UACE GEOGRAPHY PAPER 2 NOTES

Human and Economic Geography (Uganda Focus)

1. Population Geography

Key Concepts

- Population: Total number of people in an area
- Population density = Population / Area
- Population distribution: Spatial spread of people

Factors Influencing Distribution

- Physical: climate, relief, soils, water
- Human: employment opportunities, transport, political stability

Population Growth

- Measured by birth rate, death rate, natural increase
- High growth in developing countries like Uganda

Effects of Population Growth

- Positive: labour supply, market expansion
- Negative: unemployment, pressure on land, urban congestion

Migration

- Types: internal and international
- Causes: push factors (war, poverty), pull factors (jobs, education)

2. Settlement

- Types: rural (villages), urban (towns and cities)
- Patterns: nucleated, dispersed, linear
- Urbanization: growth of towns due to migration and industrialization
- Problems: housing shortages, traffic congestion, pollution

3. Agriculture

- Types: subsistence, commercial, mixed farming
- Factors: climate, soil fertility, capital, technology
- Cash crops: coffee, tea, cotton
- Problems: pests, diseases, poor markets, climate change

4. Industry

- Types: primary, secondary, tertiary
- Location factors: raw materials, labour, transport, market
- Problems: pollution, high costs, limited skilled labour

5. Transport and Communication

- Types: road, rail, water, air
- Importance: trade, movement of people, development
- Problems: high costs, poor rural infrastructure

6. Trade

- Types: internal and external trade
- Balance of trade: exports minus imports
- Exports: coffee, fish, tea
- Problems: price fluctuations, limited markets

7. Tourism

- Movement of people for leisure
- Attractions: national parks, wildlife, scenery
- Importance: foreign exchange, employment
- Problems: insecurity, high costs

8. Environmental Issues

- Types: deforestation, soil erosion, pollution
- Causes: population pressure, poor farming methods
- Solutions: afforestation, environmental laws

9. Energy and Power

- Sources: renewable (solar, hydro), non-renewable (oil, coal)
- Problems: high costs, limited access in rural areas

Exam Tips

- Define key terms clearly
- Use Uganda and East African examples
- Structure essays: introduction, body, conclusion
- Practice past papers regularly
