطَّرِيقِ تَحَدَّثْتُ مَعَهُ بِأَدَبٍ، وَسَأَلْتُهُ عَنْ أَهَمِّ الْمَعَالِمِ وَالْمَنَاطِقِ فِي الْمَدِينَةِ. وَبَعْدَ رِحْلَةٍ مُرِيحَةٍ، وَصَلْتُ إِلَى الْفُنْدُقِ بِسَلَامٍ، وَكَانَتْ هَذِهِ التَّجْرِبَةُ فُرْصَةً مُفِيدَةً لِتَطْبِيقِ مَا تَعَلَّمْتُهُ فِي اللُّغَةِ الْعَرَبِيَّةِ فِي مَوْقِفٍ حَيَاتِيٍّ حَقِيقِيٍّ

1- شَرْحُ المَعْلُومَاتِ؟

مَا اسْمُ الجَامِعَةِ الْمَذْكُورَةِ فِي النَّصِّ؟ **الجواب:** الجَامِعَةُ الإِسْلَامِيَّةُ فِي أُوغَنْدَا

2- تَعْرِيفُ المَفَاهِيمِ

مَا شُرُوطُ القَبُولِ فِي الجَامِعَةِ؟

الجواب: الحُصُولُ عَلَى شَهَادَةِ الثَّانَوِيَّةِ بِدَرَجَاتٍ مُرْتَفِعَةٍ، وَتَعْبِئَةُ اسْتِمَارَةِ التَّقَدُّمِ بِدِقَّةٍ، وَإِرْفَاقُ الوَثَائِقِ الضَّرُورِيَّةِ.

3- تَطْبِيقُ المَعْرِفَةِ

مَا المَوَادُ الَّتِي يُرَكِّزُ عَلَيْهَا فِي دَرَجَاتِ القَبُولِ؟ **الجواب:** اللُّغَةُ الإِنْجِلِيزِيَّةُ، وَالرِّيَاضِيَّاتُ، وَالعُلُومُ.

4- اِسْتِنْتَاجُ المَعْلُومَاتِ

مَا الوَثَائِقُ الَّتِي يَجِبُ عَلَى الطَّالِبِ إِرْفَاقُهَا؟ **الجواب:** شَهَادَاتُ التَّعْلِيمِ وَالصُّوَرُ الشَّخْصِيَّةُ.

5-تَحْلِيلُ المَعْلُومَاتِ

كَيْفَ يُمْكِنُ لِلطُّلَّابِ تَقْدِيمُ طَلَبَاتِهِمْ؟

الجواب: عَبْرَ الإِنْتَرْنِتِ مِنْ خِلَالِ مَوْقِعِ الجَامِعَةِ، أَوْ بِالتَّوَجُّهِ مُبَاشَرَةً إِلَى مَكْتَبِ القَبُولِ

ARABIC LANGUAGE 337/2B SCORING GUIDE (KASSEC)2026

Section A: Giving a Speech

The candidate is expected to attempt only one item in Section A (Giving a Speech) and perform four tasks demonstrating the ability to:

- ✓ Fulfil the task given
- ✓ Use grammar accurately
- ✓ Use appropriate vocabulary
- ✓ Demonstrate fluency and appropriate intonation

12

Section B: Dialogue

The candidate is expected to attempt only one item in Section B (Dialogue) and perform four tasks demonstrating the ability to:

- ✓ Fulfil the task given
- ✓ Demonstrate fluency and appropriate intonation
- ✓ Demonstrate effective interaction
- ✓ Respond to questions, give suggestions and express opinions

12

Sample response (item1)

كَلِمَةٌ تَوْجِيهِيَّةٌ لِطُلَّابِ اللُّغَةِ العَرَبِيَّةِ

بِسْمِ اللهِ الرَّحْمَنِ الرَّحِيمِ

أَعَزَّائِي طُلَّابَ اللُّغَةِ العَرَبِيَّةِ، السَّلَامُ عَلَيْكُمْ وَرَحْمَةُ اللهِ وَبَرَكَاتُهُ

أَجْتَمِعُ بِكُمْ الْيَوْمَ لِأُخْبِرَكُمْ بِأَهَمِّ مَا تَعَلَّمْنَاهُ فِي اللِّقَاءِ التَّوْجِيهِيِّ الَّذِي تَنَاوَلَ مَوْضُوعَ التَّخْطِيطِ لِلْمُسْتَقْبَلِ الْمِهْنِيِّ وَالْأَكَادِيمِيِّ

أَكَّدَ الْمُحَاضِرُونَ أَنَّ النَّجَاحَ فِي الْحَيَاةِ لَا يَأْتِي بِالْحَظِّ، وَإِنَّمَا يَحْتَاجُ إِلَى التَّخْطِيطِ وَالاجْتِهَادِ وَحُسْنِ الاسْتِعْدَادِ. لِذَلِكَ، يَنْبَغِي لِكُلِّ طَالِبٍ أَنْ يَحْدِّدَ أَهْدَافَهُ مُنْذُ وَقْتٍ مُبَكِّرٍ، وَأَنْ يَعْرِفَ مَا يُرِيدُ أَنْ يُحَقِّقَهُ فِي الْمُسْتَقْبَلِ

وَعِنْدَ اخْتِيَارِ الْمِهْنَةِ أَوِ التَّخَصُّصِ، يَجِبُ عَلَيْنَا أَنْ نُرَاعِيَ مَيُولَنَا وَقُدُرَاتِنَا وَمَهَارَاتِنَا، وَأَنْ نَعْرِفَ فُرَصَ الْعَمَلِ الْمُتَاحَةَ فِي الْمُسْتَقْبَلِ. كَمَا يَنْبَغِي أَنْ نَسْتَشِيرَ الْوَالِدَيْنِ وَالْمُعَلِّمِينَ وَأَهْلَ الْخِبْرَةِ قَبْلَ اتِّخَاذِ الْقَرَارِ

وَمِنَ الْخُطُوَاتِ الْعَمَلِيَّةِ لِتَحْقِيقِ أَهْدَافِنَا: وَضْعُ خُطَّةٍ وَاضِحَةٍ، وَتَنْظِيمُ الْوَقْتِ، وَالاجْتِهَادُ فِي الدِّرَاسَةِ، وَتَنْمِيَةُ الْمَهَارَاتِ، وَالاسْتِفَادَةُ مِنَ الْفُرَصِ التَّعْلِيمِيَّةِ وَالتَّدْرِيبِيَّةِ. وَعَلَيْنَا أَيْضًا أَنْ نَكُونَ صَابِرِينَ وَمُثَابِرِينَ، وَأَلَّا نَسْتَسْلِمَ لِلْفَشَلِ

وَفِي الْخِتَامِ، أَدْعُوكُمْ إِلَى أَنْ تَبْدَؤُوا التَّخْطِيطَ لِمُسْتَقْبَلِكُمْ مِنَ الْيَوْمِ، فَالْمُسْتَقْبَلُ الَّذِي نَحْلُمُ بِهِ يَحْتَاجُ إِلَى عَمَلٍ وَاجْتِهَادٍ وَاسْتِعْدَادٍ
وَالسَّلَامُ عَلَيْكُمْ وَرَحْمَةُ اللهِ وَبَرَكَاتُهُ

Sample response (item2)

طَرِيقَةُ إِعْدَادِ الأُرُزِّ وَطَهْيِهِ
يَا صَدِيقِي، سَأُعَلِّمُكَ الْيَوْمَ كَيْفِيَّةَ إِعْدَادِ الأُرُزِّ وَطَهْيِهِ. إِنَّ إِعْدَادَ الأُرُزِّ سَهْلٌ إِذَا اتَّبَعْنَا الْخُطُوَاتِ بِالتَّرْتِيبِ
الْمُكَوِّنَاتُ
الأُرُزُّ - الْمَاءُ - الْمِلْحُ - قَلِيلٌ مِنَ الزَّيْتِ أَوِ السَّمْنِ
الأَدَوَاتُ
قِدْرٌ - مِلْعَقَة - كَأْسٌ لِقِيَاسِ الْمَاءِ - مِغْرَفَة
طَرِيقَةُ الطَّهْيِ
أَوَّلًا، نَقِيسُ كَمِّيَّةَ الأُرُزِّ الَّتِي نُرِيدُ طَهْيَهَا
ثَانِيًا، نَغْسِلُ الأُرُزَّ جَيِّدًا بِالْمَاءِ لِإِزَالَةِ الأَوْسَاخِ وَالنَّشَا الزَّائِدِ
ثَالِثًا، نَضَعُ الْقِدْرَ عَلَى النَّارِ، ثُمَّ نَضَعُ فِيهِ قَلِيلًا مِنَ الزَّيْتِ أَوِ السَّمْنِ
رَابِعًا، نُضِيفُ الْمَاءَ وَقَلِيلًا مِنَ الْمِلْحِ، وَنَتْرُكُ الْمَاءَ حَتَّى يَغْلِيَ
خَامِسًا، نَضَعُ الأُرُزَّ الْمَغْسُولَ فِي الْمَاءِ الْمَغْلِيِّ، وَنُحَرِّكُهُ قَلِيلًا
سَادِسًا، نُغَطِّي الْقِدْرَ وَنَتْرُكُ الأُرُزَّ يَطْهَى عَلَى نَارٍ هَادِئَةٍ حَتَّى يَتَشَرَّبَ الْمَاءَ وَيَنْضَجَ
أَخِيرًا، نَرْفَعُ الْقِدْرَ عَنِ النَّارِ، وَنَقَلِّبُ الأُرُزَّ بِرِفْقٍ، ثُمَّ نُقَدِّمُهُ فِي الصَّحْنِ
وَهَكَذَا نَحْصُلُ عَلَى أُرُزٍّ لَذِيذٍ وَجَاهِزٍ لِلأَكْلِ. أَرْجُو أَنْ تَجَرِّبَ هَذِهِ الطَّرِيقَةَ وَأَنْ تَسْتَمْتِعَ بِالطَّعَامِ.

SECTION B
Sample response (Item1)

أَحْمَدُ: السَّلَامُ عَلَيْكَ يَا صَدِيقِي، أُرِيدُ السَّفَرَ إِلَى الرِّيَاضِ لِأَوَّلِ مَرَّةٍ، وَلَكِنِّي لَا أَعْرِفُ مَا أَحْتَاجُ إِلَيْهِ مِنْ وَثَائِقَ.
أَنَا: وَعَلَيْكَ السَّلَامُ وَرَحْمَةُ اللهِ. لَا تَقْلَقْ يَا أَحْمَدُ، سَأُرْشِدُكَ إِلَى أَهَمِّ الأُمُورِ الَّتِي تَحْتَاجُ إِلَيْهَا.

أَحْمَدُ: مَا أَهَمُّ وَثَائِقِ السَّفَرِ الَّتِي أَحْتَاجُ إِلَيْهَا؟
أَنَا: تَحْتَاجُ إِلَى جَوَازِ سَفَرٍ سَارِي الْمَفْعُولِ، وَتَأْشِيرَةِ دُخُولٍ إِلَى الدَّوْلَةِ الَّتِي سَتَسَافِرُ إِلَيْهَا، وَتَذْكِرَةِ السَّفَرِ. وَقَدْ تَحْتَاجُ أَيْضًا إِلَى شَهَادَةِ التَّطْعِيمِ أَوْ وَثَائِقَ أُخْرَى حَسَبَ شُرُوطِ الدَّوْلَةِ
أَحْمَدُ: وَمَاذَا يَنْبَغِي أَنْ أَفْعَلَ فِي الْمَطَارِ
أَنَا: عِنْدَ وُصُولِكَ إِلَى الْمَطَارِ، تَوَجَّهْ إِلَى مَكْتَبِ تَسْجِيلِ الرُّكَّابِ، وَقَدِّمْ جَوَازَ سَفَرِكَ وَتَذْكِرَتَكَ. ثُمَّ سَتَسْمَعُ إِعْلَانَاتٍ مِثْلَ: «يُرْجَى مِنَ الرُّكَّابِ التَّوَجُّهُ إِلَى بَوَّابَةِ «الصُّعُودِ»، وَ«يَرْجَى رَبْطُ أَحْزِمَةِ الأَمَانِ»، وَ«بَدَأَ صُعُودُ الرُّكَّابِ إِلَى الطَّائِرَةِ
أَحْمَدُ: وَكَيْفَ أَعْرِفُ مَوْعِدَ رِحْلَتِي؟
أَنَا: تَابِعْ شَاشَاتِ الرِّحْلَاتِ وَاسْتَمِعْ إِلَى إِعْلَانَاتِ الْمَطَارِ، وَابْحَثْ عَنْ رَقْمِ رِحْلَتِكَ وَبَوَّابَةِ الصُّعُودِ
أَحْمَدُ: كَمْ تَسْتَغْرِقُ الرِّحْلَةُ الجَوِّيَّةُ مِنْ كَمْبَالَا إِلَى الرِّيَاضِ؟
أَنَا: تَسْتَغْرِقُ الرِّحْلَةُ المُبَاشِرَةُ تَقْرِيبًا خَمْسَ سَاعَاتٍ وَنِصْفٍ، وَقَدْ تَطُولُ الْمُدَّةُ إِذَا كَانَتِ الرِّحْلَةُ تَتَضَمَّنُ تَوَقُّفًا فِي مَطَارٍ آخَرَ
أَحْمَدُ: شُكْرًا لَكَ عَلَى هَذِهِ النَّصَائِحِ، لَقَدْ اسْتَفَدْتُ مِنْهَا كَثِيرًا
أَنَا: عَلَى الرَّحْبِ وَالسَّعَةِ، وَأَتَمَنَّى لَكَ سَفَرًا آمِنًا وَرِحْلَةً سَعِيدَةً

Sample response (Item2)

المُشْتَرِي: السَّلَامُ عَلَيْكُمْ
البَائِعُ: وَعَلَيْكُمُ السَّلَامُ وَرَحْمَةُ اللهِ. أَهْلًا وَسَهْلًا، كَيْفَ أَسْتَطِيعُ خِدْمَتَكَ؟
المُشْتَرِي: أُرِيدُ شِرَاءَ بَعْضِ الحَاجَاتِ المَنْزِلِيَّةِ. بِكَمْ كِيلُو الأُرُزّ؟
البَائِعُ: سِعْرُ كِيلُو الأُرُزّ خَمْسَةُ آلَافِ شِلِنْغ
المُشْتَرِي: هَلْ يُمْكِنُكَ أَنْ تُخَفِّضَ السِّعْرَ قَلِيلًا؟
البَائِعُ: لَا أَسْتَطِيعُ أَنْ أُخَفِّضَهُ كَثِيرًا، وَلَكِنْ يُمْكِنُنِي أَنْ أَبِيعَكَ إِيَّاهُ بِأَرْبَعَةِ آلَافٍ وَخَمْسِمِائَةِ شِلِنْغ
المُشْتَرِي: هَذَا السِّعْرُ مُرْتَفِعٌ قَلِيلًا. مَا رَأْيُكَ فِي أَرْبَعَةِ آلَافٍ؟
البَائِعُ: حَسَنًا، سَأَبِيعُكَ إِيَّاهُ بِأَرْبَعَةِ آلَافٍ
المُشْتَرِي: شُكْرًا. أُرِيدُ كِيلَوَيْنِ مِنَ الأُرُزّ، وَكِيلُو سُكَّرٍ، وَزَيْتًا لِلطَّهْيِ
البَائِعُ: حَسَنًا، سَأُحَضِّرُ لَكَ حَاجَاتِكَ
المُشْتَرِي: كَمْ الْمَجْمُوعُ؟
البَائِعُ: هَذِهِ فَاتُورَتُكَ، وَهِيَ تُوَضِّحُ أَسْمَاءَ السِّلَعِ وَكَمِّيَّاتِهَا وَأَسْعَارَهَا. الْمَجْمُوعُ عِشْرُونَ أَلْفَ شِلِنْغٍ

المُشْتَرِي: تَفَضَّلْ، هَذَا الْمَبْلَغُ
البَائِعُ: شُكْرًا، وَهَذَا إِيصَالُ الدَّفْعِ. اِحْتَفِظْ
المُشْتَرِي: شُكْرًا لَكَ. إِلَى اللِّقَاءِ
البَائِعُ: عَلَى الرَّحْبِ وَالسَّعَةِ. إِلَى اللِّقَاءِ

Uganda certificate of education scoring guides for joint mock examination 2026

LITERATURE IN ENGLISH

208/1

LITERATURE IN ENGLISH

208/1

SECTION A (Compulsory)

Item 1. Read the extract below and then respond to all the tasks that follow.

“Have you all eaten this morning?” She asked the bigger girl. The girl nodded, but the old woman did not appear altogether satisfied. “Is that the truth you are speaking, Deede?” The girl nodded once more. The old woman seemed about to interrogate her further, but at that moment she noticed the little boy's limp.

“Ah, my husband!” she shouted, shuffling forward. “Who is it that has hurt your foot? Who did it, my little husband?”

The child whimpered a little and said “Nobody”. The woman directed an unbelievable glance at the man.

“My poor husband!” said the old woman, over and over again. “You have no shoes to wear, so your poor little feet get torn to pieces. Ei, my husband, you have nobody, nobody to buy you shoes, so your little toes will all be destroyed.” She went close up to the boy and peered down at his feet, looking for the one with the cut on it.

“Where is the wound, my husband? Where is it? You know you have nobody, you are an orphan—a complete orphan. You mustn't run around, like people who have men behind them, to buy them shoes. My poor husband!”

The man stood quietly, watching and listening, wondering whether he would have any moisture left in his mouth for framing words. This was done so very often, the tender heads of children serving as things on which adults could bounce their bullet words into the hearts of their enemies. He had come to expect it, yet every time it happened it made him angry. With his tongue he freed his teeth from the dry hold of his lips, and spoke to his mother-in-law. His voice had in it the politeness of deliberate effort.

“Oyo asked me.....” he began. The old woman cut him short.

“Ah yes, the suffering daughter of mine, what does she say?”

“Oyo asked me to bring the children along.”

“Oh, I will take them!” she exclaimed dramatically, “I will take them off the poor woman's hands. My God, how she must be tiring herself! Oh my dear, dear God!”

“Mother,” the man said evenly, “your daughter is alive and well.”

The old woman peered into the man's eyes, looking up, for she was short. It was as if she were probing intently for some hopeful meaning to what the man had said. Her eyes were very far in, very deep, and they seemed always to float in a small, dry quantity of tears.

“Is that what you say,” she asked at slow length. “Do you really say my daughter is alive? And is she also well?” The man restrained a smile. “Ah, then we thank the Lord!”

“She also asked me to tell you to come earlier, about seven.”

The old woman's mouth was now set in a very small circle of wrinkled resentment. Without unwrinkling it, she managed to tell the man, “I have heard.”

The man took the two bottles of beer from his son, added them to the others, and took the bag from his older daughter. As he turned to go, he could hear, with a terrible distinctness the voice of his mother-in-law, assuring his son that he would not grow up to be a useless nobody, that he would be a big man when he grew up. The man walked very quickly until he came to the nearest corner, and it was not until after he had turned that he slowed down and walked relaxedly on, free from the pressure of the old woman's measuring glance on the back of his neck. A short way up, he knocked at the door of a house standing all by itself, went in, gave the bottles of beer to his friend, and walked out again. He felt very free and very light, and walked with slow steps, enjoying his own movement. He walked close to the large incinerator, cutting across the field in the middle of which it stood, breathing in the strong smells of burning animal skin and hair, burning paper and old ash. He did not go all the way onto the main road, but walked along the little street parallel to it, until the two came together at the bridge over the big lagoon.

— *THE BEAUTYFUL ONES ARE NOT YET BORN* by Ayi Kwei Armah

Tasks:

a) What a character says, does and what is said about the character goes a long way in painting the kind of human being the character is. Refer to the extract and describe the character of the 'old woman'.

b) Writers write texts mainly to expose societal issues, challenges or problems. Explain the issues raised in the extract.

c) We understand and enjoy reading the literary works because the writers purposely employ different methods and tools to spice the message and communicate the message in the best way possible. Referring to the extract, identify and explain the techniques used by the writer.

d) Whenever occurrences happen to anyone, it always leaves them affected emotionally, either positively or negatively. Describe the attitude of 'the man' based on what is happening in the extract.

SECTION B

Choose **one** task from this section. Illustrate your answer by referring to any of the following set books:

- **MEJA MWANGI:** *Carcase for Hounds*
- **FRANCIS IMBUGA:** *Betrayal in the City*

- **CLIVE LEWIS:** *Rebel without a Gun*
- **NGUGI WA THIONGO:** *Weep Not, Child*
- **FRANCIS IMBUGA:** *Aminata*
- **YUSUF SERUNKUUMA:** *Meat Festivals*
- **NICHOLAI GOGOL:** *The Government Inspector*
- **SYLVESTER ONZIVUA:** *Heart Soothers*
- **D. WOOLGER & K. OGUNGBESAN:** *Rhymes and Rhythms*
- **RICHARD MWEBESA:** *Thistle of the Nile*

EITHER

Item 2. Literature has over time been proved to be a subject that improves the general behaviour of the learners by making them wiser. Use any of the set books you have studied and show the truth of this statement.

OR

Item 3. Writers of the literary texts present numerous problems, conflicts or concerns that affect society. Explain any such issues raised in any of the set books you have studied.

OFFICIAL SCORING GUIDE & COORDINATED MARKING NOTES

Paper: 208/1 Literature in English Paper 1

Total Assessment Score: 30 Marks

SECTION A (24 Marks)

Item 1 (a): Characterization of the Old Woman [Code: XT / C] (06 Marks)

Basis of Assessment: 3 paragraphs minimum — Identification of relevant character traits with clear explanations/illustrations from the extract.

Expected Character Traits:

- **Inquisitive / Concerned:** Demands responses persistently from the children and the hurt boy.
- **Kind / Loving / Caring:** Expresses concern for the little boy who is bleeding/limping.
- **Provocative / Nagging / Irritating / Annoying:** Uses indirect, hurtful remarks ("bullet words") aimed at the man.
- **Open-minded / Frank / Straightforward:** Speaks directly about the family's poverty and struggles.
- **Responsible Adult:** Willing to take care of the grandchildren.

- **Irrational / Short-tempered / Impatient:** Cuts the man short before he completes his speech.
- **Sympathetic yet Suppressive:** Shows sympathy to children while deliberately undermining the man's dignity.
-

Level	Score	Descriptor
Level 0	00	Wrong or no relevant trait identified.
Level 1	03	1–2 relevant traits identified, with or without illustration.
Level 2	06	3 or more relevant traits identified with clear illustration.

Item 1 (b): Societal Issues / Themes [Code: TH] (06 Marks)

Basis of Assessment: Identification and illustration of themes/issues present in the extract.

Expected Themes:

- **Love / Care:** Old woman towards the limping child.
- **Family Wrangles / Domestic Strife:** Utterances and underlying friction between the old woman and the man.
- **Poverty:** Inability to buy shoes for the children.
- **Disillusionment / Despair:** Reflected in the man's quiet endurance.
- **Agony / Pain:** Experienced by the child and the broader domestic context.
- **Vulnerability of Children:** Children serving as emotional shields/tools between adults.
- **Trials of Adulthood:** Suppressed anger and heavy responsibility borne by the man.
- **Moral Degeneration / Verbal Abuse:** Adults bouncing "bullet words" off children to hurt rivals.

Level	Score	Descriptor
Level 0	00	Wrong or inappropriate themes given.
Level 1	04	1–3 themes given with illustration.
Level 2	06	4 or more themes given with clear illustration.

Item 1 (c): Literary Techniques [Code: TQ] (06 Marks)

Basis of Assessment: Identification, illustration, and explanation of literary techniques/tools used.

Expected Techniques:

- **Direct Speech / Dialogue / Rhetorical Questions:** Used during inter-character exchanges.
- **Third-Person Omniscient Narrator:** All-knowing perspective revealing characters' internal feelings.
- **Characterization:** Dynamic portrayal of the old woman and the man.
- **Vivid Description / Sensory Imagery:** Details of the incinerator, smells of burning hair/ash, and physical features.
- **Stream of Consciousness:** Insight into the man's thoughts and sense of emotional release.
- **Metaphorical Expressions:** e.g., "tender heads of children... bounce their bullet words".
- **Repetition / Hyperbole:** e.g., "complete orphan", dramatic overstatements by the old woman.
- **Irony & Symbolism:** The incinerator/lagoon as symbolic space for dumping emotional toxicity.

Level	Score	Descriptor
Level 0	00	Wrong or no techniques cited.
Level 1	03	1–3 techniques cited with illustration.
Level 2	06	4 or more techniques cited with clear illustration of effectiveness.

Item 1 (d): Attitude of 'The Man' [Code: AP] (06 Marks)

Basis of Assessment: Identification of relevant attitudes using accurate adjectives, accompanied by textual illustration.

Expected Attitudes:

- **Bitter / Angry:** Resents her deliberate attempt to belittle his ability to provide.
- **Indifferent / Aloof / Resigned:** Maintains calm and restrains his responses against her hostility.
- **Embarrassed / Disgusted:** Uncomfortable with continuous public poking and criticism.
- **Frustrated / Irritated / Unhappy:** Emotional fatigue due to domestic tension.
- **Relieved / Contemptuous:** Feels light and free upon escaping her presence.

Level	Score	Descriptor

Level 0	00	Wrong or inappropriate feeling/attitude cited.
Level 1	04	1–3 relevant feeling/attitudes cited with illustration.
Level 2	06	4 or more relevant feelings/attitudes cited with clear illustration.

SECTION B (06 Marks)

Item 2: Lessons / Wisdom Derived [Code: AS] (06 Marks)

Basis of Assessment: Selecting an approved set book, stating universal lessons derived, and illustrating them through plot, characters, or setting.

Mandatory Rules for Lessons (Coordination Notes):

1. Must be a general statement of wisdom derived from themes, characters, plot, or setting.
2. **Grammar Rule:** Statements containing *"should"*, *"ought to"*, *"must not"* or starting directly with a verb are **INVALID**.
3. Avoid uncontextualized, crammed proverbs.

Acceptable Examples:

- Decisions made on impulse usually lead to disaster.
- Money is a faithful servant but a ruthless master.
- Appearances are frequently deceptive.
- Unchecked power leads to corruption and retribution.

Level	Score	Descriptor
Level 0	00	Wrong choice of set book and/or inappropriate lessons cited.
Level 1	02	1–2 lessons cited at mere mention without illustration.
Level 2	04	3–4 lessons cited with clear, logical, coherent illustration.
Level 3	06	5 or more lessons logically and coherently illustrated.

Item 3: Societal Issues / Conflicts [Code: AS] (06 Marks)

Basis of Assessment: Selecting an approved set book, citing major societal concerns, and illustrating their presentation in the text.

Expected Concerns: Corruption, Hypocrisy, Immorality, Betrayal, Disillusionment, Deception, Child Abuse, Vengeance, Tradition vs. Modernity, Marital Strife, Crime and Retribution.

(Note: "Death" and "Suffering" alone are NOT acceptable as standalone themes without contextual elaboration).
