STOP FAILING PHYSICS 1 TEN 2 !!!

⟹ Grasp these concepts ASAP.

Item 2 is got from Modern Physics comprising of topics;

(i) Atomic Models

(ii) Nuclear Processes

However,

What MUST you know ??

What MUST you read ??

What MUST you have at your fingertips ??

@smart_student_ug

ATOMIC MODELS

1 The Atomic Structure.
→ Know ē diff btn Protons, Electrons & neutrons.
→ Diff btn Atomic No. & Mass No.
2. Finding Half life → Graph Method
→ Table Method
→ Formula Method.
3. Radioactivity
→ Alpha Particles, Beta Particles & Gamma Rays, their x-tics & diff.
4. The Uses of Radioactivity
→ Medical, Industrial, Agricultural etc
5. Dangers of Radioactivity

@smart_student_ug

6. Measures of Handling Radioactive Materials.

7. The Production of X-rays

→ Must know how to describe the Production of X-rays with diagram.

→ Uses of X-rays

→ Dangers of X-rays & Prevention

→ How X-rays are used to detect fractures.

@smart_student_ug

NUCLEAR PROCESSES

1. Know the diff btn Nuclear fusion & Nuclear fission.
2. Similarities btn fusion & fission.
3. Conditions for each type of Nuclear reaction to occur.
4. Electricity generation using Nuclear fission.

→ MUST know how to describe it

→ MUST include a nuclear reactor diagram or fission Reaction equation.

5. Know Nuclear Reactor & function of diff Parts.

@smart_student_ug

The Qtns Remain;

(i) What is commonly examinable under each topic ??

(ii) What MUST you grasp today ??

(iii) What Concepts MUST you have at your finger tips ??

→ I am going to give you the MOST precise Summary to CRASH Pt/y Item 3.

→ DON'T miss any upcoming Revision Strategy!!
