Paper 1

2 hours

INSTRUCTIONS TO ITEM TAKERS:

- ✓ *This paper consists of **two** sections;* **A** *and* **B**. *It has* **five** *examination items.*
- ✓ *Section* **A** *has* **two compulsory** *items. Responses to Section* **A must** *be written in the spaces provided.*
- ✓ *Section* **B** *has **two** parts;* **I** *and* **II**. *Respond to* **one** *item from each part. Responses to Section* **B must** *be written in the Respond to booklet (s) provided.*
- ✓ *Respond to **four** items in all.*
- ✓ *Any additional item (s) responded to will* **not** *be scored.*

SECTION A

*Respond to **all** the items from this section.*

Item 1.

Omuna in Apeulai village always goes to his garden to dig with his hoe but one day he forgot the hoe in the garden. In the next day he went to the garden and found out that his hoe developed brown coating and he was disturbed what happened.

Task: 2

As a chemistry student;

(a) Point out the environmental factors that led his hoe to develop the brown coating.

_____

_____

_____

(b) State the properties of one of the environmental factors listed in (a) above.

_____

_____

_____

_____

_____

_____

(c) What are the applications of the environmental factor in (a) above?

_____

_____

_____

(d) What is the effect of the brown coating on the tools made like Omuna's hoe and how can this be prevented?

3

Item 2.

Okware, the retired soldier who fought for World War II was given his Pension. However, he lacks the knowledge about the choice of the best materials to be used in constructing the roof. One day Okware approached you for advice.

Task:

As a learner of chemistry,

(a) Explain to him;

(i) The category of materials to be used.

4

(ii) The suitability of the material

(b) Advise him on the choice of the best material.

SECTION B

Part I

*Respond to **one** item from this part.*

Item 3.

Due to a wide spread of respiratory illnesses caused by COVID-19, there was an increased demand for oxygen by the patients in the hospitals. The government supply of oxygen was not enough and is now planning to setup an oxygen production plant with minimal environmental impact. However, the local people around your school would like to know how the process of production will be carried out. 5

Task:

As a chemistry student, make a write up you will use during the presentation and in your presentation, include raw material, process of production, side effects of the process of production, mitigation and social benefits.

Part II

*Respond to **one** item from this part.*

Item 4.

Charcoal is fuel used in most homes throughout the country. The Uganda Parliamentary Caucus on environment is however always against the charcoal business basing on how charcoal is made and its effects on the environment. This has attracted attention of officials from National Environment Management Authority (NEMA), one of the government Agencies. The officials are planning to create an awareness to the people of the country through sensitization workshops organized in different districts in Eastern Uganda. 6

Task:

As a chemistry learner, prepare a short presentation you will deliver during the workshop upon invitation and in your presentation include category of natural resource reason and example, composition of natural resources. impact of natural resources on the environment and how it occurs / chemicals and physical reactions and mitigation. benefits of natural resource.

Item 5.

Stone quarrying is one of the key extractive economic activity in Wila village in Amuria district supplying stones to the construction. The environment has started experiencing environmental changes in the climate and poor air quality. The locals are now wondering why all these are happening and some has started attributing it to witchcraft. The chairperson LCI has organized a sensitization workshop to explain to the locals the existing situation. The theme of the workshop is "MY ENVIRONMENT IS MY RESPONSIBILITY. 7

Task:

As a chemistry student, write a message you will deliver upon invitation and on message include category of natural resource reason and example, composition of natural resources, impact of natural resources on the environment and how it occurs / chemicals and physical reactions, mitigation and benefits of natural resource.
